

O Observador Cetelem Bgn Brazil 2011 Iphone 10

D. Buckingham,S. Bragg

Young People, Sex and the Media D. Buckingham, S. Bragg, 2003-12-05 Are children today growing up too soon? How do they - and their parents - feel about media portrayals of sex and personal relationships? Are the media a corrupting influence, or a potentially positive and useful resource for young people? Drawing on an extensive research project, which investigated children's interpretations of sexual content in films, TV and print media, this book considers how young people (aged 9-17) use such material to understand their experiences and build their identities, and how they and their parents respond to public concerns about these issues. The book offers a clearly written and entertaining insight into children's and parents' perspectives on these difficult issues - perspectives that are often ignored or trivialised in public debate.

Green Marketing Jacquelyn A. Ottman, 1993

A New Culture of Learning Douglas Thomas, John Seely Brown, 2011 The twenty-first century is a world in constant change. In *A New Culture of Learning*, Doug Thomas and John Seely Brown pursue an understanding of how the forces of change, and emerging waves of interest associated with these forces, inspire and invite us to imagine a future of learning that is as powerful as it is optimistic. Typically, when we think of culture, we think of an existing, stable entity that changes and evolves over long periods of time. In *A New Culture*, Thomas and Brown explore a second sense of culture, one that responds to its surroundings organically. It not only adapts, it integrates change into its process as one of its environmental variables. By exploring play, innovation, and the cultivation of the imagination as cornerstones of learning, the authors create a vision of learning for the future that is achievable, scalable and one that grows along with the technology that fosters it and the people who engage with it. The result is a new form of culture in which knowledge is seen as fluid and evolving, the personal is both enhanced and refined in relation to the collective, and the ability to manage, negotiate and participate in the world is governed by the play of the imagination. Replete with stories, this is a book that looks at the challenges that our education and learning environments face in a fresh way. PRAISE FOR A NEW CULTURE OF LEARNING A provocative and extremely important new paradigm of a 'culture of learning', appropriate for a world characterized by continual change. This is a must read for anyone interested in the future of education. James J. Duderstadt, President Emeritus, University of Michigan Thomas and Brown are the John Dewey of the digital age. Cathy Davidson, Professor of Interdisciplinary Studies, Duke University *A New Culture of Learning* may provide for the digital media and learning movement what Thomas Paine's *Common Sense* did for the colonists during the American Revolution- a straightforward, direct explanation of what we are fighting for and what we are fighting against. Henry Jenkins, Provost's Professor, USC *A New Culture of Learning* is at once persuasive and optimistic - a combination that is all too rare, but that flows directly from its authors' insights about learning in the digital age. Pearls of wisdom leap from almost every page. Paul Courant, Dean of Libraries, University of Michigan Brilliant. Insightful. Revolutionary. Marcia Conner, author of *The New Social Learning* Douglas Thomas and John Seely Brown portray the new world of learning gracefully, vividly, and convincingly. Howard Gardner, Professor, Harvard Graduate School of Education Thomas and Brown make it clear that education is too often a mechanistic, solo activity delivered to the young. It doesn't have to be that way-learning can be a messy, social, playful, embedded, constant activity. We would do well to listen to their message. Clay Shirky, author of *Cognitive Surplus* Anyone who fears, as I do, that today's public schools are dangerously close to being irrelevant must read this book. The authors provide a road map-and a lifeline-showing how schools can prosper under the most difficult conditions. It is a welcome departure from all the school bashing. John Merrow, Education Correspondent, PBS NewsHour American education is at a crossroads. By illuminating how play helps to transform both information networks and experimentation, and how collective inquiry unleashes the power of imagination, *A New Culture of Learning* provides an irresistible path to the future. Joel Myerson, Director, Forum for the Future of Higher Education.

