Gender, Internet Use, and Covid-19 in the Global South Jeffrey James, 2022-09-29 This book analyzes the use of the mobile Internet against the background of gender bias and Covid-19, currently two of the most important and pressing problems of the Global South. The book argues that the degree of benefits from this new technology depends

heavily on the way it is actually used and that most new technologies are developed for the conditions prevailing in rich countries, where they tend to be quite easily adopted and used. In the Global South, by contrast, a paucity of digital skills and other factors make the potentially valuable benefits from the Internet much more difficult to derive. Using empirical data recently provided by the Groupe Speciale Mobile Association (GSMA), the book examines the existence and extent of the digital divide between males and females in mobile Internet use, which constitutes a new form of divide. It sheds light on the acute difficulty for first-time mobile Internet users in the Global South, and especially Sub-Saharan Africa, to learn the digital skills that are needed to use the said technology effectively, with a special focus on how these users acquire the required knowledge, without having undergone the process of learning by doing. The book further discusses the determinants of digital skills in the Global South, as well as major factors underlying the extent to which different users actually benefit from the mobile Internet, such as gender, location, age, and education. Finally, it investigates how womens' use of the Internet has been altered by the pandemic in the Global South. This book will appeal to students, researchers, and scholars of development economics and development studies, as well as policy-makers interested in a better understanding of the impact of gender bias and Covid-19 on mobile internet use in the Global South.

Videogames in the Indian Subcontinent Souvik Mukherjee, 2022-09-30 *Videogames in the Indian Subcontinent: Development, Culture(s) and Representations* explores the gaming culture of one of the most culturally diverse and populous regions of the world-the Indian subcontinent. Building on the author's earlier work on videogame culture in India, this book addresses issues of how discussions of equality and diversity sit within videogame studies, particularly in connection with the subcontinent, thereby presenting pioneering research on the videogame cultures of the region. Drawing on a series of player and developer interviews and surveys

conducted over the last five years, including some recent ones, this book provides a sense of how games have become a part of the culture of the region despite its huge diversity and plurality and opens up avenues for further study through vignettes and snapshots of the diverse gaming culture. It addresses the rapid rise of videogames as an entertainment medium in South Asia and, as such, also tries to better understand the recent controversies connected to gaming in the region. In the process, it aims to make a larger connection between the development of videogames and player culture, in the subcontinent and globally, thus opening up channels for collaboration between the industry and academic research, local and global.

TWO WORLDS APART. Akshaya Kosuri ,MK Pavani., When joy is a habit, love is a reflex. The concept of love is abstract. People define love differently; they show it differently and have different expectations of what it should look and feel like. We are often torn between nostalgia for the familiar and an urge for the strange. As often as not, we are homesick most for the places we have ever known. For some, pain is the price of love and for some, it's a precious connection unexplained. The book 'Two worlds apart' focuses

on varied perspectives on the question 'Is love a source of harmony or conflict or both?'

Anxiety: A Self HElp Guide to Overcoming Severe Anxiety, Controlling Panic Attacks (Easy Guide To Recover The Control Of Your Emotion) Gabriel Waters, A Comprehensive, Holistic Guide to the Conventional Medical and Self-Care Treatments for Anxiety Disorders Overcoming Your Anxiety for People on the Go is my journey. It took me a summer to write this book but years of living with anxiety and its symptoms to accumulate the knowledge that is contained in it. I was tired of people telling me I had to manage my anxiety for the rest of my life. What I was starting to see was that I could overcome it. I was done with the nasty tricks anxiety was playing on me. I was done sabotaging myself. In this book are the lessons I learned through self reflection, reading and studying anxiety and speaking to people going through the same thing as me. There are no tricks or gimmicks in this book. The goal is to get you to change your perspective on your sensations and your thoughts. I want you to see your anxiety in a different light. Each of these individuals was able to use breathing, meditation and simple stretching poses to help heal emotional issues and gain insights that changed their lives. Many people I work with say initially that meditation doesn't work for them because their mind is too active and races out of control. I am happy to see that often they will change their view after trying a breathing or meditation technique during the week. It has been wonderful to see each person shed their former limitations and break out of

restricting patterns. It is my hope that these stories will help you with your own journey and give you tools you can apply each day for more peace, joy and personal growth. The Production of Global Web Series in a Networked Age Guy Healy,2022-02-25 This book tells

