The Texas Model for Comprehensive School Counseling Programs ,2018-02-15 The Texas Model for Comprehensive School Counseling Programs is a resource to develop effective and high quality comprehensive school counseling programs that align with Texas statutes and rules governing the work of school counselors. **The Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education** National Academies of Sciences, Engineering, and Medicine,Policy and Global Affairs,Board on Higher Education and Workforce,Committee on Integrating Higher Education in the Arts, Humanities, Sciences, Engineering, and Medicine,2018-07-21 In the United States, broad study in an array of different disciplines—arts, humanities, science, mathematics, engineering—as well as an in-depth study within a special area of interest, have been defining characteristics of a higher education. But over time, in-depth study in a major discipline has come to dominate the curricula at many institutions. This evolution of the curriculum has been driven, in part, by increasing specialization in the academic disciplines. There is little doubt that disciplinary specialization has helped produce many of the achievements of the past century. Researchers in all academic disciplines have been able to delve more deeply into their areas of expertise, grappling with ever more specialized and fundamental problems. Yet today, many leaders, scholars, parents, and students are asking whether higher education has moved too far from its integrative tradition towards an approach heavily rooted in disciplinary silos. These silos represent what many see as an artificial separation of academic disciplines. This study reflects a growing concern that the approach to higher education that favors disciplinary specialization is poorly calibrated to the challenges and opportunities of our time. The Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education examines the evidence behind the assertion that educational programs that mutually integrate learning experiences in the humanities and arts with science, technology, engineering, mathematics, and medicine (STEMM) lead to improved educational and career outcomes for undergraduate and graduate students. It explores evidence regarding the value of integrating more STEMM curricula and labs into the academic programs of students majoring in the humanities and arts and evidence regarding the value of integrating curricula and experiences in the arts and humanities into college and university STEMM education programs.

*Up Against the Wall* Donald Albrecht,Jessica Lacher-Feldman,William M. Valenti,2021 Up Against the Wall: Art, Activism, and the AIDS Poster offers nearly 200 examples of visually arresting and socially meaningful posters, taken from more than 8,000 held in the collection in the University of Rochester's River Campus Libraries' Department of Rare Books, Special Collections, and Preservation. The collection, one of the largest of its kind in the

world, was donated to the University of Rochester by Dr. Edward Atwater. The book accompanies an exhibition of AIDS education posters displayed at the Memorial Art Gallery of the University of Rochester, Rochester, NY. The posters, spanning the years from 1982 to the present, show how social, religious, civic, and public health agencies have addressed the controversial, often contested terrain of the HIV/AIDS pandemic within the public realm. Organizations and creators tailored their messages to audiences, both broad and very specific, and used a wide array of strategies, employing humor, emotion, scare tactics, simple scientific explanations, sexual imagery, and many other methods to communicate powerfully and effectively.

**The College Dropout Scandal** David Kirp, 2019-07-01 Higher education today faces a host of challenges, from quality to cost. But too little attention gets paid to a startling fact: four out of ten students -- that's more than ten percent of the entire population -- who start college drop out. The situation is particularly dire for black and Latino students, those from poor families, and those who are first in their families to attend college. In *The College Dropout Scandal*, David Kirp outlines the scale of the problem and shows that it's fixable -- we already have the tools to boost graduation rates and shrink the achievement gap. Many college administrators know what has to be done, but many of them are not doing the job -- the dropout rate hasn't decreased for decades. It's not elite schools like Harvard or Williams who are setting the example, but places like City University of New York and Long Beach State, which are doing the hard work to assure that more students have a better education and a diploma. As in his New York Times columns, Kirp relies on vivid, on-the-ground reporting, conversations with campus leaders, faculty and students, as well as cogent overviews of cutting-edge research to identify the institutional reforms--like using big data to quickly identify at-risk students and get them the support they need -- and the behavioral strategies -- from nudges to mindset changes -- that have been proven to work. Through engaging stories that shine a light on an underappreciated problem in colleges today, David Kirp's hopeful book will prompt colleges to make student success a top priority and push more students across the finish line, keeping their hopes of achieving the American Dream alive.

**Rochester Institute of Technology** Dane R. Gordon, 2007 Rochester Institute of Technology's story now encompasses some 175 years of commitment to higher education. Almost uniquely among American universities, RIT has focused on educating a skilled workforce to support advancements in the industrialization and modernization of America. From its beginnings in 1829, when it harnessed the energy of a young city in upstate New York, through stunningly effective mergers and nimble responses to new technologies, RIT has evolved into a respected model in innovative higher education. In this new and enlarged edition of his original history of RIT (1982), Professor Gordon brings the university's fascinating chronicle up to date. RIT has enjoyed tremendous growth over the past 25 years, and readers will enjoy anecdotes on student life, insights into major initiatives, and an objective look at the tough decisions that have guided RIT into the company of the highest-ranking academic institutions in the United States. This book is of certain interest for urban and technological historians, college administrators nationwide, and especially RIT's own growing community of students, employees, supporters, and alumni.

