**The Daunting Climate Change** Jayarama Reddy Puthalpet, 2022-03-24 The book starts with an overview of Climate Science. It discusses the signs of Warming, the impacts and consequences on several sectors - terrestrial and coastal ecosystems, water resources, ocean systems, agriculture, food production and food security, human health and safety, livelihoods and poverty, Arctic populations, low-lying States, so on. Mathematical models to project future climate and the resulting concerns, global adaptation experiences, and opportunities for future execution are explained. The mitigation approaches, chiefly decarbonizing the energy sector by developing and applying clean/low carbon energy sources and improving energy efficiency, and the evolving geoengineering schemes are dealt. Carbon pricing, an economic tool to ensure emissions reductions, and transition to a low carbon economy to stimulate sustainable growth are described. The continued global efforts under the UN or otherwise until the recent Paris Agreement to arrive at policy responses to tackle this intriguing but daunting problem of climate change are vividly expounded. Note: T&F does not sell or distribute the hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

**St. Philip's College** Marie Pannell Thurston, 2013-01-06 In 1898, St. Philip's Normal and Industrial School opened its doors in San Antonio, offering sewing classes for black girls. It was the inaugural effort in a program, founded by the West Texas diocese of the Episcopal Church, to educate and train former slaves and other African Americans in that city. Originally tied to St. Philip's Church, about three miles east of the downtown center, the school grew to offer high school and then junior college courses and eventually affiliated with the San Antonio Independent School District and San Antonio College. One of the few remaining historically black junior colleges in the country, St. Philip's, whose student body is no longer predominantly black, has also been designated a Hispanic-serving institution, one of few schools to bear both designations. Known by many as "the school that love built," St. Philip's College claimed in its 1932 catalog, "There is perhaps as much romance surrounding the development of St. Philip's Junior College as there is of the 'Alamo City' in which it is located." That love story, also containing dominant strains of sacrifice, scarcity, creativity, determination, and pride, finds its full expression in this history by Marie Pannell Thurston. Based on archival research and extensive interviews with

current and former alumni, faculty, and friends, St. Philip's College presents the heartwarming and inspiring record of a school, the community that nurtures it, and the collective pride in what the institution and its graduates have accomplished.

**The City That Ate Itself** Brian James Leech, 2018-02-28 Winner of the Mining History Association Clark Spence Award for the Best Book in Mining History, 2017-2018 Brian James Leech provides a social and environmental history of Butte, Montana's Berkeley Pit, an open-pit mine which operated from 1955 to 1982. Using oral history interviews and archival finds, *The City That Ate Itself* explores the lived experience of open-pit copper mining at Butte's infamous Berkeley Pit. Because an open-pit mine has to expand outward in order for workers to extract ore, its effects dramatically changed the lives of workers and residents. Although the Berkeley Pit gave consumers easier access to copper, its impact on workers and community members was more mixed, if not detrimental. The pit's creeping boundaries became even more of a problem. As open-pit mining nibbled away at ethnic communities, neighbors faced new industrial hazards, widespread relocation, and disrupted social ties. Residents variously responded to the pit with celebration, protest,

negotiation, and resignation. Even after its closure, the pit still looms over Butte. Now a large toxic lake at the center of a federal environmental cleanup, the Berkeley Pit continues to affect Butte's search for a postindustrial future.

Health, Experienced Support and School Performance among Children in Out-of-home care Rikard Tordön, 2020-05-06 Children in out-of-home care (OHC) have higher risks for developing poorer health and school achievement, being subjected to more abuse experiences, as well as negative long-term outcomes related to occupational performance, socioeconomic status, addiction, and criminality. Research related to OHC children is fragmented and the effects of interventions are under-studied. This thesis aimed to explore health, abuse, support, and preconditions for school among children in OHC and to assess changes after an intervention targeting foster children's school performance. Paper I compared OHC pupils in last year high school to non-OHC peers in a national survey with 5 839 pupils. The study showed that risks of abuse and poor mental health are evident for adolescents in out-of-home care. Also, results indicated a lower disclosure rate of sexual abuse, particularly to police or social services. Paper II compared OHC pupils to peers in birth parent care by analyzing responses in four consecutive year surveys in a regional sample comprising 23 798 pupils in 8th-year compulsory and 2nd-year high school. Responses from the 311 pupils in OHC showed poorer outcomes than did birth-parent care peers in perceived satisfaction with social life and

