Communities in Action National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Committee on Community-Based Solutions to Promote Health Equity in the United States,2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Earth's Appetite Margaret Hasse,2013 These poems reflect an astute awareness of associations across time. A beetle crossing a tennis court brings to mind an infant crawling across the floor one who's now asking for the keys to the family car. A jar of golden honey draws readers into the murmur of bees and the scent of basswood flowers. In *Earth's Appetite*, Hasse offers a lyrical paean to re-roofing a house and a humorous description of how a dog and its unemployed owner spend a day. Her extended ode to feet, twin girls dressed alike, possesses a Neruda-like simplicity and charm. The book shows Hasse's longstanding mastery of striking imagery. Rung by rung down the ladder of my backbone, she writes, and earth like a love tilts toward and away. The book as a whole reminds us of the quirky ways that lives unfold, strengthening or breaking connections, offering unexpected turns and recurrent, familiar themes.

The War Report Annyssa Bellal,2016-01-09 This annual report on armed conflicts around the world provides detailed information on each conflict which occurred in 2014. The report sets out the conflicts' classification, applicable norms, key actors, methods of warfare, and the number of casualties. It also analyses key legal issues that arose in the context of these armed conflicts.

The Senate Intelligence Committee Report on Torture (Academic Edition) Senate Select Committee On Intelligence, 2020-02-18 The study edition of book the Los Angeles Times called, The most extensive review of U.S. intelligence-gathering tactics in generations. This is the complete Executive Summary of the Senate Intelligence Committee's investigation into the CIA's interrogation and detention programs -- a.k.a., The Torture Report. Based on over six million pages of secret CIA documents, the report details a covert program of secret prisons, prisoner deaths, interrogation practices, and cooperation with other foreign and domestic agencies, as well as the CIA's efforts to hide the details of the program from the White House, the Department of Justice, the Congress, and the American people. Over five years in the making, it is presented here exactly as redacted and released by the United States government on December 9, 2014, with an introduction by Daniel J. Jones, who led the Senate investigation. This special edition includes: • Large, easy-to-read format. • Almost 3,000 notes formatted as footnotes, exactly as they appeared in the original report. This allows readers to see obscured or clarifying details as they read the main text. • An introduction by Senate staffer Daniel J. Jones who led the investigation and wrote the report for the Senate Intelligence Committee, and a forward by the head of that committee, Senator Dianne Feinstein.

Promoting Cardiovascular Health in the Developing World Institute of Medicine, Board on Global Health, Committee on Preventing the Global Epidemic of Cardiovascular Disease: Meeting the Challenges in Developing Countries, 2010-06-29 Cardiovascular disease (CVD), once thought to be confined primarily to industrialized nations, has emerged as a major health threat in developing countries. Cardiovascular disease now accounts for nearly 30 percent of deaths in low and middle income countries each year, and is accompanied by significant economic repercussions. Yet most governments, global health institutions, and development agencies have largely overlooked CVD as they have invested in health in developing countries. Recognizing the gap between the compelling evidence of the global CVD burden and the investment needed to prevent and control CVD, the National Heart, Lung, and Blood Institute (NHLBI) turned to the IOM for advice on how to catalyze change. In this report, the IOM recommends that the NHLBI, development agencies, nongovernmental organizations, and governments work toward two essential goals: creating environments that promote heart healthy lifestyle choices and help reduce the risk of chronic diseases, and building public health infrastructure and health systems with the capacity to implement programs that will effectively detect and reduce risk and manage CVD. To meet these goals, the IOM recommends several steps, including improving cooperation and collaboration; implementing effective and feasible strategies; and informing efforts through research and health surveillance. Without better efforts to promote cardiovascular health, global health as a whole will be undermined.

