Beyond the Green Economy Ricardo Abramovay, 2015-09-07 The world needs a new economy. In spite of tremendous and growing material prosperity, inequality is on the rise and the current organization of the Earth's natural resources has failed to address the basic human needs of billions of people. This book exposes the bottlenecks of the present path of economic growth and discusses the main path to alternatives. In spite of undeniable advances, all evidence points towards the growing depletion of the very ecosystems that societies depend on. By placing ethics squarely in the middle of economic life, this book demonstrates the need for a new economy, one that fosters unity between society, nature, economics and ethics. It questions the most important scientific and political pillar that forms the basis for evaluating social resource use: economic growth. Written in a non-specialist language, this book is an introduction to the main issues involving sustainable development. It will be essential reading for both students and professionals working in the field of socio-environmental responsibility.

Tecnologia e novas mídias: da educação às práticas culturais e de consumo Patricia Bieging, Raul Inácio Busarello, Vania Ribas Ulbricht, Lídia Oliveira, Ademilde Silveira Sartori, Ana Margarida Almeida, Andreza Regina Lopes da Silva, Angela Schaun, Araci Hack Catapan, Beatriz Braga Bezerra, Beatriz Helena Dal Molin, Berenice Santos Gonçalves, Carlysângela Silva Falcão, Celso Figueiredo Neto, Conceição Lopes, Deglaucy Jorge Teixeira, Dóris Roncarelli, Fernanda Elouise Budag, Fernando Jose Spanhol, Francieli Motter Ludovico, Jacqueline Sobral, Jorge Ferraz de Abreu, Julia Cristina Granetto, Maria de Lourdes Bacha, Mirian Lígia Endo Karolesky, Patrícia Oliveira, Rita de Kássia Araújo da Silva, Rita Oliveira, Sabrina de Magalhães Franco, Vania Baldi, Victor Aquino, 2013-12-20 Os processos sociais – culturais, políticos, educacionais, religiosos, etc. – contemporâneos passaram a ter como enquadramento o contexto global, que desafia a escala de compreensão do enraizamento local, da familiaridade do que é próximo. A tecnologia sempre desafiou os modos de fazer, agir e compreender. Hoje a tecnologia informática em simbiose com as telecomunicações criaram uma nova camada, uma nova eco-techno-esfera que envolve todos os espaços, mesmo os que não têm acesso à rede Internet, na medida em que por esta são afetados porque lhes confere a condição de exclusão. A eco-techno-esfera criada pela Internet intensifica-se com o protagonismo de um dos seus serviços, a World Wide Web ou Web que progressivamente nele tem subsumido os demais serviços da Internet. Este protagonismo da Web exponencia-se com a passagem da Web 1.0 para a Web 2.0 com o protagonismo assumido pelos usuários que passam a ter um papel fundamental na dinâmica de uso e crescimento dos serviços e dos conteúdos e, agora, com a Web 3.0 em que a busca semântica se apresenta como resposta ao extravasamento de dados gerados pelos usuários que faz florescer a importância do designado big data. É neste contexto que o presente livro se propõe contribuir com textos que apresentam, equacionam e refletem sobre o impacto das tecnologias nas práticas culturais, educacionais e de consumo. Embora a metáfora do impacto não seja a de maior rigor, dado que as tecnologias nascem e desenvolvem-se no seio da própria sociedade, logo, não veem do exterior impactar, como um projétil; o certo é que a sua extrema influência na dinâmica das práticas sociais nos conduz ao uso do conceito de impacto, no sentido de grande poder de modificar. Apesar da ideia de novidade que tendencialmente se associa à tecnologia, na realidade a sua própria evolução faz-se num processo dialético entre inovação e o que estava estabelecido, numa espiral que não rompe de forma abrupta, dramática, com o estado anterior. Daí que o conceito de remediation proposto por David Bolter e Richard Grusin surge como uma boa ferramenta analítica. E isso é tanto mais adequado quanto o campo central de análise é a educação. O espaço formativo central continua a ser a escola e ela é um espaço de remediation

por excelência, onde se confrontam o velho e o novo, o estabelecido e a irreverência, as literacias clássicas e as novas literacias infocomunicacionais em ambientes digitais, o on e o off-line, o analógico e o digital, a lentidão e a velocidade, o cânone e a crítica, etc.. A escola é, portanto, uma arena privilegiada para se sentir que “De tudo ficou um pouco” para usar as palavras de Drummond de Andrade. Os capítulos do presente livro estão focalizados em torno de um conjunto de problemáticas tendo a educação como matriz transversal, mesmo quando implícita. Lídia Oliveira - Universidade de Aveiro, Portugal.