relations, trust to other persons in different relations, abuse experiences online, and sense of security in the school and at home. These results also applied when compared to a subset of pupils living with a single birth parent. Paper III analyzed prospective test and questionnaire data of intelligence, adaptive behavior, mathematics, literacy skills, and psychosocial wellbeing from 856 children in foster care. Results revealed poorer preconditions for school performance of between 0.5 and 1.0 standard deviations below age-standardized norms. The analysis also provided results regarding different intelligence domains, where working memory showed the lowest scores while perceptual functioning were close to norms. Boys generally scored poorer than girls except in mathematics. Paper IV explored the effects of a school-based intervention, Skolfam, on a subset of Paper III cohort (n= 475). Results showed improved skills in higher-order cognitive executive functions such as reading comprehension, sentence chains, mathematics, and intelligence. For less complex cognitive functions, affective functioning or psychosocial symptoms, no improvements were seen, except for reduced hyperactivity. Conclusion: The studies confirm that children in OHC have poorer mental health, are less satisfied with social life, have more adverse experiences both online and in real life and have poorer preconditions for school performance than do non-OHC peers. Importantly, Skolfam intervention can partially enhance preconditions for school performance. Further studies on longitudinal risk, with a design to

identify specific protective factors, development of school-related competencies and ways to support OHC children in school are needed. Barn i social heldygnsvård har som grupp högre risker för att utveckla sämre hälsa och skolresultat, vara mer utsatta för övergrepp samt ha sämre långtidsutsikter relaterat till arbetsmarknad, socioekonomisk status, drogberoende och kriminalitet. Forskning om barn i social heldygnsvård är ofta fragmenterad och effekter av olika interventioner är sparsamt utvärderade. Syftet med avhandlingen var att utforska hälsa, stöd, övergrepp och förutsättningar för skola för barn i social heldygnsvård, samt att bedöma hur förutsättningar för skolprestation förändras genom en intervention som inriktas mot skolresultat för barn i familjehem. Artikel I jämförde samhällsvårdade studenter i tredje året på gymnasiet med icke samhällsvårdade jämnåriga studenter. 5 839 elever besvarade en nationell enkät. Resultatet visade att risker för övergrepp och sämre psykisk hälsa var mer frekvent för ungdomar i samhällsvård. Dessutom var andelen som berättar om övergrepp lägre bland de samhällsvårdade ungdomarna, i synnerhet till polis och socialtjänst. Artikel II jämförde samhällsvårdade elever med jämnåriga som bor med föräldrar, genom att analysera svaren från fyra på varandra följande års enkäter i ett regionalt urval som omfattade 23 798 elever från grundskolans åttonde och gymnasieskolans andra år. Svaren från de 311 eleverna i samhällsvård visade sämre utfall än icke samhällsvårdade i upplevd tillfredsställelse med socialt liv och relationer, tillit till andra personer

i olika relationer, erfarenhet av nätövergrypp, samt upplevd säkerhet såväl i skolan som i hemmet, även i jämförelse med en undergrupp av studenter som bor med bara en förälder. Artikel III analyserade test- och formulärdata av intelligens, adaptivt beteende, matematik, läsfärdigheter och psykosocialt mående av 856 barn i familjehem. Resultaten visade sämre förutsättningar för skolprestation mellan 0.5 och 1.0 standardavvikelser under åldersstandardiserade normer. I analysen från olika domäner av intelligens, visade arbetsminne de lägsta resultaten, medan perceptuell funktion visade sig ligga nära medelvärdet från normeringsstudier. Pojkar hade generellt lägre poäng än flickor, förutom i matematik. Artikel IV undersökte effekter av en skolbaserad intervention, från ett antal elever från Skolfam kohorten (n = 475). Resultaten visade förbättrade färdigheter i högre exekutiva funktioner som läsförståelse, meningskedjor, matematik, samt intelligens efter intervention. För mindre komplexa kognitiva funktioner, affektiv funktion eller psykosomatiska symptom noterades inga förändringar, med undantag för lägre hyperaktivitet. Slutsatserna från dessa studier bekräftar bilden av att barn i samhällsvård har sämre psykisk hälsa, är mindre tillfreds med sitt sociala liv, har mer erfarenheter av övergrepp såväl på nätet som i verkliga livet och har sämre förutsättningar för skolresultat än sina icke samhällsvårdade jämnåriga. Ett viktigt bidrag är att interventionen Skolfam till del kan stärka förutsättningar för bättre skolprestation. Fortsatta studier av longitudinella risker, med möjlighet att identifiera

specifika skyddsfaktorer, modeller för att utveckla skolrelaterade kompetenser och sätt att ytterligare stödja barn i samhällsvård behövs.