**Productivity Machines** Corinna Schlombs, 2019-10-01 How productivity culture and technology became emblematic of the American economic system in pre- and postwar Germany. The concept of productivity originated in a statistical measure of output per worker or per work-hour, calculated by the US Bureau of Labor Statistics. A broader productivity culture emerged in 1920s America, as Henry Ford and others linked methods of mass production and consumption to high wages and low prices. These ideas were studied eagerly by a Germany in search of economic recovery after World War I, and, decades later, the Marshall Plan promoted productivity in its efforts to help post-World War II Europe rebuild. In *Productivity Machines*, Corinna Schlombs examines the transatlantic history of productivity technology and culture in the two decades before and after World War II. She argues for the interpretive flexibility of productivity: different groups viewed productivity differently at different times. Although it began as an objective measure, productivity came to be emblematic of the American economic system; post-World War II West Germany, however, adapted these ideas to its own political and economic values. Schlombs explains that West German unionists cast a doubtful eye on productivity's embrace of plant-level collective bargaining; unions fought for codetermination--the right to participate in corporate decisions. After describing German responses to US productivity, Schlombs offers an in-depth look at labor relations in one American company in Germany--that icon of corporate America, IBM. Finally, Schlombs considers the emergence of computer technology--seen by some as a new symbol of productivity but by others as the means to automate workers out of their jobs.

**MRI Atlas of Orthopedics and Traumatology of the Knee** Peter Teller, Hermann König, Ulrich Weber, Peter Hertel, 2012-12-06 This MRI atlas of the knee joint is the fruit of interdisciplinary cooperation among radiologists, orthopedists and traumatologists. All important diseases and injuries of the knee are covered. Every part of the joint is comprehensively depicted in a series of MR images ranging all the way from the normal status to frank disease. Clinical evaluation of the findings is followed in each case by detailed information on diagnostic pitfalls, staging of disease and consequences for treatment. This special format helps to differentiate clearly between normal and abnormal imaging findings and facilitates construction of engrams for the major joint structures.

**Making Institutional Repositories Work** Burton B. Callicott, David Scherer, Andrew Wesolek, 2015-11-15 Quickly following what many expected to be a wholesale revolution in library practices, institutional repositories encountered unforeseen problems and a surprising lack of impact. Clunky or cumbersome interfaces, lack of perceived value and use by scholars, fear of copyright infringement, and the like tended to dampen excitement and adoption. This collection of essays, arranged in five thematic sections, is intended to take the pulse of institutional repositories--to see how they have matured and what can be expected from them, as well as introduce what may be the future role of the institutional repository. *Making Institutional Repositories Work* takes novices as well as seasoned practitioners through the practical and conceptual steps necessary to develop a functioning institutional repository, customized to the needs and culture of the home institution. The first section covers all aspects of system platforms, including hosted and open-source options, big data capabilities and integration, and issues related to discoverability. The second section addresses policy issues, from the basics to open-source and deposit mandates. The third section focuses on recruiting and even creating content. Authors in this section will address the ways that different disciplines tend to have different motivations for deposit, as well as the various ways that institutional repositories can serve as publishing platforms. The fourth section covers assessment and success measures for all involved--librarians, deans, and administrators. The theory and practice of traditional metrics, alt metrics, and peer review receive chapter-length treatment. The fifth section provides case studies that include a boots-on-the-ground perspective of issues raised in the first four sections. By noting trends and potentialities, this final section, authored by Executive Director of SPARC Heather Joseph, makes future predictions and helps managers position institutional repositories to be responsive change and even shape the evolution of scholarly communication.

**Selecting, Preparing And Developing The School District Superintendent** David S.G. Carter, Thomas E. Glass, Shirley M. Hord, 2013-11-05 Growing discontent with the performance of educational institutions is common in the USA today and little is being done to address the real problem -- that of the need to reform and restructure the entire educational system. A key issue in this reform is the training and development of leaders in educational administration; as experienced leaders retire, so new professionals are called to assume the mantle of the old hands and vital new opportunities exist for those willing to take up the challenge.; This vitally practical text is about the selection, preparation and professional development of aspiring school leaders over the course of their careers, concentrating on ways to increase their overall effectiveness -- particularly in changing times. It looks at changes that have been made and considers what can be adapted from existing systems in order to make radical improvements for those in leadership positions.; It is intended for use by postgraduate students in education, teacher trainings, heads of education faculties and teachers in leadership positions, school board members and aspirant superintendents.