Young People, Sex and the Media D. Buckingham, S. Bragg, 2003-12-05 Are children today growing up too soon? How do they - and their parents - feel about media portrayals of sex and personal relationships? Are the media a corrupting influence, or a potentially positive and useful resource for young people? Drawing on an extensive research project, which investigated children's interpretations of sexual content in films, TV and print media, this book considers how young people (aged 9-17) use such material to understand their experiences and build their identities, and how they and their parents respond to public concerns about these issues. The book offers a clearly written and entertaining insight into children's and parents' perspectives on these difficult issues - perspectives that are often ignored or trivialised in public debate.

Opportunity Foregone Nancy Birdsall, R. H. Sabot, 1996 Fundamental changes in Brazilian economic policy in the mid-1990s have dramatically slowed inflation and set the stage for sustained growth. These gains provide the opportunity to turn to other social and economic problems overshadowed for years by the country's macroeconomic problems. Among the most important issues on the agenda is education. *Opportunity Foregone: Education in Brazil* offers a frank and thorough assessment of the country's educational performance and the resulting social costs. It identifies necessary reforms and the barriers to reform. The book's 18 studies examine a wide variety of key issues regarding the economics of education in Brazil.

Microfinance Games Xavier Giné, 2016 Microfinance has been heralded as an effective way to address imperfections in credit

markets. But from a theoretical perspective, the success of microfinance contracts has puzzling elements. In particular, the group-based mechanisms often employed are vulnerable to free-riding and collusion, although they can also reduce moral hazard and improve selection. The authors created an experimental economics laboratory in a large urban market in Lima, Peru and over seven months conducted 11 different games that allow them to unpack microfinance mechanisms in a systematic way. They find that risk-taking broadly conforms to predicted patterns, but that behavior is safer than optimal. The results help to explain why pioneering microfinance institutions have been moving away from group-based contracts.

The Virtual University? Kevin Robins, Frank Webster, 2002-11-07 Higher education is changing - in scope, style, technology, and objectives. This book looks at the impact of information technologies on higher education and the reorganization of universities in more managerial and business directions. The book combines empirical and analytical chapters from scholars on both sides of the Atlantic.

A New Culture of Learning Douglas Thomas, John Seely Brown, 2011 The twenty-first century is a world in constant change. In *A New Culture of Learning*, Doug Thomas and John Seely Brown pursue an understanding of how the forces of change, and emerging waves of interest associated with these forces, inspire and invite us to imagine a future of learning that is as powerful as it is optimistic. Typically, when we think of culture, we think of an existing, stable entity that changes and evolves over long periods of time. In *A New Culture*, Thomas and Brown explore a second sense of culture, one that responds to its surroundings organically. It not only adapts, it integrates change into its process as one of its environmental variables. By exploring play, innovation, and the cultivation of the imagination as cornerstones of learning, the authors create a vision of learning for the future that is achievable, scalable and one that grows along with the technology that fosters it and the people who engage with it. The result is a new form of culture in which knowledge is seen as fluid and evolving, the personal is both enhanced and refined in relation to the collective, and the ability to manage, negotiate and participate in the world is governed by the play of the imagination. Replete with stories, this is a book that looks at the challenges that our education and learning environments face in a fresh way. PRAISE FOR A NEW CULTURE OF LEARNING A provocative and extremely important new paradigm of a 'culture of learning', appropriate for a world characterized by continual change. This is a must read for anyone interested in the future of education. James J. Duderstadt, President Emeritus, University of Michigan Thomas and Brown are the John Dewey of the digital age. Cathy Davidson, Professor of Interdisciplinary Studies, Duke University *A New Culture of Learning* may provide for the digital media and learning movement what Thomas Paine's *Common Sense* did for the colonists during the American Revolution- a straightforward, direct explanation of what we are fighting for and what we are fighting against. Henry Jenkins, Provost's Professor, USC *A New Culture of Learning* is at once persuasive and optimistic - a combination that is all too rare, but that flows directly from its authors' insights about learning in the digital age. Pearls of wisdom leap from almost every page. Paul Courant, Dean of Libraries, University of Michigan Brilliant. Insightful. Revolutionary. Marcia Conner, author of *The New Social Learning* Douglas Thomas and John Seely Brown portray the new world of learning gracefully, vividly, and convincingly. Howard Gardner, Professor, Harvard Graduate School of Education Thomas and Brown make it clear that education is too often a mechanistic, solo activity delivered to the young. It doesn't have to be that way-learning can be a messy, social, playful, embedded, constant activity. We would do well to listen to their message. Clay Shirky, author of *Cognitive Surplus* Anyone who fears, as I do, that today's public schools are dangerously close to being irrelevant must read this book. The

authors provide a road map-and a lifeline-showing how schools can prosper under the most difficult conditions. It is a welcome departure from all the school bashing. John Merrow, Education Correspondent, PBS NewsHour American education is at a crossroads. By illuminating how play helps to transform both information networks and experimentation, and how collective inquiry unleashes the power of imagination, *A New Culture of Learning* provides an irresistible path to the future. Joel Myerson, Director, Forum for the Future of Higher Education.

