om love George Minot, 2012-08-14 From George Minot, author of *The Blue Bowl* ("Inexpressibly moving. It's thrilling to find a writer this good."—Amy Hempel), a new novel, moving, sensual, athletic (and aesthetic), set in the downtown New York yoga world at the turn of the millennium, a love story about a once-trendy artist who's lost his bearings and finds his life reinvigorated by his new yoga practice—and a certain barefooted yoga teacher. To Billy, who used to show in the hot new galleries in the East Village of the '80s and early '90s, his downhill progression is what he calls "the vague decline." But life feels exquisitely transformed by his new daily yoga practice ("a little hothouse sanctuary in the big city") clearing the way; creating insight, flexibility, clarity; breathing; sweating; variations of vulnerability, arched open emotion. Billy is also enraptured by his new yoga crush. Soon he and Amanda, a yoga teacher (her "poses are pure," "flexible and solid," "gliding easily in her element"), are in love and are caught up in the newness and wonder of their happiness. They are inseparable—their practice is transformative; they can't tell where one ends and the other begins, and they are transported into a dream world of their own . . . Until a devastating diagnosis blindsides Amanda, and she begins to recede from Billy's life. As he feels the thousand threads between them splitting apart and is helpless to stop it, he is forced to turn inward to his art and to his yoga practice to reconcile, with grace and love, his loss, his heart, and mend the abiding wound that he comes to realize was there long before Amanda seemingly completed his soul. Moving, inspiring, transporting, a romantic novel of yoga, inner mystery, and surrender.

Offering an authoritative multidisciplinary summary of the opportunities and challenges associated with bioenergy utilization, with international researchers give up-to-date and detailed information on key issues for biomass production and conversion to energy. Key features: *Discusses different bioenergy uses such as transportation fuels, electricity and heat production. *Assesses emerging fields such as bio-based chemicals and bio-refineries. *Debates conditions for the mobilization of sustainable bioenergy supply chains and outlines governance systems to support this mobilization. *Dedicated chapters to sustainability governance and emerging tools such as certification systems and standards supporting growth of a sustainable bioenergy industry. *Considers the political, environmental, social and cultural context related to the demand for energy resources, the impact of this demand on the world around us, and the choices and behaviours of consumers. This book will be a vital reference to engineers, researchers and students that need an accessible overview of the bioenergy area. It will also be of high value for politicians, policymakers and industry leaders that need to stay up to date with the state-of-the-art science and technology in this area.

Crisis in the Nordic Nations and Beyond Kristín Loftsdóttir, Lars Jensen, 2016-04-22 With discourses of 'crisis' and 'disaster' featuring strongly in contemporary discourses on contemporary society, this book brings together critical perspectives from across the humanities and social sciences to explore the idea of 'crisis' as inherently related to power dynamics and the formation of different subjectivities and identities within the Nordic countries and globally. This volume emphasizes the importance of investigating the interrelationship of three crises - social, economic and environmental - as these address the interlinked surfaces of the same reality, and it examines the negative connotations of the notion of crisis, whilst also raising the question of when and why something becomes identified as crisis, and for whom. With chapters on media representations of crisis and the global context of crisis discourses, the crisis of national identities and their mobilization in response, and environmental crisis, as well as the interrelationship between the social and the environmental

and the different positioning of individuals in relation to power, this volume offers an understanding of crisis as a multivocal symbol of the present. As such, it will appeal to scholars of sociology, anthropology, history, cultural studies, literature and political science.

Nordic Agriculture Air and Climate Jacob Sørensen, Stein Brubæk, Bente Hesselund Andersen, Anne Antman, Jenny Teerikangas, Miriam Markus-Johansson, Kajsa Lindqvist, 2015 This report constitutes the main outputs of the project Pathways to a Nordic food system that contributes to reduced emissions of greenhouse gases and air pollutants. The overall goals are to present the baseline data regarding the Nordic agricultural sector, its greenhouse gas and ammonia emissions, the regulatory framework and support systems, and conflicts of interest. The report aims to describe pathways to a Nordic food system that contributes to achieving the climate target of below 2 (or 1.5) degrees of warming and the air pollution target of zero exceedance of critical loads and critical levels regarding ammonia emissions. The Nordic region has diverse geological and climatic conditions that make certain types of agricultural production more vulnerable than others. The policy recommendations aim to serve as input to different policies at EU, Nordic and national level.

Applications of Cuckoo Search Algorithm and its Variants Nilanjan Dey, 2020-06-23 This book highlights the basic concepts of the CS algorithm and its variants, and their use in solving diverse optimization problems in medical and engineering applications. Evolutionary-based meta-heuristic approaches are increasingly being applied to solve complicated optimization problems in several real-world applications. One of the most successful optimization algorithms is the Cuckoo search (CS), which has become an active research area to solve N-dimensional and linear/nonlinear optimization problems using simple mathematical processes. CS has attracted the attention of various researchers, resulting in the emergence of numerous variants of the basic CS with enhanced performance since 2019.