Dynamics of an Authoritarian System Mária Csanádi, Márton Gerő, Miklós Hajdu, Imre Kovách, István János Tóth, Mihály Laki, 2022-07-12 This conceptually synthetic and empirically rich book demonstrates the vulnerability of democratic settings to authoritarianism and populism. Six scholars from various professional fields explore here the metamorphosis of a political party into a centralized authoritarian system. Viktor Orbán and his Fidesz party needed less than ten years to accomplish this transformation in Hungary. In 2010, after winning a majority that could make changes in the constitution – two-thirds of the parliamentary seats, they evolved and stabilized the system, which produced again the two-thirds majority in 2014 and 2018. The authors reveal how a democratic setting can be used as a device for political capture. They show how a political entity managed to penetrate almost all sub-fields of the economy to arrive at institutionalized

corruption, and how the centralized power structure reproduces itself. With the help of a powerful empirical apparatus—among others analyses of more than 220,000 public tenders, redistributions of state subsidies, and the interconnectedness of those privileged with the political elite – the authors detail the functioning of a crony system and the network aspects of political connections in the rapid enrichment of politically-linked businesses. Their studies demonstrate the role of political capture in this redistribution and how this capture leads to a new social stratification.

**How to Swap Ford Modular Engines into Mustangs, Torinos and More** Dave Stribling, 2017-03-15 The Ford modular engine is a popular swap for 1964-1/2-1973 Mustangs, Fox-Body Mustangs, trucks, hot rods, and other muscle cars because these high-tech engines provide exceptional performance and improved economy compared to their dated counterparts. Found in Mustangs and other Fords since the 1990s, installing a modular motor in a classic Ford infuses new technology and all the benefits that come with it into a classic car. Modular engines feature an overhead cam design that has massive horsepower potential, and are offered in 4.6-, 5.0-, 5.2- 5.4-, and 5.8-liter iterations. These high-tech 2-, 3-, and 4-valve engines are readily available as a crate engine, from salvage yards, and in running cars. This engine design has a large physical footprint, and swapping the engine requires a thorough plan, using the proper tools and facilities. Author Dave Stribling specializes in modular engine swaps, and expertly guides you through each crucial step of the engine transplant process. Because of the large physical size, many components, such as brake boosters, steering rods and boxes, and other underhood components, may need repositioning or modification to co-

exist in the engine bay. Stribling covers motor-mount selection and fabrication, suspension and chassis modifications, aftermarket suspension options, firewall and transmission tunnel modifications, engine management and wiring procedures, fuel systems, exhaust systems, electrical mods and upgrades, and much more. Many older Ford muscle and performance cars are prime candidates for a modular swap; however, shock towers protrude into the engine bay of these cars, so modifications are necessary to fit the engine into the car, which is also covered here. Swapping the engine and transmission into a muscle car or truck requires specialized processes, and this insightful, explanatory, and detailed instruction is found only in this book. If you are considering swapping one of these high-tech engines into a non-original chassis, this book is a vital component to the process. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

**Occupational Therapies Without Borders E-Book** Dikaïos Sakellariou,Nick Pollard,2016-09-23 The new edition of this landmark international work builds on the previous two volumes, offering a window onto occupational therapy practice, theory and ideas in different cultures and geographies. It emphasizes the importance of critically deconstructing and engaging with the broader context of occupation, particularly around how occupational

injustices are shaped through political, economic and historical factors. Centering on the wider social and political aspects of occupation and occupation-based practices, this textbook aims to inspire occupational therapy students and practitioners to include transformational elements into their practice. It also illustrates how occupational therapists from all over the world can affect positive changes by engaging with political and historical contexts. Divided into six sections, the new edition begins by analyzing the key concepts outlined throughout, along with an overview on the importance and practicalities of monitoring and evaluation in community projects. Section Two explores occupation and justice emphasizing that issues of occupational injustice are present everywhere, in different forms: from clinical settings to community-based rehabilitation. Section Three covers the enactment of different Occupational Therapies with a focus on the multiplicity of occupational therapy from the intimately personal to the broadly political. Section Four engages with the broader context of occupational therapy from the political to the financial. The chapters in this section highlight the recent financial crisis and the impact it has had on people's everyday life. Section Five collects a range of different approaches to working to enable a notion of occupational justice. Featuring chapters from across the globe, Section Six concludes by highlighting the importance and diversity of educational practices. ### **New Advances in Electrocochleography for Clinical and Basic Investigation**

Jeffery T. Lichtenhan, Martin Pienkowski, Oliver F. Adunka, 2018-07-09

Electrocochleography (ECoChG) is an approach for objective measurements of physiologic responses from the inner ear. Measurements have classically been made from electrodes placed in the outer ear canal, on the tympanic membrane, the round window niche, or inside the cochlea. Recent innovations have led to ECoChG being used for exciting new purposes that drive clinical practice and contribute to the basic understanding of inner ear physiology. Cochlear implant recording electrodes can monitor the preservation of residual, low-frequency acoustic hearing, both in the operating room and post-operatively. ECoChG measurements can quantify differential effects of inner ear surgery or other manipulations on vestibular and auditory physiology simultaneously. Various attributes of cognitive neuroscience can be addressed with ECoChG

measurements from the auditory periphery. These advances in ECoG provide a way to understand a variety of inner ear diseases and are likely to be of value to many groups in their own clinical and basic research.
