Encyclopedia of Iron, Steel, and Their Alloys
(Online Version) George E. Totten, Rafael Colas, 2016-01-06 The first of many important works featured in CRC Press' Metals and Alloys Encyclopedia Collection, the Encyclopedia of Iron, Steel, and Their Alloys covers all the fundamental, theoretical, and application-related aspects of the metallurgical science, engineering, and technology of iron, steel, and their alloys. This Five-Volume Set addresses topics such as extractive metallurgy, powder metallurgy and processing, physical metallurgy, production engineering, corrosion engineering, thermal processing, metalworking, welding, iron- and steelmaking, heat treating, rolling, casting, hot and cold forming, surface finishing and coating, crystallography, metallography, computational metallurgy, metal-matrix composites, intermetallics, nano- and micro-structured metals and alloys, nano- and micro-alloying effects, special steels, and mining. A valuable reference for materials scientists and engineers, chemists, manufacturers, miners, researchers, and students, this must-have encyclopedia: Provides extensive coverage of properties and recommended practices Includes a wealth of helpful charts, nomograms, and figures Contains cross referencing for quick and easy search Each entry is written by a subject-matter expert and reviewed by an international panel of renowned researchers from academia, government, and industry. Also Available Online This Taylor & Francis encyclopedia is also available through online subscription, offering a variety of extra benefits for researchers, students, and librarians, including: Citation tracking and alerts Active reference linking Saved searches and marked lists HTML and PDF format options Contact Taylor and Francis for more information or to inquire about subscription

Light Metals 2021 Linus Perander, 2021-02-23 The
Light Metals symposia at the TMS Annual Meeting &
Exhibition present the most recent developments,
discoveries, and practices in primary aluminum
science and technology. The annual Light Metals
volume has become the definitive reference in the

field of aluminum production and related light metal technologies. The 2021 collection includes contributions from the following symposia: · Alumina and Bauxite · Aluminum Alloys, Processing, and Characterization · Aluminum Reduction Technology · Aluminum Reduction Technology Across the Decades: An LMD Symposium Honoring Alton T. Tabereaux, Halvor Kvande and Harald A. Øye · Cast Shop Technology · Electrode Technology for Aluminum Production

The Nigerian Healthcare System Joseph Abiodun Balogun, 2022-01-28 The modern-day practice of health care was imported into Nigeria over 500 years ago. In 1947, the first national health plan was developed in Nigeria with the primary goal of providing universal health care (UHC), but this goal remains elusive to date. This comprehensive book presents the roadmap needed to attain UHC in Nigeria and offers a blueprint for achieving high-quality health care in the nation. Starting with a brief overview of the Nigerian state, the fundamentals of health care, including the challenges to affordable quality healthcare delivery, the author critically examines the healthcare system in Nigeria and offers specific recommendations to invigorate the system and improve interprofessional collaborations. Each chapter includes case studies to allow readers to contextualize the information presented and behavioral learning objectives to test readers' knowledge. Among the topics covered: The Organizational Structure and Leadership of the Nigerian Healthcare System The Vulnerabilities of the Nigerian Healthcare System The Spectrum of Complementary and Alternative Medicine Emerging Developments in Traditional Medicine Practice in Nigeria The Plight of Persons Living with Disabilities: The Visible Invisibles in Nigeria A Comparative Analysis of the Health System of Nigeria and Six Selected Nations Around the World

A Qualitative Investigation of the Barriers to the Delivery of High-Quality Healthcare Services in Nigeria The Political and Economic Reforms Needed to Achieve Universal and High-Quality Health Care in Nigeria Reimagining the Nigerian Healthcare System to Achieve Universal and High-Quality Health Care by 2030 The Nigerian Healthcare System: Pathway to Universal and High-Quality Health Care is ideal for adoption as a textbook in health services administration, health policy and management, health informatics, healthcare delivery systems, and primary health care courses offered at universities in Nigeria. It also would appeal to students and faculty in African diaspora programs internationally. The book is also essential for policymakers, health systems technocrats, researchers, and professionals in various health disciplines, including medicine, nursing, and allied health.

The Essential Guide to the Internet Sydney S. Chellen, 2000 The Essential Guide to the Internet for Health Professionals is a superb photocopiable resource for lecturers. Each chapter contains easy-to-follow activities and photocopiable worksheets.

The Essential Guide to the Internet for Health Professionals Sydney. S. Chellen, 2022-02-14 There is a wealth of health information on the Internet. Today's students of health studies and all health care professionals must be able to use this valuable resource and extract from it what is most relevant and useful. In order for them to do this purposefully and skilfully, they need to have a thorough understanding of how the system works and have the ability to navigate their way around it with ease. The Essential Guide to the Internet for Health Professionals is a superb photocopiable resource for lecturers and a self instructional guide for students. It shows students how to: get online; navigate the World Wide Web; find health

information on the Internet; communicate with other health professionals; access free health and medical resources; publish on the web; use online help with health studies assignments; search for jobs. Each unit contains easy-to-follow activities and photocopiable worksheets.