Routledge Handbook of Urban Planning in Africa Carlos Nunes Silva, 2019-10-28 This handbook contributes with new evidence and new insights to the on-going debate on the de-colonization of knowledge on urban planning in Africa. African cities grew rapidly since the mid-20th century, in part due to rising rural migration and rapid internal demographic growth that followed the independence in most African countries. This rapid urbanization is commonly seen as a primary cause of the current urban management challenges with which African cities are confronted. This importance given to rapid urbanization prevented the due consideration of other dimensions of the current urban problems, challenges and changes in African cities. The contributions to this handbook explore these other dimensions, looking in particular to the nature and capacity of local self-government and to the role of urban governance and urban planning in the poor urban conditions found in most African cities. It deals with current and contemporary urban challenges and urban policy responses, but also offers an historical overview of local governance and urban policies during the colonial period in the late 19th and 20th centuries, offering ample evidence of common features, and divergent features as well, on a number of facets, from intra-urban racial segregation solutions to the relationships between the colonial power and the natives, to the assimilation policy, as practiced by the French and Portuguese and the Indirect Rule put in place by Britain in some or in part of its colonies. Using innovative approaches to the challenges confronting the governance of African cities, this handbook is an essential read for students and scholars of Urban Africa, urban planning in Africa and African Development.

The Dynamics of a Terrorist Targeting Process Cato Hemmingby, Tore Bjørge, 2015-10-22 This book provides an in-depth analysis of probably the most horrific solo terrorist operation the world has ever seen. On 22 July 2011 Anders Behring Breivik killed 77 people when he bombed the Government District in Oslo, before he conducted a shooting attack against a political youth camp at Utøya. The main focus of the book is on the operational aspects of the events, particularly the target selection and decision-making process. Why did Breivik choose the targets he finally attacked, what influenced his decision-making and how did he do it? Using unique source material, providing details never published before, the authors accurately explain how even this ruthless terrorist acted under a number of constraints in a profoundly dynamic process. This momentous work is a must read for scholars, students and practitioners within law enforcement, intelligence, security and terrorism studies.

Hybrid Organic-Inorganic Interfaces Marie Helene Delville, Andreas Taubert, 2017-12-04 Hybrid organic-inorganic materials and the rational design of their interfaces open up the access to a wide spectrum of functionalities not achievable with traditional concepts of materials science. This innovative class of materials has a major impact in many application domains such as optics, electronics, mechanics, energy storage and conversion, protective coatings, catalysis, sensing and nanomedicine. The properties of these materials do not only depend on the chemical structure, and the mutual interaction between their nano-scale building blocks, but are also strongly influenced by the interfaces they share. This handbook focuses on the most recent investigations concerning the design, control, and dynamics of hybrid organic-inorganic interfaces, covering: (i) characterization methods of interfaces, (ii) innovative computational approaches and simulation of interaction processes, (iii) in-situ studies of dynamic aspects controlling the formation of these interfaces, and (iv) the role of the interface for process optimization, devices, and applications in such areas as optics, electronics, energy and medicine.

The OM Guy Steven Needler, 2023-05-03 What are The Om? Why are they Uncreated? How can they operate outside of the structure of the Multiverse? Why are they not involved in the evolutionary cycle? In The Om - The Uncreated Creations, the reader will gain an understanding of what these rare entities are, their interaction with The Origin and The Source, and why they are considered to be Uncreated. In direct dialogue with The Om, the Author describes: How The OM became uncreated,

their structure and their variants, including New Om! What random sentence is. The gaps in The Origin's structure and what The Origin is doing to fill these gaps. What constitutes a Universal Computer. How machine sentence is generated. How to take evolutionary short cuts by increasing evolutionary content via parallel existence. Quantum latency and quantum fluidity and its functionality. Why mathematics will never be able to explain the physical universe. The role of Event Space in the uncreativity of The Om. That singular dominant sentence is the inevitable outcome – Or is it!

Om Canada Valery Petrich, 2020-03-23 OM Canada: An Intimate Glimpse at Yoga's Firsts is a celebration of yoga's history in Canada. Here are profiles of sixty of the country's yoga innovators-the firsts to set up a practice in their area, -start a provincial association, launch a TV show, write a book, build an ashram, open a studio, etc. These are the passionate souls who ushered in the practice of yoga in a post-war era, when contemporaries still perceived them as loners and loons. Scattered across Canada, these yoga pioneers forged their practices for personal healing and spiritual fulfilment based on conviction and despite lasting skepticism. Their efforts ushered in an age of spiritual curiosity that set the stage for yoga and meditation's acceptance as the bona fide spiritual practices and healing modalities we know today.