Sensory-Enhanced Yoga® for Self-regulation and Trauma Healing Carolyn Stoller, 2019-11-25 Lynn Stoller, OT, MS, OTR, C-IAYT, RYT500, E-RYT200 and outstanding expert contributors skilfully synthesize theoretical concepts and research findings from the fields of occupational therapy, trauma psychology, neuroscience, and traditional Eastern yogic philosophy to produce a Transdisciplinary Model for Post-Traumatic Growth for healing symptoms of combat stress, PTSD, or other unresolved trauma or anxiety disorders. The model is informed by the highly successful yoga treatment protocol used with U.S. military personnel deployed to Kirkuk, Iraq, which the author co-developed (Stoller et al, 2012) and by her experiences teaching yoga to veterans in her local community. Sensory-Enhanced Yoga (R) is designed to help meet the following goals: Decrease hypervigilance and overreaction to sensory input (e.g. visual, crowds, touch, noise, movement). Improve quality of sleep and energy level to support wellness and enhance daily productivity. Decrease intrusive thoughts by learning to become present through breath and body awareness. Enhance one's sense of self-worth and personal empowerment. Whether you are a therapist looking for effective treatment tools for your clients or are seeking healing for yourself, this insightful book will provide you with effective strategies to help promote peace of mind and full engagement in life. Climate Change and Indigenous Peoples in the United States Julie Koppel Maldonado,Benedict Colombi,Rajul Pandya,2014-04-05 With a long history and deep connection to the Earth's resources, indigenous peoples have an intimate understanding and ability to observe the impacts linked to climate change. Traditional ecological knowledge and tribal experience play a key role in developing future scientific solutions for adaptation to the impacts. The book explores climate-related issues for indigenous communities in the United States, including loss of traditional knowledge, forests and ecosystems, food security and traditional foods, as well as water, Arctic sea ice loss, permafrost thaw and relocation. The book also highlights how tribal communities and programs are responding to the changing environments. Fifty authors from tribal communities, academia, government agencies and NGOs contributed to the book. Previously published in Climatic Change, Volume 120, Issue 3, 2013.

Reading the Archive of Earth's Oxygenation Victor Melezhik,Anthony R. Prave,Eero J. Hanski,Anthony E. Fallick,Aivo Lepland,Lee R. Kump,Harald Strauss,2012-09-26 Earth's present-day environments are the outcome of a 4.5 billion year period of evolution reflecting the interaction of global-scale geological and biological processes. Punctuating that evolution were several extraordinary events and episodes that perturbed the entire Earth system and led to the creation of new environmental conditions, sometimes even to fundamental changes in how planet Earth operated. Volume 3: Global Events and the Fennoscandian Arctic Russia - Drilling Earth Project represents another kind of illustrated journey through the early Palaeoproterozoic, provided by syntheses, reviews and summaries of the current state of our understanding of a series of global events that resulted in a fundamental change of the Earth System from an anoxic to an oxic state. The book discusses traces of life, possible causes for the Huronian-age glaciations, addresses radical changes in carbon, sulphur and phosphorus cycles during the Palaeoproterozoic, and provides a comprehensive description and a rich photo-documentation of the early Palaeoproterozoic supergiant, petrified oil-field. Terrestrial environments are characterised through a critical review of available data on weathered and calichified surfaces and travertine deposits. Potential implementation of Ca, Mg, Sr, Fe, Mo, U and Re-Os isotope systems for deciphering Palaeoproterozoic seawater chemistry and a change in the redox-state of water and sedimentary columns are discussed. The volume considers in detail the definition of the oxic atmosphere, possible causes for the oxygen rise, and considers the oxidation of terrestrial environment not as a single event, but a slow-motion process lasting over hundreds of millions of years. Finally, the book provides a roadmap as to how the FAR-DEEP cores may facilitate future interesting science and provide a new foundation for education in earth-science community. Welcome to the illustrative journey through one of the most exciting periods of planet Earth!

2011 National Gang Threat Assessment Federal Bureau of Investigation,2012-01-01 Gangs continue to commit criminal activity, recruit new members in urban, suburban, and rural regions across the United States, and develop

criminal associations that expand their influence over criminal enterprises, particularly street-level drug sales. The most notable trends for 2011 have been the overall increase in gang membership, and the expansion of criminal street gangs' control of street-level drug sales and collaboration with rival gangs and other criminal organizations.
