Odd Meters Bruce E Arnold, 2007-11 In order to be prepared to read through any piece of music, the serious musician must be able to recognize, read and play rhythms fluidly. Unlike other books of this kind, the exercises given contain complex syncopations which approximate the experience of reading through a sophisticated jazz composition or a contemporary classical piece. This 100 page book will prepare the serious musician for a life of sight-reading rhythmically complex charts. This book applies both eighth and sixteenth note rhythms to odd meter combinations. All examples use one pitch, allowing the student to focus completely on time and rhythm on the instrument of their choice. All exercises can be downloaded from the internet to facilitate correct practice, and aid internalization. This book is a required text at New York Universities and Princeton University Music department.

**Pretend You're In A War** Mark Blake, 2014-09-18 'A definitive tome for both Who fans and newcomers alike' \*\*\*\*\* Q Magazine Pete Townshend was once asked how he prepared himself for The Who's violent live performances. His answer? 'Pretend you're in a war.' For a band as prone to furious infighting as it was notorious for acts of 'auto-destructive art' this could have served as a motto. Between 1964 and 1969 The Who released some of the most dramatic and confrontational music of the decade, including 'I Can't

Explain', 'My Generation' and 'I Can See For Miles'. This was a body of work driven by bitter rivalry, black humour and dark childhood secrets, but it also held up a mirror to a society in transition. Now, acclaimed rock biographer Mark Blake goes in search of its inspiration to present a unique perspective on both The Who and the sixties. From their breakthrough as Mod figureheads to the rise and fall of psychedelia, he reveals how The Who, in their explorations of sex, drugs, spirituality and class, refracted the growing turbulence of the time. He also lays bare the colourful but crucial role played by their managers, Kit Lambert and Chris Stamp. And – in the uneasy alliance between art-school experimentation and working-class ambition – he locates the motor of the Swinging Sixties. As the decade closed, with The Who performing Tommy in front of 500,000 people at the Woodstock Festival, the 'rock opera' was born. In retrospect, it was the crowning achievement of a band who had already embraced pop art and the concept album; who had pioneered the power chord and the guitar smash; and who had embodied – more so than any of their peers – the guiding spirit of the age: war.

*Current State of Postural Research - Moving Beyond the Balance Platform* Emily Keshner, Joyce Fung, Tanvi Bhatt, 2024-02-05 The concept of posture control has morphed over the past century from a reflex, hierarchically controlled, innate behavior to a complex and adaptable motor act highly influenced by cognitive processes as well as confidence and attentiveness of the performer. In addition, multisensory control of posture has been recognized as a process of fusion and integration rather than summation and inhibition. Advances in computational modeling and imaging have revealed that higher cortical centers are involved in production of what were previously believed to be stereotypical, triggered reactions. Emerging evidence now supports the idea that postural behaviors are regulated by distributed control in the neuraxis and shaped by dynamic interactions of sensorimotor processes in a task- and context-dependent manner.

*Tipbook Keyboard and Digital Piano* Hugo Pinksterboer, 2009 (Book). The book helps keyboardists understand and appreciate their instruments without getting too technical. It includes chapters on auditioning keyboards and pianos, appreciating sound, connections, MIDI, maintenance, and much more. A glossary, an index, and the Tipbook Company's unique Tipcodes complete the book.

**Language in Time** Peter Auer, Elizabeth Couper-Kuhlen, Frank Muller, 1999-08-26 The authors here promote the reintroduction of temporality into the description and analysis of spoken interaction. They argue that spoken words are, in fact, temporal objects and that unless linguists consider how they are delivered within the context of time, they will not capture the full meaning of situated language use. Their approach is rigorously empirical, with analyses of English, German, and Italian rhythm, all grounded in sequences of actual talk-in-interaction.

