Chronicles of Wasted Time Malcolm Muggeridge, 1972 This first volume of the autobiography of an inveterate journalist and communicator ends in 1933 when the author was 30.

The Film Book Ronald Bergan, 2021 Story of cinema -- How movies are made -- Movie genres -- World cinema -- A-Z directors -- Must-see movies.

Digital Roots Gabriele Balbi, Nelson Ribeiro, Valérie Schafer, Christian Schwarzenegger, 2021-09-07 As media environments and communication practices evolve over time, so do theoretical concepts. This book analyzes some of the most well-known and fiercely discussed concepts of the digital age from a historical perspective, showing how many of them have pre-digital roots and how they have changed and still are constantly changing in the digital era. Written by leading authors in media and communication studies, the chapters historicize 16 concepts that have become central in the digital media literature, focusing on three main areas. The first part, Technologies and Connections, historicises concepts like network, media convergence, multimedia, interactivity and artificial intelligence. The second one is related to Agency and Politics and explores global governance, datafication, fake news, echo chambers, digital media activism. The last one, Users and Practices, is finally devoted to telepresence, digital loneliness, amateurism, user

generated content, fandom and authenticity. The book aims to shed light on how concepts emerge and are co-shaped, circulated, used and reappropriated in different contexts. It argues for the need for a conceptual media and communication history that will reveal new developments without concealing continuities and it demonstrates how the analogue/digital dichotomy is often a misleading one.

The Curator's Daughter Melanie Dobson, 2021 A young girl, kidnapped on the eve of World War II, changes the lives of a German archaeologist forced into the Nazi Party and--decades later--a researcher trying to overcome her own trauma. 1940. Hanna Tillich cherishes her work as an archaeologist for the Third Reich, searching for the Holy Grail and other artifacts to bolster evidence of a master Aryan race. But when she is reassigned to work as a museum curator in Nuremberg, then forced to marry an SS officer and adopt a young girl, Hanna begins to see behind the Nazi facade. A prayer labyrinth becomes a storehouse for Hanna's secrets, but as she comes to love Lilly as her own daughter, she fears that what she's hiding--and what she begins to uncover--could put them both in mortal danger. Eighty years later, Ember Ellis is a Holocaust researcher intent on confronting hatred toward the Jewish people and other minorities. She reconnects with a former teacher on Martha's Vineyard after she learns that Mrs. Kiehl's mother once worked with the Nazi Ahnenerbe. And yet, Mrs. Kiehl describes her mother as a friend to the Jewish people. Wondering how both could be true, Ember helps Mrs. Kiehl regain her fractured childhood memories of World War II while at the same time confronting the heartache of her own secret past--and the person who wants to silence Ember forever.

Usage of Smartphone Applications in Tourism Dilara Torun, 2011-10-07 Master's Thesis from the year 2011 in the subject Tourism - Miscellaneous, grade: 9,7 (of 10) - distinction, Bournemouth University (School of Tourism), course: European Tourism Management, language: English, abstract: In recent years, smartphone applications have appeared as a new tool helping travellers create experiences. Taking into consideration the potential impact of the smartphones and mobile applications, it is important to analyse the usage of smartphone applications in tourism. This dissertation analyses the already existing mobile applications on the tourism market, clarifies which type of consumers uses these applications during their travel process and predicts some future trends for these new mobile services. There are several different user groups who use smartphones in a variety of different ways, from business users to media junkies. The literature review shows that the main customers are young men, who use these applications especially to plan their travel during the information phase. But smartphone applications can not only support tourists' information processing activities such as

connection and navigation in the tourism consumption stage, but also the activities in the pre-consumption and post-consumption stages. A survey in Madrid (Spain) and Nuremberg (Germany) was conducted for this dissertation showing the main differences and similarities in using smartphone applications for tourism activities. The usage of smartphones in Germany is still more frequent than in Spain and the main used device is the iPhone from Apple. Furthermore, German as well as Spanish travellers focus their usage mainly on the information stage than on the booking process, as the majority of mobile applications are purely informative such as maps or tourist travel guides. The usage is also still challenged by expensive roaming charges and poor Internet connectivity. For a successful usage tourism companies should therefore focus on aspects like secure and e

Narrative Mechanics Beat Suter, René Bauer, Mela Kocher, 2021-05-31 What do stories in games have in common with political narratives? This book identifies narrative strategies as mechanisms for meaning and manipulation in games and real life. It shows that the narrative mechanics so clearly identifiable in games are increasingly used (and abused) in politics and social life. They have »many faces«, displays and interfaces. They occur as texts, recipes, stories, dramas in three acts, movies, videos, tweets, journeys of heroes, but also as rewarding stories in games and as narratives in society - such as a career from rags to riches, the concept of modernity or market economy. Below their surface, however, narrative mechanics are a particular type of motivational design - of game mechanics.

Should Trees Have Standing? Christopher D. Stone, 2010-04-07 Originally published in 1972, *Should Trees Have Standing?* was a rallying point for the then burgeoning environmental movement, launching a worldwide debate on the basic nature of legal rights that reached the U.S. Supreme Court. Now, in the 35th anniversary edition of this remarkably influential book, Christopher D. Stone updates his original thesis and explores the impact his ideas have had on the courts, the academy, and society as a whole. At the heart of the book is an eminently sensible, legally sound, and compelling

argument that the environment should be granted legal rights. For the new edition, Stone explores a variety of recent cases and current events--and related topics such as climate change and protecting the oceans--providing a thoughtful survey of the past and an insightful glimpse at the future of the environmental movement. This enduring work continues to serve as the definitive statement as to why trees, oceans, animals, and the environment as a whole should be bestowed with legal rights, so that the voiceless elements in nature are protected for future generations.

