Trans-Asia as Method Jeroen de Kloet,Yiu Fai Chow,Gladys Pak Lei Chong,2019-11-06 This rich collection of essays offers a multi- and inter-disciplinary discussion of trans-Asia approaches from critical theory, historical studies, cultural studies to film studies. In doing so the authors lay down the groundwork for a more inclusive knowledge-production and fruitful transnational collaboration. The authors engage with the implications of “trans-Asia” using a range of empirical cases. At the heart of the book is a desire and attempt to give a grounded understanding of what “trans-Asia” approaches are by examining human mobilities, media culture flows and connections across Asia and beyond in four key aspects: cross-border flows and connections; inter-Asian comparison and referencing; transnational and de-nationalized approaches; and cross-border collaboration.

Everyware Adam Greenfield,2010-03-10 Ubiquitous computing--almost imperceptible, but everywhere around us--is rapidly becoming a reality. How will it change us? how can we shape its emergence? Smart buildings, smart furniture, smart clothing... even smart bathtubs. networked street signs and self-describing soda cans. Gestural interfaces like those seen in *Minority Report*. The RFID tags now embedded in everything from credit cards to the family pet. All of these are facets of the ubiquitous computing author Adam Greenfield calls *everyware*. In a series of brief, thoughtful meditations, Greenfield explains how *everyware* is already reshaping our lives, transforming our understanding of the cities we live in, the communities we belong to--and the way we see ourselves. What are people saying about the book? Adam Greenfield is intense, engaged, intelligent and caring. I pay attention to him. I counsel you to do the same. --HOWARD RHEINGOLD, AUTHOR, SMART MOBS: THE NEXT SOCIAL REVOLUTION A gracefully written, fascinating, and deeply wise book on one of the most powerful ideas of the digital age--and the obstacles we must overcome before we can make ubiquitous computing a reality.--STEVE SILBERMAN, EDITOR, WIRED MAGAZINE Adam is a visionary. he has true compassion and respect for ordinary users like me who are struggling to use and understand the new technology being thrust on us at overwhelming speed.--REBECCA MACKINNON, BERKMAN CENTER FOR INTERNET AND SOCIETY, HARVARD UNIVERSITY *Everyware* is an AIGA Design Press book, published under Peachpit's New Riders imprint in partnership with AIGA.

Innovation in Financial Services Anne-Laure Mention,Marko Torkkeli,2014-10-21 This book gathers together some of the most up-to-date thinking in the growing field of innovation in services and more particularly, in financial services. It explores the peculiarities of innovation in financial services firms and surrounding market players, discusses the open nature of the innovation process, and analyses its success factors and its interplay with strategy and performance. This book provides topical insights on the challenges facing the financial industry, such as the convergence with other sectors, and the increasing regulatory burden. By combining multidisciplinary approaches and by selecting a number of cutting-edge research models, theories, empirical findings and practitioners' insights, it offers unique, contemporary and multidimensional perspectives on innovation for a sector of paramount importance for the running of economies around the world. This book comes at a time of turbulence, uncertainty and within an industry in need of vision and strategic foresight. By synthesizing multiple views from academia and practice, it opens the agenda and contributes to the on-going debate of redefining the multi-polar role of innovation in the financial industry.

Artificial Life Christopher Langton,2019-04-02 In September 1987, the first workshop on Artificial Life was held at the Los Alamos National Laboratory. Jointly sponsored by the Center for Nonlinear Studies, the Santa Fe Institute, and Apple Computer Inc, the workshop brought together 160 computer scientists, biologists, physicists, anthropologists, and other assorted -ists, all of whom shared a common interest in the simulation and synthesis of living systems. During five intense days, we saw a wide variety of models of living systems, including mathematical models for the origin of life, self-reproducing automata, computer programs using the

mechanisms of Darwinian evolution to produce co-adapted ecosystems, simulations of flocking birds and schooling fish, the growth and development of artificial plants, and much, much more The workshop itself grew out of my frustration with the fragmented nature of the literature on biological modeling and simulation. For years I had prowled around libraries, shifted through computer-search results, and haunted bookstores, trying to get an overview of a field which I sensed existed but which did not seem to have any coherence or unity. Instead, I literally kept stumbling over interesting work almost by accident, often published in obscure journals if published at all.

New Journalism Ecologies in East and Southern Africa Trust Matsilele,Shepherd Mpofu,Dumisani Moyo,2023-03-24 This volume presents case studies of news media employing and integrating social media into their news production practices. It links social media use to journalistic practices and news production processes in the digital age of the Global South. Critically, the chapters look at seminal cases of start-up news media whose content is informed by trends in social media, ethical considerations and participatory cultures spurred by the wide use of social media. There has been considerable research looking at the potential of new media technologies, traditional journalism and citizen reporting. The extent to which these new media technologies and ‘citizen journalism’ have morphed or reconfigured traditional journalism practice remains debatable. Currently, there are questions around the limits of social media in journalism practice as the ethical lines continue to become blurred. It is this conundrum of the role of social media in the reconfiguration of the media, news making, production and participatory cultures that requires more investigation. Social media has also turned the logic of the political economy of media production on its head as citizens can now produce, package and distribute news and information with shoestring budgets and in authoritarian regimes with no license of practice. This new political economy means the power that special interest groups used to enjoy is increasingly slipping from their hands as citizens take back the power to appropriate social media journalism to counter hegemonic narratives. Citizens can also perform journalistic roles of investigating and whistleblowing but with a lack off, or limited, regulation. This volume seeks to explore and untangle these issues, and provides an invaluable resource for researchers across the field of journalism, mass media, and communication studies.

Ambient Intelligence Emile H.L. Aarts,James L. Crowley,Heinz Gerhäuser,Alexander Pflaum,Janina Schmidt,Reiner Wichert,2008-11-13 This volume contains the proceedings of the Second European Ambient Intelligence (AmI) Conference. The conference took place in Erlangen and Nürnberg, November 19-22, 2008. The concept of ambient intelligence (AmI) was introduced in the late 1990s as a novel paradigm for electronic environments for the years 2010-2020. It builds on the early visions of Weiser describing a novel mobile computing infrastr- ture integrated into the networked environment of people. According to early defi- tions, AmI refers to smart electronic surroundings that are sensitive and responsive to the presence of people. The added value for the multi-dimensional society we are living in lies in the fact that the large-scale integration of microelectronics into the environment enables people and objects to interact with this environment in a se- less, trustworthy, and natural manner. Obviously, AmI solutions deliver a new quality of communication and information exchange, they help people to fulfill their professional tasks with increasing efficiency, enable the older generation to stay much longer in the privacy of their own homes and the younger one to lead a healthy and responsible life. Smart mobile devices navigate in private apartments as well as in complex public or industrial environments in order to support people with a broad variety of services.