*Interspecies Communication* Gavin Steingo, 2024 In *Interspecies Communication*, ethnomusicologist Gavin Steingo examines several significant cases of attempted communication beyond the human--several cases, that is, where the dualistic relationship of human to non-human is dramatically challenged. Analyzing scenarios including a small coastal community in South Africa where humans call to whales, a scientific laboratory in the Caribbean where humans tried to speak with dolphins, and a case of black performance art involving human-alien communication, Steingo charts various mechanisms that humans have devised to think about, and indeed to reach, beings very unlike ourselves. These speculative endeavors look--and listen--beyond what we are and what we know. The book focuses on the second half of the twentieth century, when Enlightenment conceptualizations of human and non-human were increasingly materialized. Following the Second World War, scientists embarked upon the deep exploration of oceans and cosmic

space--two realms previously inaccessible to the senses and to empirical investigation. As quintessential final frontiers, the outer space of the cosmos and the inner space of oceans were conceptualized as structurally isomorphic twins, subject to the same method of scrutiny. Interspecies Communication examines the way that globally circulating ideas are taken up by a range of different subject positions-including, and especially, peripheral subject positions in the global South--

Erik Satie: Music, Art and Literature Caroline Potter,2016-05-13 Erik Satie (1866-1925) was a quirky, innovative and enigmatic composer whose impact has spread far beyond the musical world. As an artist active in several spheres - from cabaret to religion, from calligraphy to poetry and playwriting - and collaborator with some of the leading avant-garde figures of the day, including Cocteau, Picasso, Diaghilev and René Clair, he was one of few genuinely cross-disciplinary composers. His artistic activity, during a tumultuous time in the Parisian art world, situates him in an especially exciting period, and his friendships with Debussy, Stravinsky and others place him at the centre of French musical life. He was a unique figure whose art is immediately recognisable, whatever the medium he employed. Erik Satie: Music, Art and Literature explores many aspects of Satie's creativity to give a full picture of this most multifaceted of composers. The focus is on Satie's philosophy and psychology revealed through his music; Satie's interest in and participation in artistic media other than music, and Satie's collaborations with other artists. This book is therefore essential reading for anyone interested in the French musical and cultural scene of the late nineteenth and early twentieth century.

Choral Monuments Dennis Shrock,2017 Choral Monuments provides extensive material about eleven epoch-making choral masterworks that span the history of Western culture. Included are: Missa Pange lingua (Josquin Desprez); Missa Papae Marcelli (G. P. da Palestrina); B Minor Mass (J. S. Bach); Messiah (G. F. Handel); The Creation (Joseph Haydn); Symphony #9 (Ludwig van Beethoven); St. Paul (Felix Mendelssohn); Ein deutsches Requiem (Johannes Brahms); Messa da Requiem (Giuseppe Verdi); Mass (Igor Stravinsky); and War Requiem (Benjamin Britten). The works are presented in separate chapters, with each chapter divided into three basic sections-history, analysis, and performance practice. Discussions of history are focused on relevancies-the genesis of the designated work in reference to the composer's total choral output, the work's place within the musical environment and social climate of its time, and essential features of the work that make it noteworthy. In addition, the compositional history addresses three other factors: the work's public reception and critical response, both at the time of its composition and in ensuing years; the history of score publications, detailing the various differences between editions; and the texts of the composition. The material regarding textual treatment, which often includes the complete texts of the works being discussed, concentrates on primary concerns of the text's

usage; also included in the discussion are noteworthy aspects of texts separate from the music as well as biographical details of librettists and poets, if appropriate. The analysis section of each chapter outlines and describes musical forms and other types of compositional organization, including parody technique, mirror structures, and motto repetitions, as well as salient compositional characteristics that directly relate and contribute to the work's artistic stature. Numerous charts and musical examples illustrate the discussions. The discussion of performance practices includes primary source quotations about a wide range of topics, from performing forces, tempo, and phrasing of each work to specific issues such as tactus, text underlay, musica ficta, metric accentuation, and ornamentation.
