Decision Sciences and Technology for Globalisation (ISDSI 2008) B.S. Sahaye, Jeet N.D. Gupta, Surinder Batra, Sanjay Kumar, Sushil Kumar, 2008-11-05 It is not uncommon to find books and other publications in the literature dealing individually with the subjects of 'decision sciences', 'technology' and 'globalisation'. However, there are very few instances of books which integrate these three dimensions in an umbrella framework. This publication is one such attempt. This book comprises of 58 papers contributed by leading academia from universities and management institutes in India and abroad. Many of the contributions have come from USA, Canada, UK, Japan, Australia, New Zealand, UAE, Bahrain, Taiwan, Brazil and Mexico, adding to the rich diversity of the thought processes explored in the papers. Some of these papers are country-specific, while some others provide a transnational perspective. Also, while some papers provide enriched conceptual frameworks in specific disciplines, building upon existing frameworks, several other papers provide application-oriented coverage, focused at select organizations or industries, further adding unique value to this book. There are eight sections in the book, namely: Supply Chain Management Operations Management Information Systems & ICT IT & E-Business Strategies Business Modeling Global Business: Issues & Challenges Marketing and Globalisation New Paradigms in Education and Globalisation The issues touched upon by various papers within each section are diverse and yet highly relevant and contemporary. We believe this book would be useful not only to academia, research scholars and students of various disciplines of management, but also to those in the industry in India and abroad, who are seeking conceptual inputs and experience sharing in their respective positions.

Halal Logistics and Supply Chain Management Nor Aida Abdul Rahman, Azizul Hassan, Hajjah Zawiah Abdul Majid, 2022-03-30 This book provides a comprehensive overview of Halal in logistics, supply chain management and the future implications for the Halal industry. It discusses a wide range of Halal logistics practices and theories in Japan, Korea, Spain, Oman, and SEA countries. The book examines technology applications, regulatory and certification procedure, Halal management system and quality control, sustainability and as well as challenges for the logistics and Halal supply chain in the pandemic context. The book also looks at how to navigate the complexity of the Halal logistics to achieve business sustainability. It uses a multidisciplinary approach to provide insights on the Halal logistics and supply chain study. This book hopes to fill an existing gap and enrich the literature on Halal logistics and supply chain management specifically in the West, Middle East and regions in Asia. This will be a useful reference to those who would like to learn more about this industry.

The Routledge Companion to Production and Operations Management Martin K. Starr, Sushil K. Gupta, 2017-03-27 This remarkable volume highlights the importance of Production and Operations Management (POM) as a field of study and research contributing to substantial business and social growth. The editors emphasize how POM works with a range of systems—agriculture, disaster management, e-commerce, healthcare, hospitality, military systems, not-for-profit, retail, sports, sustainability, telecommunications, and transport—and how it contributes to the growth of each. Martin K. Starr and Sushil K. Gupta gather an international team of experts to provide researchers and students with a panoramic vision of the field. Divided into eight parts, the book presents the history of POM, and establishes the foundation upon which POM has been built while also revisiting and revitalizing topics that have long been essential. It examines the significance of processes and projects to the fundamental growth of the POM field. Critical emerging themes and new research are examined with open minds and this is followed by opportunities to interface with other business functions. Finally, the next era is discussed in ways that combine practical skill with philosophy in its analysis of POM, including traditional and nontraditional applications, before concluding with the editors' thoughts on the future of the discipline. Students of POM will find this a comprehensive, definitive resource on the state of the discipline and its future directions.