Technical Agile Coaching with the Samman Method Emily Bache, 2021-01-25 Samman Technical Coaching is an approach to Agile training that focuses on technical questions concerning how code is written. It is a highly effective way of increasing agility in your software development organization. The first part of the Samman method involves the coach working in an ensemble with development teams, programming in their production codebase. This hands-on mentoring is accompanied by daily learning hour sessions for mastering particular techniques. In this book you will discover how to put Samman into practice, improve your coding procedures and how you collaborate. It is a practical guide for aspiring and experienced coaches looking for fresh ideas and new ways of teaching Agile. It is both challenging and fun for developers and coaches alike.

Delivering Superior Health and Wellness Management with IoT and Analytics Nilmini Wickramasinghe, Freimut Bodendorf, 2019-11-27 This in-depth book addresses a key void in the literature surrounding the Internet of Things (IoT) and health. By systematically evaluating the benefits of mobile, wireless, and sensor-based IoT technologies when used in health and wellness contexts, the book sheds light on the next frontier for healthcare delivery. These technologies generate data with significant potential to enable superior care delivery, self-empowerment, and wellness management. Collecting valuable insights and recommendations in one accessible volume, chapter authors identify key areas in health and wellness where IoT can be used, highlighting the benefits, barriers, and facilitators of these technologies as well as suggesting areas for improvement in current policy and regulations. Four overarching themes provide a suitable setting to examine the critical insights presented in the 31 chapters: Mobile- and sensor-based solutions Opportunities to incorporate critical aspects of analytics to provide superior insights and thus support better decision-making Critical issues around aspects of IoT in healthcare contexts Applications of portals in healthcare contexts A comprehensive overview that introduces the critical issues regarding the role of IoT technologies for health, *Delivering Superior Health and Wellness Management with IoT and Analytics* paves the way for scholars, practitioners, students, and other stakeholders to understand how to substantially improve health and wellness management on a global scale.

Advanced Fiber Access Networks Cedric F. Lam, Shuang Yin, Tao Zhang, 2022-08-11 Advanced Fiber Access Networks takes a holistic view of broadband access networks—from architecture to network technologies and network economies. The book reviews pain points and challenges that broadband service providers face (such as network construction, fiber cable efficiency, transmission challenges, network scalability, etc.) and how these challenges are tackled by new fiber access transmission technologies, protocols and architecture innovations. Chapters cover fiber-to-the-home (FTTH) applications as well as fiber backhauls in other access networks such as 5G wireless and hybrid-fiber-coax (HFC) networks. In addition, it covers the network economy, challenges in fiber network construction and deployment, and more. Finally, the book examines scaling issues and bottlenecks in an end-to-end broadband network, from Internet backbones to inside customer homes, something rarely covered in books. Provides the latest information on end-to-end broadband access networks, from architecture to network technologies and network economies

A Reader in Themed and Immersive Spaces Scott A. Lukas, 2016 Themed spaces have, at their foundation, an overarching narrative, symbolic complex, or story that drives the overall context of their spaces. Theming, in some very unique ways, has expanded beyond previous stereotypes and oversimplifications of culture and place to now consider new and often controversial topics, themes, and storylines.--Publisher's website.

Bodies as Evidence Mark Maguire, Ursula Rao, Nils Zurawski, 2018-12-14 From biometrics to predictive policing, contemporary security relies on sophisticated scientific evidence-gathering and knowledge-making focused on the human body. Bringing together new anthropological perspectives on the complexities of security in the present moment, the contributors to Bodies as Evidence reveal how bodies have become critical sources of evidence that is organized and deployed to classify, recognize, and manage human life. Through global case studies that explore biometric identification, border control, forensics, predictive policing, and counterterrorism, the contributors show how security discourses and practices that target the body contribute to new configurations of knowledge and power. At the same time, margins of error, unreliable technologies, and a growing suspicion of scientific evidence in a “post-truth” era contribute to growing insecurity, especially among marginalized populations. Contributors. Carolina Alonso-Bejarano, Gregory Feldman, Francisco J. Ferrándiz, Daniel M. Goldstein, Ieva Jusionyte, Amade M’charek, Mark Maguire, Joseph P. Masco, Ursula Rao, Antonius C. G. M. The Rosa Luxemburg Reader Rosa Luxemburg, 2004-02 Among the major Marxist thinkers of the Russian Revolution era, Rosa Luxemburg stands out as one who speaks to our own time. Her legacy grows in relevance as the global character of the capitalist market becomes more apparent and the critique of bureaucratic power is more widely accepted within the movement for human liberation. The Rosa Luxemburg Reader is the definitive one-volume collection of Luxemburg's writings in English translation. Unlike previous publications of her work from the early 1970s, this volume includes substantial extracts from her major economic writings—above all, *The Accumulation of Capital* (1913)—and from her political writings, including *Reform or Revolution* (1898), the *Junius Pamphlet* (1916), and *The Russian Revolution* (1918). The Reader also includes a number of important texts that have never before been published in English translation, including substantial extracts from her *Introduction to Political Economy* (1916), and a recently-discovered piece on slavery. With a substantial introduction assessing Luxemburg's work in the light of recent research, *The Rosa Luxemburg Reader* is an indispensable resource for scholarship and an inspiration for a new generation of activists.

Weird Massachusetts Jeff Belanger, 2008 Massachusetts and weird: not too much of a stretch, some would say. But the authors dug a little deeper and found all kinds of local legends, bizarre beasts, surprising cemeteries, and uncovered the best kept secrets from all over the Bay State. If it's unusual or unexplainable or fantastic, and in the Bay State, you'll find it all here.
