Oil Titans Valerie Marcel,2007-05-01 Ninety percent of the world's oil reserves are entrusted to state-owned companies. Originally created as political instruments, these so-called national oil companies (NOCs) face new demands amid today's dwindling oil reserves and simmering social pressures. Increasingly, state-owned oil firms—particularly in the Middle East—are having to balance the political demands of their governments with the need to be commercially competitive. In this ground-breaking new volume, Valerie Marcel draws on unprecedented access to the politicians, engineers; and businessmen directing five Middle Eastern state oil companies to shed light on one of the most secretive segments of the international oil industry. The author tells the stories of Saudi Aramco, Kuwait Petroleum Corp., the National Iranian Oil Co., Sonatrach of Algeria, and the Abu Dhabi National Oil Co.—oil titans which together produce one quarter of the world's oil and hold half of the world's known oil and gas reserves. Dr. Marcel explains the complex bond between each state and its oil company, tracing the relationship's evolution from the politically charged days of foreign concessions to today's world of profit-driven decisionmaking. Drawn from over 120 interviews with company executives, middle managers, and oil-ministry officials, the author identifies a number of surprising new trends in these companies' strategy, and she paints a picture of their nascent sense of corporate identity. The book provides rare, up-to-date insight into how state-owned companies are striking a balance between their national mission and their commercial needs. The book also provides an insider's guide to these companies' unique culture. Executives and researchers in the region—both inside and outside the oil industry—will find it a valuable tool for understanding business in the Middle East.

Oil and Gas - India, the Middle East and Beyond Pradeep Kumar Sahoo,2015-11-24 Oil and Gas Sector is a world of its own that has a deep impact on almost every part of regions and religions, which can be supported by the Modern Middle East Crisis. Even one can think of oil politics and can be realized that oil politics is above geopolitics and this is at the cost of civil wars. Because of this, developing country like India has lost her sleep during critical conditions as India has to bear the cost of Oil Supply Interruption and Oil price inflation. Keeping the above thoughts in mind, the proposed book entitled Oil & Gas India, the Middle East and Beyond aims to be a step forward for getting an insight into the historic crude oil import trend in Indian context, and how Crude oil import bill is majorly rewarded to Middle East.

Middle East and North Africa Unrest Michael Ratner,2011-05 Political unrest in the Middle East and North Africa (MENA) has contributed to higher oil prices and added instability to energy markets. Supply disruptions and fears about the possible spread of unrest to major exporters have pushed prices higher. Even if the crisis abates, some risk premium may persist to the degree that market participants fear such an event could occur again. Contents of this report: (1) Introduction; (2) Short-Term Pricing Pressures: Unrest Contributes to Higher Oil Prices; Impacts on the U.S. Oil Market; U.S. Natural Gas More Insulated from MENA Turmoil; (3) Long-Term Considerations: Risks May

Persist; (4) Policy Considerations; Strategic Petroleum Reserve; Other Policy Options. Charts and tables. This is a print on demand report.

The Changing Dynamics of Energy in the Middle East Khalid Al-Rodhan, Anthony H. Cordesman, 2006-10-30 The recent rise in global demand for energy and the resulting spike in energy prices have illustrated just how important Middle Eastern energy exports are. This book, the first on the subject since the hike in energy prices impacted the global energy market, outlines the current facts that shape the ability of Middle Eastern producers to supply energy exports. It explores the possible future causes both of major interruptions in supply, and of failures to maintain and expand export capacity, and, though it does not predict a major energy crisis, it does describe a range of factors that could produce one. The recent rise in global demand for energy and the resulting spike in energy prices have illustrated just how important Middle Eastern energy exports are. This book, the first on the subject since the hike in energy prices impacted the global energy market, outlines current facts that shape the ability of Middle Eastern producers to supply energy exports. It explores the possible future causes both of major interruptions in supply, and failures to maintain and expand export capacity, and, though it does not predict a major energy crisis, it does describe factors that could produce one. Authors Cordesman and Al-Rodhan analyze the plans of each country in the region, compare those plans with the forecasting models of international organizations, and study each country's prospects for stability. They also analyze how importing countries such as the United States, Europe, China, and India are dealing with the changing nature of global dependence upon MENA oil. Offering the most comprehensive data on current energy resources, production capacities estimates, import dependence, and national plans and strategies, *The Changing Dynamics of Energy in the Middle East* analyzes current energy modeling, and shows how the lack of supply-driven models has had a negative impact on the understanding of policy makers and strategic thinkers. The book concludes its analysis with possible strategic, economic, and demographic scenarios for the Middle East, projecting the impact of each scenario on future energy developments.

