Zeus Sensor And Numerology Buddy Huang,Bret Taylor,2016-07-29 Unlike traditional forms of Numerology, which add or reduce larger sets of numbers, Zeus Sensor Numerology correlates the 10 singular numbers of 0-9 to the Five Elements of Earth, Metal,

Water, Wood, and Fire. Adding a Yin and Yang polarity to each element creates a matching ten-components. Users of our books and mobile apps can identify the innate energy that comprises our Body and Soul, as well as recognizing the natural, cyclical energy in our environment. Using the traditional Eastern theory of Bazi or Body Source Code, Zeus Sensor reveals the distinctive energy in the universe at our birth time and birthplace that comprises our configuration. This innate psychological and physiological energy can be manipulated through the use of numbers and colors to create personal balance and harmony. Using the traditional Eastern theory of timekeeping based on the 10 Heavenly Stems and 12 Earthly Branches, Zeus Sensor applies a singular number and color to each of the 60 components of a clock or calendar. This external energy is not ongoing and irregular; instead it is cyclical and predictable. Zeus Sensor Numerology removes all arithmetic, matching a singular number to the natural components of our birth time and place using Body Source Code. With the use of numbers and colors based on the Five Elements, we can easily manipulate our innate energy, as well as the energy in our environment to match our unique structure.

A Companion to Yi jing Numerology and Cosmology Bent Nielsen,2013-04-15

Translations of the Yi jing into western languages have been biased towards the yili ('meaning and pattern') tradition, whereas studies of the xiangshu ('image and number') tradition - which takes as its point of departure the imagery and numerology associated with divination and its hexagrams, trigrams, lines, and related charts and diagrams - has remained relatively unexplored. This major new reference work is organised as a Chinese-English encyclopedia, arranged alphabetically according to the pinyin romanisation, with Chinese characters appended. A character index as well as an English index is included. The entries are of two kinds: technical terms and various other concepts related to the 'image and number' tradition, and bio-bibliographical information on Chinese Yi jing scholars. Each entry in the former category has a brief explanation that includes references to the origins of the term, cross-references, and a reference to an entry giving a more comprehensive treatment of the subject.

Numbo Jumbo Srinivas Shastri,2023-05-27 I got interested in numerology at Chennai in 1990, where i stayed as a Paying Guest with a numerologist.