the story of diverse online creators – women, ethnic and racial minorities, queer folk and those from hardscrabble backgrounds – producing low budget, high cultural impact web-series which have disrupted longstanding white male domination of the film and TV industries. Author Guy Healy addresses four burning problems faced by creators in the context of digital disruption (along with potential solutions), namely: the sustainability of monetizing digital content and the rising possibility of middle-class artistic careers; algorithmic volatility; the difficulty of finding people to share jealously guarded industry knowledge as traditional craft-based mentoring and expertise-sharing mechanisms break down; and the lack of diversity and authenticity in high-profile storytelling. It includes nine case studies, five drawn from a second wave of outstanding YouTube-developed talent, transitioning to longer form narrative, most collaborating with established TV producers working across the divide between online and established television culture, and all from under-represented and/or minority backgrounds. The balance are film-school and industry professionals leveraging YouTube in the same way, including two Writers Guild of America new media award-winners. These storytellers leverage their social networks and chase sustainable careers by reaching audiences of subscription video-on-demand platforms and mainstream online broadcast in Australia and North America. The Production of Global Web-Series in a Networked Age is the first longitudinal study of this historic rapprochement between online and television cultures. Four of

the cases are in Emmy-winning contexts, and one in an Emmy nominated context. Covering 2005–2021, the book reveals distinctive new forms of screen industry convergence with profound implications for creators' careers, the screen industry in general, new media theory, and broader cultural and social change. It is essential reading for students, academics and industry professionals working on the production and distribution of web series.

Educating a Billion Arjun Mohan, 2023-09-25
Educating a Billion is an insider's take on how edtech companies in India are trying to solve the issues plaguing our education system and trying to deliver quality at scale. It covers the formative days of India's well-known edtech start-ups- BYJU'S, Unacademy, upGrad and Whitehat Jr, among others, and how these companies created products with a promise that made a difference. The growth of these start-ups is synonymous with the growth of venture capitalist led capital deployment in privately held Indian companies (private markets). The book covers Covid-19-induced changes in our educational system which led to the hypergrowth of the edtech ecosystem, a watershed event for digital start-ups globally. With a unique ringside

perspective, Arjun Mohan weighs in on the future of edtech and how technologies like artificial intelligence (AI) and virtual reality (VR) are going to play an important role in the next phase. Above everything else, this book is the story of India's new generation of entrepreneurs and founders-their hopes, their unwavering faith in the face of ambiguity and their rejection of fear. The book is about vision, audacity and optimism that's changing the education system after 200-plus years of slumber.

En Orey Vasagi Nabeel,2023-06-18 The book delves into a love story between a boy and a girl, but it takes an unusual approach. It explores narratives where there are no traditional villains or faults on either side. Instead, it emphasizes how fate plays a pivotal role in shaping the story. In this particular tale, there are no regrets, no feelings of vengeance, and no blame to be assigned to either party. It showcases a unique perspective on love, highlighting the power of destiny in bringing two individuals together or not.

A Journey through my memories... Looking back @80

Shobha Srivastava,2023-07-06 The book is filled with a lot of stories, anecdotes, and insights into a way of life that has since passed into history. For the current generation, the book is an interesting look into the life led by their parents and grandparents and for persons who lived through that era, it is a great chance to relive those moments once more.

Free-to-Play Christopher A. Paul,2020-10-13 An examination of free-to-play and mobile games that traces what is valued and what is marginalized in discussions of games. Free-to-play and mobile video games are an important and growing part of the video game industry, and yet they are often disparaged by journalists, designers, and players and pronounced inferior to games with more traditional payment models. In this book, Christopher Paul shows that underlying the criticism is a bias against these games that stems more from who is making and playing them than how they are monetized. Free-to-play and mobile games appeal to a different kind of player, many of whom are women and many of whom prefer different genres of games than multi-level action-oriented killing fests. It's not a coincidence that some of the few free-to-play games that have been praised by games journalists are League of Legends and World of Tanks.

Ludotopia Espen Aarseth,Stephan Günzel,2019-08-31 Where do computer games »happen«? The articles collected in this pioneering volume explore the categories of »space«, »place« and »territory« featuring in most general theories of space to lay the groundwork

for the study of spatiality in games. Shifting the focus away from earlier debates on, e.g., the narrative nature of games, this collection proposes, instead, that thorough attention be given to the tension between experienced spaces and narrated places as well as to the mapping of both of these.
