S, M, L, XL Rem Koolhaas, Bruce Mau, 1997-10-01

S, M, L, XL presents a selection of the remarkable visionary design work produced by the Dutch firm Office for Metropolitan Architecture (O.M.A.) and its acclaimed founder, Rem Koolhaas, in its first twenty years, along with a variety of insightful, often poetic writings. The inventive collaboration between Koolhaas and designer Bruce Mau is a graphic overture that weaves together architectural projects, photos and sketches, diary excerpts, personal travelogues, fairy tales, and fables, as well as critical essays on contemporary architecture and society. The book's title is also its framework: projects and essays are arranged according to scale. While Small and Medium address issues ranging from the domestic to the public, Large focuses on what Koolhaas calls the architecture of Bigness. Extra-Large features projects at the urban scale, along with the important essay What Ever Happened to Urbanism? and other studies of the contemporary city. Running throughout the book is a dictionary of an adventurous new Koolhaasian language --

definitions, commentaries, and quotes from hundreds of literary, cultural, artistic, and architectural sources.

Timecode A User's Guide J. Ratcliff, 1999-04-23
Recent radical changes in timecode technology, location shooting and post-production working practices have been brought about by the fragmentation of the television programme making industry and by a dramatic increase in affordable digital transmission and editing equipment and systems. With the expansion of non-traditional television service producers (cable, satellite and video-on-demand) almost anything goes as far as shooting and editing formats are concerned. Timecode: A User's Guide is an indispensable reference for anyone needing to get to grips with the many aspects of timecode, whether in-house or on location. Taking into account these changes this book has now been brought completely up to date to include: * timecode and DVD, LTC & VITC in HANC packets in the serial digital TV interfaces * timecode in IEEE1395 (Firewire) * timecode and digital video cassettes * new recording formats of DVD, DV mini cassettes and D6 are included * 4:3 scanning for wide-screen films - standards updated

* new material to cover new working practices *
new appendices to cover the global LF time data
transmissions and time data embedded in BBC
transmissions Advice is also given on avoiding and
remedying faults and errors.

Shaping the City Rodolphe El-Khoury, Edwards
Robbins, 2015-06-23 Taking on the key issues in
urban design, *Shaping the City* examines the
critical ideas that have driven these themes and
debates through a study of particular cities at
important periods in their development. As well as
retaining crucial discussions about cities such as
Los Angeles, Atlanta, Chicago, Detroit,
Philadelphia, and Brasilia at particular moments
in their history that exemplified the problems and
themes at hand like the mega-city, the post-
colonial city and New Urbanism, in this new
edition the editors have introduced new case
studies critical to any study of contemporary
urbanism – China, Dubai, Tijuana and the wider
issues of informal cities in the Global South. The
book serves as both a textbook for classes in
urban design, planning and theory and is also
attractive to the increasing interest in urbanism
by scholars in other fields. *Shaping the City*
provides an essential overview of the range and
variety of urbanisms and urban issues that are
critical to an understanding of contemporary
urbanism.

Workers and the Global Informal Economy Supriya Routh, Vando Borghi, 2016-04-20 The global financial crisis and subsequent increase in social inequality has led in many cases to a redrawing of the boundaries between formal and informal work. This interdisciplinary volume explores the role of informal work in today's global economy, presenting economic, legal, sociological, historical, anthropological, political and cultural perspectives on the topic. Workers and the Global Informal Economy explores varying definitions of informality in the backdrop of neo-liberal market logic, exploring how it manifests itself in different regions around the world, and its relationship with formal work. This volume demonstrates how neo-liberalism has been instrumental in accelerating informality and has resulted in the increasingly precarious position of the informal worker. Using different methodological approaches and regional focuses, this book considers key questions such as whether workers exercise choice over their work; how

constrained such choices are; how social norms shape such choices; how work affects their well-being and agency; and what role culture plays in the determination of informality. This interdisciplinary collection will be of interest to policy-makers and researchers engaging with informality from different disciplinary and regional perspectives.

Transforming Our World Through Universal Design for Human Development I. Garofolo, G. Bencini, A. Arengi, 2022-09-29 An environment, or any building product or service in it, should ideally be designed to meet the needs of all those who wish to use it. Universal Design is the design and composition of environments, products, and services so that they can be accessed, understood and used to the greatest extent possible by all people, regardless of their age, size, ability or disability. It creates products, services and environments that meet people's needs. In short, Universal Design is good design. This book presents the proceedings of UD2022, the 6th International Conference on Universal Design, held from 7 - 9 September 2022 in Brescia, Italy. The conference is targeted at professionals and academics interested in the theme of universal design as related to the built environment and the wellbeing of users, but also covers mobility and urban environments, knowledge, and information transfer, bringing together research knowledge and

best practice from all over the world. The book contains 72 papers from 13 countries, grouped into 8 sections and covering topics including the design of inclusive natural environments and urban spaces, communities, neighborhoods and cities; housing; healthcare; mobility and transport systems; and universally-designed learning environments, work places, cultural and recreational spaces. One section is devoted to universal design and cultural heritage, which had a particular focus at this edition of the conference. The book reflects the professional and disciplinary diversity represented in the UD movement, and will be of interest to all those whose work involves inclusive design.

Global Metal Music and Culture Andy R. Brown, Karl Spracklen, Keith Kahn-Harris, Niall Scott, 2016-03-22 This book defines the key ideas, scholarly debates, and research activities that have contributed to the formation of the international and interdisciplinary field of Metal Studies. Drawing on insights from a wide range of disciplines including popular music, cultural studies, sociology, anthropology, philosophy, and ethics, this volume offers new and innovative research on metal musicology, global/local scenes studies, fandom, gender and metal identity, metal media, and commerce. Offering a wide-ranging focus on bands, scenes, periods, and sounds, contributors explore topics such as the riff-based song writing of classic heavy metal bands and their modern equivalents, and the musical-

aesthetics of Grindcore, Doom metal, Death metal, and Progressive metal. They interrogate production technologies, sound engineering, album artwork and band promotion, logos and merchandising, t-shirt and jewellery design, and fan communities that define the global metal music economy and subcultural scene. The volume explores how the new academic discipline of metal studies was formed, also looking forward to the future of metal music and its relationship to metal scholarship and fandom. With an international range of contributors, this volume will appeal to scholars of popular music, cultural studies, and sociology, as well as those interested in metal communities around the world.

Contemporary World Fiction Juris Dilevko, Keren Dali, Glenda Garbutt, 2011-03-17 This much-needed guide to translated literature offers readers the opportunity to hear from, learn about, and perhaps better understand our shrinking world from the perspective of insiders from many cultures and traditions. In a globalized world, knowledge about non-North American societies and cultures is a must. *Contemporary World Fiction: A Guide to Literature in Translation* provides an overview of the tremendous range and scope of translated world fiction available in English. In so doing, it will help readers get a sense of the vast world beyond North America that is conveyed by fiction titles from dozens of countries and language traditions. Within the guide, approximately 1,000 contemporary non-English-language fiction titles are fully annotated and thousands of others are listed. Organization is primarily by language, as language often reflects cultural cohesion better than national borders or geographies, but also by country and culture. In addition to contemporary titles, each chapter features a brief overview of earlier translated fiction from the group. The guide also provides in-depth bibliographic essays for each chapter that will enable librarians and library users to further explore the literature of numerous languages and cultural traditions.
