Constructing the Uzbek State Marlene Laruelle, 2017-12-20 Over the past three decades, Uzbekistan has attracted the attention of the academic and policy communities because of its geostrategic importance, its critical role in shaping or unshaping Central Asia as a region, its economic and trade potential, and its demographic weight: every other Central Asian being Uzbek, Uzbekistan's political, social, and cultural evolutions largely exemplify the

transformations of the region as a whole. And yet, more than 25 years after the collapse of the Soviet Union, evaluating Uzbekistan's post-Soviet transformation remains complicated. Practitioners and scholars have seen access to sources, data, and fieldwork progressively restricted since the early 2000s. The death of President Islam Karimov, in power for a quarter of century, in late 2016, reopened the future of the country, offering it more room for evolution. To better grasp the challenges facing post-Karimov Uzbekistan, this volume reviews nearly three decades of independence. In the first part, it discusses the political construct of Uzbekistan under Karimov, based on the delineation between the state, the elite, and the people, and the tight links between politics and economy. The second section of the volume delves into the social and cultural changes related to labor migration and one specific trigger – the difficulties to reform agriculture. The third part explores the place of religion in Uzbekistan, both at the state level and in society, while the last part looks at the renegotiation of collective identities.

Understanding Russianness Risto Alapuro,Arto Mustajoki,Pekka Pesonen,2011-08-17

In today's world where other cultures are being tapped to a greater extent than ever before, the processes of mixing and matching are especially relevant in making sense of Russia. Not only do borrowing and assimilation, interaction between the familiar and the alien, constitute a venerable tradition in Russian culture, but during the two last post-Soviet decades a notable Western influence has become apparent. This book provides means for understanding Russianness in this new situation. By bringing together Russian and Western, eminent and younger scholars it provides insights both from inside and outside. By extending its perspectives to three fields – linguistics, cultural studies, and social sciences – it covers different dimensions of creative misunderstandings , hybrids, tensions and other modes of adaptation in the Russian culture. By offering concrete case studies it avoids easy stereotypes, deconstructs clichés, problematizes accepted truths, and identifies points of interaction between Russia and the West.

Digital Russia Michael Gorham,Ingunn Lunde,Martin Paulsen,2014-03-05 Digital Russia provides a comprehensive analysis of the ways in which new media technologies have shaped language and communication in contemporary Russia. It traces the development of the Russian-language internet, explores the evolution of web-based communication practices, showing how they have both shaped and been shaped by social, political, linguistic and literary realities, and examines online features and trends that are characteristic of, and in some cases specific to, the Russian-language internet.

The current position of Recruitment. The example of e-Recruitment Zhandos Amantayev, 2014-06-13 Seminar paper from the year 2013 in the subject Leadership and Human Resources - Miscellaneous, grade: 2,0, University of Applied Sciences Wildau, language: English, abstract: Initially, social networks designed to search for friends and acquaintances and communicate with them. The rapid development of the Internet in the world, on the one hand, the unstable situation in the labor market, on the other, first led to the emergence of professional social networks, and then to that of the

Web began to be used for business purposes. In the following paper we analyze the role of social networks in recruiting. The classification systems depending on the type of interpersonal relations, consider the advantages and disadvantages of the most popular and effective methods of recruitment will identify with their use. According to Linda Barber: “Internet has caused the biggest change in the set of the landscape, by acting as an intermediary between employers and job seekers. Technology has allowed corporate Web sites, suppliers, and job seekers to become more complex, interactive and connected globally 24 hours a day, 7 days a week”. “Every sector, every job, every function, was, is or will be disrupted by Internet” stated Kalika, M. in „Le management est mort, vive le e-management!“ in 2000. In obedience to Girard Aurélie and Bernard Fallery: “In the HR sector is undergoing a transformation. In August 2007, Monster France had more than 3 million resumes in its database and social network LinkedIn has been more than 36 million members around the world in February 2009”. Recruiting by the Internet, via Internet, or e-Recruitment, is a phenomenon that has led to the appearance of a new market in which there is an unprecedented level of interaction between employers and potential employees.