Contemporary Marketing David L. Kurtz,2011

Bottom-up Marketing Al Ries,Jack Trout,1990 From the bestselling authors of *Marketing Warfare* comes another winner that turns conventional views of marketing upside-down, presenting a step-by-step approach to turn an effective tactic into an overall business strategy.

Economic Inequality and Higher Education Stacy Dickert-Conlin,Ross Rubenstien,2007-06-21 The vast disparities in college attendance and graduation rates between students from different class backgrounds is a growing social concern. *Economic Inequality and Higher Education* investigates the connection between income inequality and unequal access to higher education, and proposes solutions that the state and federal governments and schools themselves can undertake to make college accessible to students from all backgrounds. *Economic Inequality and Higher Education* convenes experts from the fields of education, economics, and public policy to assess the barriers that prevent low-income students from completing college. For many students from disadvantaged socioeconomic backgrounds, the challenge isn't getting into college, but getting out with a degree. Helping this group will require improving the quality of education in the community colleges and lower-tier public universities they are most likely to attend. Documenting the extensive disjuncture between the content of state-mandated high school testing and college placement exams, Michael Kirst calls for greater alignment between K-12 and college education. Amanda Pallais and Sarah Turner examine barriers to access at elite universities for low-income students—including tuition costs, lack of information, and poor high school records—as well as recent initiatives to increase socioeconomic diversity at private and public universities. Top private universities have increased the level and transparency of financial aid, while elite public universities have focused on outreach, mentoring, and counseling, and both sets of reforms show signs of success. Ron Ehrenberg notes that financial aid policies in both public and private universities have recently shifted towards merit-based aid, away from the need-based aid that is most helpful to low-income students. Ehrenberg calls on government policy makers to create incentives for colleges to increase their representation of low-income students. Higher education is often vaunted as the primary engine of upward mobility. Instead, as inequality in America rises, colleges may be reproducing income disparities from one generation to the next. *Economic Inequality and Higher Education* illuminates this worrisome trend and suggests reforms that educational institutions and the government must implement to make the dream of a college degree a reality for all motivated students.

Cities and Homes for All Barry Pinsky,Carol Mundle,1996

Beyond Critique Bradley A. Levinson,Jacob P. K. Gross,Christopher Hanks,Julia Heimer Dadds,Kafi Kumasi,Joseph Link,2015-12-03

This book introduces educational practitioners, students, and scholars to the people, concepts, questions, and concerns that make up the field of critical social theory. It guides readers into a lively conversation about how education can and does contribute to reinforcing or challenging relations of domination in the modern era. Written by a group of experienced educators and scholars, in an engaging style, *Critical Social Theories and Education* introduces and explains the preeminent thinkers and traditions in critical social theory, and discusses the primary strands of educational research and thought that have been informed and influenced by them.

Corporate Culture and Performance John P. Kotter, James L. Heskett, 2008-06-30 Going far beyond previous empirical work, John Kotter and James Heskett provide the first comprehensive critical analysis of how the culture of a corporation powerfully influences its economic performance, for better or for worse. Through painstaking research at such firms as Hewlett-Packard, Xerox, ICI, Nissan, and First Chicago, as well as a quantitative study of the relationship between culture and performance in more than 200 companies, the authors describe how shared values and unwritten rules can profoundly enhance economic success or, conversely, lead to failure to adapt to changing markets and environments. With penetrating insight, Kotter and Heskett trace the roots of both healthy and unhealthy cultures, demonstrating how easily the latter emerge, especially in firms which have experienced much past success. Challenging the widely held belief that strong corporate cultures create excellent business performance, Kotter and Heskett show that while many shared values and institutionalized practices can promote good performances in some instances, those cultures can also be characterized by arrogance, inward focus, and bureaucracy -- features that undermine an organization's ability to adapt to change. They also show that even contextually or strategically appropriate cultures -- ones that fit a firm's strategy and business context -- will not promote excellent performance over long periods of time unless they facilitate the adoption of strategies and practices that continuously respond to changing markets and new competitive environments. Fundamental to the process of reversing unhealthy cultures and making them more adaptive, the authors assert, is effective leadership. At the heart of this groundbreaking book, Kotter and Heskett describe how executives in ten corporations established new visions, aligned and motivated their managers to provide leadership to serve their customers, employees, and stockholders, and thus created more externally focused and responsive cultures.

Not For Sale Anatole Anton, 2020-01-16 *Not for Sale: In Defense of Public Goods* contains a variety of essays aimed at developing a timely philosophical defense of public goods against neo-liberal criticisms. The defense proceeds on both a conceptual level with essays treating such concepts as collective action, collective provision, common property, intellectual property and a substanti