Non-destructive Diagnostic of High Voltage Electrical Systems Josef Vedral, 2023-05-05 This book describes the methods of signal processing used in the non-destructive diagnostics of mechanical and electrical properties of high-voltage electrical machines. Traditional and less traditional methods are given, which allow measuring the mechanical and electrical properties of these machines in order to determine their technical condition, including a description of their measurement methods. Separate chapters are devoted to the causes and methods of measuring and evaluating partial discharges arising in the insulation systems of high-voltage electrical machines. The following chapters provide an overview of the test methods used in the non-disassembly diagnostics of high-voltage transformers, rotary machines, high-voltage cables, insulators, surge arresters and circuit breakers. The book is intended for students of technical universities and experts in the field of non-destructive diagnostics of high-voltage electrical machines. The book was reviewed by Ing. Jiří Brázdil, Ph.D. MBA, Head of the HV laboratory of ORGREZ in the Czech Republic.

Quarterly Review of Distance Education Michael Simonson, Anyimir Orellana, 2021-10-01 The Quarterly Review of Distance Education is a rigorously refereed journal publishing articles, research briefs, reviews, and editorials dealing with the theories, research, and practices of distance education. The Quarterly Review publishes articles

that utilize various methodologies that permit generalizable results which help guide the practice of the field of distance education in the public and private sectors. The Quarterly Review publishes full-length manuscripts as well as research briefs, editorials, reviews of programs and scholarly works, and columns. The Quarterly Review defines distance education as institutionally-based formal education in which the learning group is separated and interactive technologies are used to unite the learning group.

The Past Web Daniel Gomes, Elena Demidova, Jane Winters, Thomas Risse, 2021-06-30 This book provides practical information about web archives, offers inspiring examples for web archivists, raises new challenges, and shares recent research results about access methods to explore information from the past preserved by web archives. The book is structured in six parts. Part 1 advocates for the importance of web archives to preserve our collective memory in the digital era, demonstrates the problem of web ephemera and shows how web archiving activities have been trying to address this challenge. Part 2 then focuses on different strategies for selecting web content to be preserved and on the media types that different web archives host. It provides an overview of efforts to address the preservation of web content as well as smaller-scale but high-quality collections of social media or audiovisual content. Next, Part 3 presents examples of initiatives to improve access to archived web information and provides an overview of access mechanisms for web archives designed to be used by humans or automatically accessed by machines. Part 4 presents research use cases for web archives. It also discusses how to engage more researchers in exploiting web archives and provides inspiring research studies performed using the exploration of web archives. Subsequently, Part 5 demonstrates

that web archives should become crucial infrastructures for modern connected societies. It makes the case for developing web archives as research infrastructures and presents several inspiring examples of added-value services built on web archives. Lastly, Part 6 reflects on the evolution of the web and the sustainability of web archiving activities. It debates the requirements and challenges for web archives if they are to assume the responsibility of being societal infrastructures that enable the preservation of memory. This book targets academics and advanced professionals in a broad range of research areas such as digital humanities, social sciences, history, media studies and information or computer science. It also aims to fill the need for a scholarly overview to support lecturers who would like to introduce web archiving into their courses by offering an initial reference for students.

Selected Papers from 2018 IEEE International Conference on High Voltage Engineering (ICHVE 2018) Issouf Fofana, Ioannis F. Gonos, 2021-03-04
The 2018 IEEE International Conference on High Voltage Engineering (ICHVE 2018) was held on 10-13 September 2018 in Athens, Greece, organized by the National Technical University of Athens, Greece, and endorsed by the IEEE Dielectrics and Electrical Insulation Society. This conference has attracted a great deal of attention from international researchers in the field of high voltage engineering. This conference provided not only an excellent platform to share knowledge and experiences on high voltage engineering, but also the opportunity to present the latest achievements and different emerging challenges in power engineering, including topics related to ultra-high voltage, smart grids, and new insulation materials and their dielectric properties.

Condition Assessment of High Voltage Insulation in Power System Equipment R.E. James, Q. Su, 2008

This book covers major components of a high voltage system and the different insulating materials applied in equipment, identifying measurable materials suitable for condition assessment, and also analyses insulation fault scenarios that may occur in power equipment.

Advances in Artificial Systems for Medicine and Education III Zhengbing Hu, Sergey

Petoukhov, Matthew He, 2020-01-14 This book discusses the latest advances in the development of artificial intelligence systems and their applications in various fields, from medicine and technology to education. It comprises papers presented at the Third International Conference of Artificial Intelligence, Medical Engineering, Education (AIMEE2019), held at the Mechanical Engineering Institute of the Russian Academy of Sciences, Moscow, Russia, on 1-3 October 2019. Covering topics such as mathematics and biomathematics; medical approaches; and technological and educational approaches, it is intended for the growing number of specialists and students in this field, as well as other readers interested in discovering where artificial intelligence systems can be applied in the future.

Transmission, Distribution, and Renewable Energy Generation Power Equipment Bella H.

Chudnovsky, 2017-03-07 The revised edition presents, extends, and updates a thorough analysis of the factors that cause and accelerate the aging of conductive and insulating materials of which transmission and distribution electrical apparatus is made. New sections in the second edition summarize the issues of the aging, reliability, and safety of electrical apparatus, as well as supporting equipment in the field of generating renewable energy (solar, wind, tide, and wave power). When exposed to atmospheric corrosive gases and fluids, contaminants, high and low temperatures, vibrations, and other internal and

external impacts, these systems deteriorate; eventually the ability of the apparatus to function properly is destroyed. In the modern world of green energy, the equipment providing clean, electrical energy needs to be properly maintained in order to prevent premature failure. The book's purpose is to help find the proper ways to slow down the aging of electrical apparatus, improve its performance, and extend the life of power generation, transmission, and distribution equipment.
