The Diaries of Hermann Ludwig von Lowenstern Victoria Joan Moessner,2014-11-17 Hermann Ludwig von Löwenstern (1777-1836), as a younger son of the landed gentry in Estonia, had no prospects of being given an estate, i.e. a means of livelihood in his homeland. Therefore, at the age of 15 he entered Russian naval service. In 1797 while in England, he began keeping detailed diaries during the English sailors' revolt and continued them until leaving the Russian navy in 1815 to marry and take over estates in Estonia. From England in 1799, he sailed to Gibraltar, Sicily, Greece,

EU-Space and the Euroclass Pawel Michal Lewicki,2017-09-30 How are prestige and power anchored in EU-Brussels? Which performances are valued and which are not? Pawel Lewicki's ethnographic analysis gives an insight into how different understandings of modernity and class structures reproduce national performances and stereotypes among EU civil servants. Divisions permeate both political and private life and are not only visible on the map of the city, but also in lifestyles of people living and working in EU-Brussels. In such a cultural setting the strategies applied by newcomers to the EU are shown by Pawel Lewicki in an impressive way. He shows how their presence reveals deeper postcolonial and (post-)imperial dynamics at the heart of the Union.

RFID in the Supply Chain Judith M. Myerson,2006-11-20 Giving organizations the ability to track, secure, and manage items from the time they are raw materials through the life-cycle of the product, radio frequency identification (RFID) makes internal processes more efficient and improves overall supply chain responsiveness. Helping you bring your organization into the future, RFID in the Supply Chain: A Guide to Selection and Implementation explains RFID technology, its applications in SCM, data storage and retrieval, business processes, operational and implementation problems, risks, security and privacy, facility layout, handling systems and methods, and transportation costs. In short, with its soup-to-nuts coverage, the book ensures that your RFID implementation is successful and that you get the most from your investment. The book discusses the major paradigm shift in product traceability that began with transitioning to RFID technology from bar code technology. It examines the economic feasibility of rolling out RFID and the challenges in supply chain synchronization, customer privacy, security, operations and IT, logistics, program management, education and training, and implementation, as well as what lessons have been learned. The author addresses the RFID business processes needed to analyze and resolve problems the suppliers face when they deal with multiple customers, each with a different mandate, and with their own set of suppliers. Going beyond the technology and how it has changed supply chain processes, the book includes selection guidelines and implementation examples, such as speed of tag reads versus quality of computer inputs and optimal tag location. The author discusses the implementation of a business process model and the separate but equal concerns that business and IT executives have about the implementation of RFID applications. The book also covers security, integrated control management linked to the corporate strategy, and laws and regulations.

Negro Leaguers and the Hall of Fame Steven R. Greenes,2020-09-02 Since 1971, 35 Negro League baseball players and executives have been admitted to the Hall of Fame. The Negro League Hall of Fame admissions process, which has now been conducted in four phases over a 50-year period, can be characterized as idiosyncratic at best. Drawing on baseball analytics and surveys of both Negro League historians and veterans, this book presents an historical overview of NLHOF voting, with an evaluation of whether the 35 NL players selected were the best choices. Using modern metrics such as Wins Above Replacement (WAR), 24 additional Negro Leaguers are identified who have Hall of Fame qualifications. Brief biographies are included for HOF-quality players and executives who have been passed over, along with reasons why they may have been excluded. A

proposal is set forth for a consistent and orderly HOF voting process for the Negro Leagues.

Pindar's Poetry, Patrons, and Festivals Simon Hornblower,Catherine Morgan,2007-02-22 Ancient sport made a huge if indirect contribution to the literature of ancient Greece, since some sixty poems by Pindar and Bacchylides ('epinikian odes'), written to commemorate victories, survive from the Classical period. This book is a collection of essays about that literature, and about the social and physical context for which it was written. The editors assembled an internationally distinguished team of speakers for the original 2002 seminar series held in London, and these papers form the backbone of the book. But to ensure coherence and comprehensive coverage, they have commissioned three further papers, and have themselves written a long thematic Introduction. The result is a stellar team of authors, and a book which looks at an important literary phenomenon in light of the latest archaeological and sociological insights, as well as evaluating the poetry both as poetry and as a performance genre with distinctive characteristics.

Black Baseball's National Showcase Larry Lester,2001-01-01 A lively illustrated introduction to the Negro League equivalent of the All-Star Game discusses the history of the games, as well as the colorful cast of promoters, gamblers, and hucksters who made it happen. Original.

Urban Educational Identity Sara M. Childers,2016-09-13 WINNER 2017 O.L. Davis, Jr. AATC Outstanding Book in Education Award WINNER 2017 American Educational Studies Association Critics Choice Award Through rich ethnographic detail, Urban Educational Identity captures the complexities of urban education by documenting the everyday practices of teaching and learning at a high-achieving, high-poverty school. Drawing on over two years of intensive fieldwork and analysis, author Sara M. Childers shows how students, teachers, and parents work both within and against traditional deficit discourses to demonstrate the challenges and paradoxes of urban schooling. It offers an up-close description of how macro-government policies are interpreted, applied, and even subverted for better or worse by students as active agents in their own education. The book moves on to develop and analyze the concept of urban cachet, tracing how conceptions of race and class were deeply entwined with the very practices for success that propelled students towards graduation and college entrance. A poignant, insightful, and practical analysis, Urban Educational Identity is a timely exploration of how race and class continue to matter in schools.