The Middle East and North Africa in a Changing Oil Market Mr. Bright E. Okogu, 2003-09-05 The world oil market has undergone a series of changes that have reduced the share of oil in the global energy balance and, with it, the influence of Middle Eastern oil exporters. In spite of oil's loss of ground, however, Middle Eastern countries remain at the center of world oil developments. This paper focuses on the developments in the international oil market, the role of Middle Eastern countries therein, and the policy challenges arising from the dependency on oil.

The Gulf Oil and Gas Sector The Emirates Center for Strategic Studies and Research, 2006-04-11 The predominance of oil as the world's main source of energy, coupled with the recent phenomenal growth of the natural gas industry spurred by environmental considerations, ensure that the Gulf's energy sector will continue to play a pivotal role in the global market. With world demand projected to reach unprecedented levels led by Asian economic powers such as China and India, oil production peaking in key areas and geopolitical crises fueling greater uncertainty, issues of global supply security have come to the fore. All these factors have led to a steep rise in petroleum prices, filling the coffers of the oil producers but threatening to paralyze the global economy and imposing a heavy burden on the ultimate consumers. In this energy scenario, where does the Gulf oil and gas sector stand? How can it meet its long-term strategic requirements while satisfying the energy needs of the global economy? This was the main focus of the ECSSR Tenth Annual Energy Conference on *The Gulf Oil and Gas Sector: Potential and Constraints*, held in Abu Dhabi, from September 26-27, 2004. The conference presentations of the energy experts compiled in this book examine both the possibilities and the problems of the Gulf energy sector in the wider

global context. Important energy issues covered include the future prospects of OPEC, the impact of world oil prices on global growth, the strategic objectives of the Gulf energy sector, the influence of markets and technology on regional reserves, the emerging partnerships between national and international oil companies, the imperatives for attracting Gulf energy investment and new developments in gas technology and regional gas trade. Regional case studies outline possible scenarios for the future of Iraqi oil, highlight policy options for Saudi Arabia as a swing producer and focus on the Norwegian experience of economic diversification.

Middle East Oil Benjamin Shwadran,1977-01-01 Shaped by the emotional climate of the ongoing Arab-Israeli conflict, the controversies between the oil-producing and oil-consuming nations are of major international concern. Shwadran outlines the progressive rise in the power of the oil-producing countries and the decline in the control exercised by the concessionary foreign countries that has culminated in the almost total nationalization of the foreign oil companies. Because of the highly charged atmosphere surrounding the issues and their grave importance on world politics, the problems are, at once, highly difficult to encompass and enormously important to understand. Through a myriad of facts and figures the author sees the underlying patterns with precision. Often narrowly viewed as having only two sides âthat of oil producers and consumersâthe situation is reflected in this book in all its facets. Seen in this totality of conflicting needs, desires, abilities, and objectives, the Middle East oil crisis takes on the contradictory and explosive nature which has affected us all. *Middle East Oil*, born of the author's years of scholarship and exposure in the field, describes the problems of the past but, more important, it gives insight into how the problem will manifest itself in the future, and provides a direction for efforts toward a final resolution. Contents: Introduction / From the Six Day War to the End of 1970 / From the Teheran 1971 Agreement to the October 1973 War / The Producers Develop the Oil Industry / The Transporters / Nationalization and Participation / The Arab Oil Embargo / The Efforts of the Consuming Countries / Surpluses and Recycling / Solutions / Bibliography

The Middle East, Oil And The Great Powers Benjamin Shwadran,1985-09-03

Energy Developments in the Middle East Anthony H. Cordesman,2004-09-30 The Middle Eastern and North African region (MENA) dominates world energy exports today and will likely do so for decades to come, even if world consumers make steady progress in conservation, renewable energy sources, and increases from gas, coal, and nuclear power. The MENA region, however, has been the scene of both internal crises and external conflicts. On several occasions, these crises have affected either the flow of MENA energy exports or the development of energy production and export capacity. The politics, economics, and social dynamics that shape threats to regional stability are complex. Cordesman details the factors behind these diverse forces and outlines current supply levels and future trends, taking each of these variables into consideration. The MENA area includes at least 22 states, with a combined population of nearly 300 million, each with different political, economic, demographic, and security conditions and needs. It is divided into at least four sub-regions including the Maghreb (Mauritania, Morocco, Algeria, Libya, and Tunisia); the Levant and the Arab-Israeli confrontation states (Egypt, Israel, Jordan, Lebanon, and Syria); the Gulf (Iran, Iraq, Kuwait, Bahrain, Qatar, Saudi Arabia, the UAE, and Oman); and the Red Sea states (Yemen, the Sudan, and Somalia). This important guide outlines the forces affecting each sub-

region, including supply, demand, and financing, and forecasts the likely impact that different scenarios would have on energy resources under varying world conditions.