Soft Computing for Biomedical Applications and Related Topics Vladik Kreinovich, Nguyen Hoang Phuong, 2020-06-29 This book presents innovative intelligent techniques, with an emphasis on their biomedical applications. Although many medical doctors are willing to share their knowledge – e.g. by incorporating it in computer-based advisory systems that can benefit other doctors – this knowledge is often expressed using imprecise (fuzzy) words from natural language such as “small,” which are difficult for computers to process. Accordingly, we need fuzzy techniques to handle such words. It is also desirable to extract general recommendations from the records of medical doctors' decisions – by using machine learning techniques such as neural networks. The book describes state-of-the-art fuzzy, neural, and other techniques, especially those that are now being used, or potentially could be used, in biomedical applications. Accordingly, it will benefit all researchers and students interested in the latest developments, as well as practitioners who want to learn about new techniques.

Congressional Record United States. Congress, 2009 The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

Spearhead of Logistics Benjamin King, Richard C. Biggs, 2016-02-25 Spearhead of Logistics is a narrative branch history of the U.S. Army's Transportation Corps, first published in 1994 for transportation personnel and reprinted in 2001 for the larger Army community. The Quartermaster Department coordinated transportation support for the Army until World War I revealed the need for a dedicated corps of specialists. The newly established

Transportation Corps, however, lasted for only a few years. Its significant utility for coordinating military transportation became again transparent during World War II, and it was resurrected in mid-1942 to meet the unparalleled logistical demands of fighting in distant theaters. Finally becoming a permanent branch in 1950, the Transportation Corps continued to demonstrate its capability of rapidly supporting U.S. Army operations in global theaters over the next fifty years. With useful lessons of high-quality support that validate the necessity of adequate transportation in a viable national defense posture, it is an important resource for those now involved in military transportation and movement for ongoing expeditionary operations. This text should be useful to both officers and noncommissioned officers who can take examples from the past and apply the successful principles to future operations, thus ensuring a continuing legacy of Transportation excellence within Army operations. Additionally, military science students and military historians may be interested in this volume.

Dynamics in Logistics Michael Freitag, Herbert Kotzab, Jürgen Pannek, 2016-09-15 These proceedings contain research papers presented at the 5th International Conference on Dynamics in Logistics, held in Bremen, Germany, February 2016. The conference is concerned with dynamic aspects of logistic processes and networks. The spectrum of topics reaches from modeling, planning and control of processes over supply chain management and maritime logistics to innovative technologies and robotic applications for cyber-physical production and logistic systems. The growing dynamic confronts the area of logistics with completely new challenges: it must become possible to describe, identify and analyze the process changes. Moreover, logistic processes and networks must be redesigned to be rapidly and flexibly adaptable to continuously changing conditions. The book primarily addresses researchers and practitioners from the field of industrial engineering and logistics, but it may also be beneficial for graduate students.

ICTE in Transportation and Logistics 2019 Egils Ginters, Mario Arturo Ruiz Estrada, Miquel Angel Piera Eroles, 2020-01-30 This proceedings volume explores the latest advances in transport and logistics, while also discussing the applications of modern information technologies, telecommunications, electronics, and prospective research methods and analyzing their impacts on society and the environment, which in turn determine the future development of these technologies. The book is intended for a broad readership, including transport and logistics business planners and technical experts, leveraging industry knowledge and facilitating technology adoption in promising business regions and transit corridors such as Ukraine, Kazakhstan, and others. The authors, who include policy planners and crafters as well as education and training professionals, address various types of intermodal transport such as rail, road, maritime, air, etc.

Transactions on Computational Collective Intelligence XXXII Ngoc Thanh Nguyen, Ryszard Kowalczyk, Marcin Hernes, 2018-12-18 These transactions publish research in computer-based methods of computational collective intelligence (CCI) and their applications in a wide range of fields such as the semantic web, social networks, and multi-agent systems. TCCI strives to cover new methodological, theoretical and practical aspects of CCI understood as the form of intelligence that emerges from the collaboration and competition of many individuals (artificial and/or natural). The application of multiple computational intelligence technologies, such as fuzzy systems, evolutionary computation, neural systems, consensus theory, etc., aims to support human and other collective intelligence and to create new forms of CCI in natural and/or artificial systems. This thirty-second issue presents 5 selected papers in the field of management, economics and computer science.
