Effective Mooring OCIMF.,2019 Mooring is one of the most complex and dangerous operations for ship and terminal crew. If something goes wrong, the consequences can be severe. Effective Mooring gives crew a general introduction to mooring and guidance on how to stay safe during mooring operations. It is written in an easy-to-understand style for seafarers worldwide and can be used as a training guide for both new and experienced crew. Produced by the Oil Companies International Marine Forum (OCIMF), the book is written for crew on board oil tankers, barges and terminals, but the principles can be applied to any vessel.

Chicken 20 Ways America's Test Kitchen,2020-04-28 This collection is packed with 20 easy-to-make recipes that rely on little more than chicken and pantry staples. You'll learn how a few flavor-packed ingredients can transform humble chicken into the star of the dinner table. Take our spice-cabinet chicken recipes, which will simplify your grocery shopping—just raid your spice cabinet for three delicious takes on roast whole chicken. Or how about Southern-Style Stewed Chicken and Rice, a comforting one-pot meal that features rice plumped with flavored stock and tossed with tender pieces of shredded chicken? Chicken Mole Poblano surprisingly depends on pantry essentials such as dried chiles, nuts, a handful of common dried herbs and spices, and a bit of chocolate for its deeply complex flavor.

Condition Assessment Scheme International Maritime Organization,2005 The Condition Assessment Scheme (CAS) for oil tankers was adopted in 2001 and is applicable to all single-hull tankers of 15 years or older. Although the CAS does not specify structural standards in excess of the provisions of other IMO conventions, codes and recommendations, its requirements stipulate more stringent and transparent verification of the reported structural condition of the ship and that documentary and survey procedures have been properly carried out and completed. The Scheme requires that compliance with the CAS is assessed during the Enhanced Survey Program of Inspections concurrent with intermediate or renewal surveys currently required by resolution A.744(18), as amended.--Publisher's description.

Uae Yearbook Ibrahim Al-Abed,Paula Vine,Peter Hellyer,2004-12 Each year this book celebrates achievements of the United Arab Emirates and in so doing it pays tribute to the architect of this stunning success story, Sheikh Zayed bin Sultan Al Nahyan, the greatly loved and respected founding father and President of the UAE from its formation on 2 December 1971 until his death on 2 November 2004. Sheikh Zayed displayed enormous wisdom and strength in overcoming the obstacles that faced him in constructing a modern nation. He never faltered on his course and knew exactly what he wanted to achieve - and why. He used to say that 'Wealth is not money. Wealth is in people.' And he devoted his efforts to providing education, health care and social services for all the country's citizens. At the same time he nurtured an environment in which business could flourish and people could live rewarding lives in freedom and peace.

308 Circuits Jan Buiting,2003 This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, 308 Circuits covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

OSV Chemical Code International Maritime Organization,2018-09-03 This present Code has been developed for the design, construction and operation of offshore support vessels (OSVs) which transport hazardous and noxious liquid substances in bulk for the servicing and resupplying of offshore platforms, mobile offshore drilling units and other offshore installations, including those employed in the search for and recovery of hydrocarbons from the seabed. The basic philosophy of the present Code is to apply standards contained in the Code and the International Code or the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk (IBC Code) and in the International Code for the Construction and Equipment of Ships Carrying Liquefied Gases in Bulk (IGC Code) to the extent that is practicable and reasonable taking into account the unique design features and service characteristics of OSVs.

LNG Markets in Transition Anne-Sophie Corbeau,David Ledesma,2016 The present situation in the LNG market should be seen as a 'crossroads' for the industry. The LNG industry has not been static over the past 5 decades and has already experienced many changes, but still the model of long-term contracts prevails and the majority of LNG is still bought at oil-indexed gas prices. There have however been considerable changes: an increase in short-term trading of LNG, buyer contractual flexibility and FOB contracts which have lead to around a quarter of the LNG is being traded under spot and short-term contracts, with aggregators play a far more significant role. All these factors have influenced project business structures. The industry has now embarked on a period of further change, with 180 bcm of new LNG export capacity (equivalent to more than 50% of LNG trade in 2014) under construction at a time when the assumed rapid LNG demand growth in Asia appears to be slowing. The absorption of this new supply will affect, not only trade-flow patterns, but also pricing dynamics, competition with other gas supply channels and (in the power sector) potentially other fuels. Key to this change is US LNG, with buyers becoming more selective about the price and delivery terms they are ready to accept. Sellers however are facing high costs and are reluctant to abandon a business model in which they have confidence. Oil indexation is under further attack with US LNG selling at HH indexed prices (plus costs), and other sellers and buyers have been pressured to adopt different pricing policies and secure more contractual flexibility. This volume examines the development of the LNG business over the past 50 years and examines how the industry will change over the coming 15 years, faced by unprecedented challenges to its historic business model.
