The One-Minute Workout Martin Gibala, Christopher Shulgan, 2017-02-07 Finally, the solution to the #1 reason we don't exercise: time. Everyone has one minute. A decade ago, Martin Gibala was a young researcher in the field of exercise physiology—with little time to exercise. That critical point in his career launched a passion for high-intensity interval training (HIIT), allowing him to stay in shape with just a few minutes of hard effort. It also prompted Gibala to conduct experiments that helped launch the exploding science of ultralow-volume exercise. Now that he's the worldwide guru of the science of time-efficient workouts, Gibala's first book answers the ultimate question: How low can you go? Gibala's fascinating quest for the answer makes exercise experts of us all. His work demonstrates that very short, intense bursts of exercise may be the most potent form of workout available. Gibala busts myths ("it's only for really fit people"), explains astonishing science ("intensity trumps duration"), lays out time-saving life hacks ("exercise snacking"), and describes the fascinating health-promoting value of HIIT (for preventing and reversing disease). Gibala's latest study found that sedentary people derived the fitness benefits of 150 minutes of traditional endurance training with an interval protocol that involved 80 percent less time and just three minutes of hard exercise per week. Including the eight best basic interval workouts as well as four microworkouts customized for individual needs and preferences (you may not quite want to go all out every time), *The One-Minute Workout* solves the number-one reason we don't exercise: lack of time. Because everyone has one minute.

Prevention Fiber Up Slim Down Cookbook Editors Of

Prevention Magazine,2008-08-05 While common dieting wisdom suggests that those who need to lose weight must be eating too much, the newest discoveries in weight loss science now reveal that what's not being eaten can hinder weight reduction. Fiber is turning out to be the silver bullet of dieting—because it can fill you up on fewer calories, dampen cravings for fattening foods, and dramatically improve your overall health. Consuming the right amount of dietary fiber can have profound health benefits. It can cut the risk of heart disease by 30 percent; lower cholesterol by as much as 13 points; decrease inflammation; drop blood pressure; balance blood sugar; improve memory; reduce the risk for breast, colon, and endometrial cancer; and boost the immune system. Unfortunately, ramping up fiber levels too quickly can also cause digestive distress. With an easy-to follow, 4 week plan, Prevention's Fiber Up Slim Down Cookbook by the Editors of Prevention Magazine shows how to switch over to high-fiber living without experiencing excessive gas or uncomfortable bloating. Of course, for any weight-loss plan to work, the food must be fabulous. Prevention's Fiber Up Slim Down Cookbook is packed with more than 200 delicious, fiber-rich recipes that work with any fiber-rich diet plan including home-style dishes like Roasted Sweet and Russet Potato Salad and Mom's Turkey Meatloaf, tasty new favorites like Curried Beef with Pineapple and Coconut, and sweet treats like Ginger-Sweet Potato Cheesecake and Pumpkin Fruitcake.
