Baptism and the Baptists Anthony R. Cross,2017-06-20 Since its first publication in 2000, *Baptism and the Baptists* has become the definitive work on the subject. It examines the theology and practice of believers' baptism among twentieth-century Baptists associated with the Baptist Union of Great Britain, and identifies the major influences which have led to its development. In the nineteenth and early twentieth century, the majority of Baptists concentrated predominantly on the mode and subjects of baptism (immersion and believers), understanding the rite merely as an ordinance--the believer's personal profession of faith in Christ. However, in continuity with a tradition of Baptists going back as far as the first Baptists in the second and third decades of the seventeenth century, there were also a significant number of ministers and scholars who saw the inadequacy of this view of baptism both biblically and

theologically. This sacramental view developed and grew throughout the twentieth century, and influenced a resurgence of baptismal sacramentalism in the early twenty-first century among Baptists not just in Britain, but also in North America, Europe, and further afield.

On Being With Others Simon Glendinning, 2006-12-05 *On Being With Others* is an outstanding exploration of this key philosophical question. Simon Glendinning shows how traditional positions in the philosophy of mind can do little to rebuff the accusation that in fact we have little claim to have knowledge of minds other than our own. *On Being With Others* sets out to refute this charge and disentangle many of the confusions in contemporary philosophy of mind and language that have led to such scepticism. Simon Glendinning explores why early attempts by J.L. Austin and Martin Heidegger to refute scepticism about other minds failed and argues that we must turn to Wittgenstein in order to build a solid theory of other minds. Drawing on the celebrated debate between John Searle and Jacques Derrida, Simon Glendinning establishes fascinating and important links between controversies in the philosophy of mind, language and epistemology.

Descriptions Don Ihde, Hugh J. Silverman, 1985-01-01

Phenomenology in America has developed in unique directions with respect to descriptive analysis and in relation to interdisciplinary fields. *Descriptions* examines current trends in phenomenology. It begins by reflecting on phenomenological description itself, then takes phenomenology into such areas as time, science and the arts, the social, and into the universities. Ranging from the development of theory by such well-known philosophers as Maurice Natanson and Robert Sokolowski, this collection addresses the topics of pregnant subjectivity, nostalgia, the ethical function of architecture, computer science, and academic freedom.

The Face of Things Silvia Benso,2000-06-01 Here's a book that dispels the traditional tendency of philosophy to ignore the alterity of things. Drawing on two major figures in the continental tradition—Levinas and Heidegger—author Silvia Benso engages them on the provocative issue of an ethics of things. She argues that Levinas advances an ethics without things, and Heidegger proffers a conception of things without ethics. Taking up their respective meditations on ethics and things precisely at the point where they abandon such themes, and exposing them to each other, Benso innovatively elaborates an ethical attitude toward things capable of celebrating their alterity—a demand rendered urgent and compelling by the contemporary environmental crisis. Creatively centered on a philosophical hermeneutics of tenderness, *The Face of Things* advances the everyday time of festivity as the novel dimension within which the alterity of things can be recognized, preserved, and celebrated.