Technology Education Michael Hacker,Dave Burghardt,2004

Corporate Culture and Performance John P. Kotter,James L. Heskett,2008-06-30 Going far beyond previous empirical work, John Kotter and James Heskett provide the first comprehensive critical analysis of how the culture of a corporation powerfully influences its economic performance, for better or for worse. Through painstaking research at such firms as Hewlett-Packard, Xerox, ICI, Nissan, and First Chicago, as well as a quantitative study of the relationship between culture and performance in more than 200 companies, the authors describe how shared values and unwritten rules can profoundly enhance economic success or, conversely, lead to failure to adapt to changing markets and environments. With penetrating insight, Kotter and Heskett trace the roots of both healthy and unhealthy cultures, demonstrating how easily the latter emerge, especially in firms which have experienced much past success. Challenging the widely held belief that strong corporate cultures create excellent business performance, Kotter and Heskett show that while many shared values and institutionalized practices can promote good performances in some instances, those cultures can also be characterized by arrogance, inward focus, and bureaucracy -- features that undermine an organization's ability to adapt to change. They also show that even contextually or strategically appropriate cultures -- ones that fit a firm's strategy and business context -- will not promote excellent performance over long periods of time unless they facilitate the adoption of strategies and practices that continuously respond to changing markets and new competitive environments. Fundamental to the process of reversing unhealthy cultures and making them more adaptive, the authors assert, is effective leadership. At the heart of this groundbreaking book, Kotter and Heskett describe how executives in ten corporations established new visions, aligned and motivated their managers to provide leadership to serve their customers, employees, and stockholders, and thus created more externally focused and responsive cultures.

Control in an Age of Empowerment Robert Simons,2008-10-01 In *Control in an Age of Empowerment*, Robert Simons explains how to give employees the freedom to innovate while protecting your firm from loose cannons. Using powerful examples, Simons shows how to apply four powerful management levers to balance autonomy with control: Traditional diagnostic control systems, Belief systems, Boundary systems, and Interactive control systems. Used in concert, these four levers give you the control you need--without sacrificing the creative thinking your company can't do without. Since 1922, Harvard Business Review has been a leading source of breakthrough ideas in management practice. The Harvard Business Review Classics series now offers you the opportunity to make these seminal pieces a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world.

The Manager's Job Henry Mintzberg,1990

The Core Competence of the Corporation C. K. Prahalad,Gary Hamel,Harvard University. Harvard Business Review,2001

The Social Psychology of Organizing Karl E. Weick,1979

A Theory of Goal Setting & Task Performance Edwin A. Locke,Gary P. Latham,1990

Sociological Paradigms and Organisational Analysis Gibson Burrell,Gareth Morgan,2017-03-02 The authors argue in this book that social theory can usefully be conceived in terms of four broad paradigms, based upon different sets of meta-theoretical assumptions with regard to the nature of social science and the nature of society. The four paradigms - Functionalist, Interpretive, Radical Humanist and Radical Structuralist - derive from quite distinct intellectual traditions, and present four mutually exclusive views of the social work. Each stands in its own right, and generates its own distinctive approach to the analysis of social life. The authors provide extensive reviews of the four paradigms, tracing the evolution and inter-relationships between the various sociological schools of thought within each. They then proceed to relate theories of organisation to this wider background. This book covers a great range of intellectual territory. It makes a number of important contributions to our understanding of sociology

and organisational analysis, and will prove an invaluable guide to theorists, researchers and students in a variety of social science disciplines. It stands as a discourse in social theory, drawing upon the general area of organisation studies - industrial sociology, organisation theory, organisational psychology, and industrial relations - as a means of illustrating more general sociological themes. In addition to reviewing and evaluating existing work, it provides a framework for appraising future developments in the area of organisational analysis, and suggests the form which some of these developments are likely to take.

Technology and Social Change Harvey Russell Bernard, Pertti J. Pelto, 1987

Organization Design Mintzberg, 1981-01-01

Judgment Under Uncertainty Daniel Kahneman, Paul Slovic, Amos Tversky, 1982-04-30 Thirty-five chapters describe various judgmental heuristics and the biases they produce, not only in laboratory experiments, but in important social, medical, and political situations as well. Most review multiple studies or entire subareas rather than describing single experimental studies.
