**Broadcasting Baseball** Eldon L. Ham,2011-07-29 There is a long-standing relationship between broadcasting and sports, and nowhere is this more evident than in the marriage of baseball and radio: a slow sport perfectly suited to the word-painting of broadcasters. This work covers the development of the baseball broadcasting industry from the first telegraph reports of games in progress, the influence of early pioneers at Pittsburgh's KDKA and Chicago's WGN, including the first World Series broadcast, the launch of the Telstar Satellite, the Carlton Fisk homerun in the 1975 World Series, which changed how baseball is broadcast, through the latest computer graphics, HD television, and the Internet.

**Broadcasting in the 21st Century** Richard Rudin,2017-09-16 The 21st century is already seeing fundamental changes in broadcasting. No longer are audiences limited to watching or listening to television and radio at the times and places dictated by the broadcasters, or on radio or TV 'sets'. Broadcasting in the 21st Century demonstrates how 'traditional' television and radio is being both challenged and supported by technological developments, including convergence and social media. Drawing on interviews with industry personnel and featuring case studies and research from many countries, including that from the UK, USA, China, India and South Africa, Richard Rudin explains not only the significance of these changes but also how many of the functions and pleasures of broadcasting that were established in the 20th century are being enhanced by new media. Opening with a substantial account of how broadcasting developed in the 20th century, the author goes on to explore how new media forms are changing audiences' pleasures, expectations and demands. Rudin's illuminating study highlights the changing relationship between audiences and broadcast output to examine a range of subjects including: - The impact of citizens' journalism - Political coverage - International TV formats and news output - The continuing appeal of radio as a distinct medium - Debates over bias, truth and trust in broadcasting and broadcasters In addition, Broadcasting in the 21st Century addresses a range of broadcast forms and genres including the coverage of general elections, Reality TV and pirate radio.

**Broadcasting in the Third World** Elihu Katz,Eberhard George Wedell,1977 Broadcasting has long been considered one of the keys to modernization in the developing world. Able to leap the triple barrier of distance, illiteracy, and apathy, it was seen as a crucial element in the development of new nations. Recently, however, these expectations have been disappointed by broadcasting's failures to reach the rural masses and the urban unemployed. Broadcasting has also come under attack as serious questions have been raised about its uncritical importation of western culture. Now, in Broadcasting in the Third World, Elihu Katz and George Wedell offer the first complete coverage of the problems and promises of broadcasting in the third world. Their findings, often controversial and always illuminating, will be of considerable value to sociologists, political scientists, communications specialists, and students of development. Broadcasting in the Third World is based on field research in eleven developing countries (Algeria, Brazil, Cyprus, Indonesia, Iran, Nigeria, Peru, Senegal, Singapore, Tanzania, and Thailand) and secondary source material from a further eighty countries. In looking at the role of broadcasting in national development, the authors focus on three areas of promise: national integration, socio-economic development, and cultural continuity and change. They describe the ways in which the technology and content of broadcasting have been transferred from the developed west to the third world, and they go on to show that western broadcasting must be adapted to suit the specific political, economic and social structures of each developing country. The authors conclude with a series of recommendations which challenge most of the assumptions upon which the principles and practices of broadcasting are based. Well-researched, extensively documented, it will challenge policy-makers and provide important data for researchers.

**Sounds of Change** Christopher H. Sterling, Michael C. Keith, 2009-09-15 When it first appeared in the 1930s, FM radio was a technological marvel, providing better sound and nearly eliminating the static that plagued AM stations. It took another forty years, however, for FM's popularity to surpass that of AM. In *Sounds of Change*, Christopher Sterling and Michael Keith detail the history of FM, from its inception to its dominance (for now, at least) of the airwaves. Initially, FM's identity as a separate service was stifled, since most FM outlets were AM-owned and simply simulcast AM programming and advertising. A wartime hiatus followed by the rise of television precipitated the failure of hundreds of FM stations. As Sterling and Keith explain, the 1960s brought FCC regulations allowing stereo transmission and requiring FM programs to differ from those broadcast on co-owned AM stations. Forced nonduplication led some FM stations to branch out into experimental programming, which attracted the counterculture movement, minority groups, and noncommercial public and college radio. By 1979, mainstream commercial FM was finally reaching larger audiences than AM. The story of FM since 1980, the authors say, is the story of radio, especially in its many musical formats. But trouble looms. Sterling and Keith conclude by looking ahead to the age of digital radio--which includes satellite and internet stations as well as terrestrial stations--suggesting that FM's decline will be partly a result of self-inflicted wounds--bland programming, excessive advertising, and little variety.

**Life on Air** David Attenborough, 2002 Sir David Attenborough's career as a naturalist and broadcaster has spanned nearly five decades and there are very few places on the globe that he has not visited. In this volume of memoirs David tells stories of the people and animals he has met and the places that he has visited. Sir David's first job after Cambridge University and two years in the Royal Navy - was at the London publishing house Hodder & Stoughton. Then in 1952 he joined the BBC as a trainee producer and it was while working on the *Zoo Quest* series (1954-64) that he had his first opportunity to undertake expeditions to remote parts of the globe to capture intimate footage of rare wildlife in its natural habitat. He was Controller of BBC2 (1965-68), during which time he introduced colour television to Britain, then Director of Programmes for the BBC (1969-1972). However in 1973 he abandoned administration altogether to return to documentary-making and writing. Over the last 25 years he has established himself as the world's leading natural history programme maker with several landmark BBC series, including *Life on Earth* (1979), *The Living Planet* (1984), *The Trials of Life* (1990), *The Private Life of Plants* (1995) and *Life of Birds* (1998). Sir David Attenborough is a Trustee of the British Museum and the Royal Botanic Gardens, Kew; an Honorary Fellow of Clare College, Cambridge; a Fellow of the Royal Society and was knighted in 1985.

*Olive, Mabel & Me: Life and Adventures with Two Very Good Dogs* Andrew Cotter,2020-12-01 The story of Olive and Mabel, Labrador retrievers who rose to internet fame as the subjects of Andrew Cotter's BBC sports parodies. When sporting events were put on hold in March 2020, commentator Andrew Cotter shifted to working from home. The one-on-one competitors? His two Labrador retrievers, Olive and Mabel. In the hilarious videos that ensued, the dogs engage in various contests, from bone-snatching and breakfast-eating to crushing it on the dog walk, while Cotter narrates to hilarious effect. The scene of Mabel, simply standing still in a fetid pond was one of the most popular. Why? Because this is how dogs live, and Cotter captured it with humor and joy. It's why the series has been viewed more than 50 million times, entertaining dog owners, sports fans and celebrities around the world. Olive and Mabel are more than online celebrities, however, as revealed in this charming narrative. Filled with stories about how Cotter fell in love with his dogs, his passion for hiking with them through the glens and over the peaks of his native Scotland, and the ongoing relationship between Olive and Mabel (particularly the "competitive fire" lit during these days of quarantine), the memoir is by turns side-splittingly funny and thoughtfully tender. It's sure to resonate with all dog lovers.
