

Older Workers

**Harold L. Sheppard, United States. Employment and Training
Administration**

Older Workers Sara E. Rix,1990 The book provides practical, useful information and advice for older adults who are either staying in or returning to the work force.

New Opportunities for Older Workers ,2000-08 What role should older workers play in our future work force, when the retirement of the baby boomers, starting about 2010, will make tight labor markets commonplace. This unprecedented demographic shift calls for a fundamental rethinking about the work force of the future. Employer attitudes and policies must change if older workers are to remain in the work force longer. This report recommends a pro-work agenda for employers, policymakers, and older workers in 6 areas: getting the financial incentives right; replacing stereotypes about older workers; the training imperative; rethinking the org. of work; getting older workers into new jobs: and a strong and flexible safety net.

Managing the Older Worker Peter Cappelli,Bill Novelli,2010-08-17 Your organization needs older workers more than ever: They transfer knowledge between generations, transmit your company's values to new hires, make excellent mentors for younger employees, and provide a just in time workforce for special projects. Yet more of these workers are reporting to people younger than they are. This presents unfamiliar challenges that-if ignored--can prevent you from attracting, retaining, and engaging older employees. In *Managing the Older Worker*, Peter Cappelli and William Novelli explain how companies and younger managers can maximize the value provided by older workers. The key? Recognize that boomers' needs differ from younger generations - and adapt your management practices accordingly. For instance:

- Lead with mission: As employees age,

they become more altruistic. Emphasize the positive impact of older workers' efforts on the world around them. · Forge social connections: Many older employees keep working to maintain social relationships. Offer tasks that require interaction with others. · Provide different benefits: Tailor benefits--such as elder-care insurance programs or discount medication--to older workers' interests. Drawing on research in management, psychology, and other disciplines, *Managing the Older Worker* reveals who your older workers are, what they want, and how to manage them for maximum value.

Health and Safety Needs of Older Workers Institute of Medicine, National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Health and Safety Needs of Older Workers, 2004-03-26 Mirroring a worldwide phenomenon in industrialized nations, the U.S. is experiencing a change in its demographic structure known as population aging. Concern about the aging population tends to focus on the adequacy of Medicare and Social Security, retirement of older Americans, and the need to identify policies, programs, and strategies that address the health and safety needs of older workers. Older workers differ from their younger counterparts in a variety of physical, psychological, and social factors. Evaluating the extent, causes, and effects of these factors and improving the research and data systems necessary to address the health and safety needs of older workers may significantly impact both their ability to remain in the workforce and their well being in retirement. *Health and Safety Needs of Older Workers* provides an image of what is currently known about the health and safety needs of older workers and the research needed to encourage social policies that guarantee older workers a meaningful

share of the nation's work opportunities.

Employment-related Problems of Older Workers Harold L. Sheppard, United States. Employment and Training Administration, 1979

Bridges to Retirement Peter B. Doeringer, 1990 Examines trends and patterns in the market for older workers, including women and minorities, and developments in the workplace that affect their employment prospects. The contributors examine the ways nonbureaucratic firms are attracting older workers, and explore alternatives companies and unions can develop to accommodate this growing segment of the population.
