**Public Brainpower** Indra Overland,2017-10-26 This book discusses how civil society, public debate and freedom of speech affect the management of natural resources. Drawing on the work of Robert Dahl, Jürgen Habermas and Robert Putnam, the book introduces the concept of public brainpower. Good governance of natural resources requires fertile public debate – to conceive new institutions, to provide checks and balances on existing institutions and to ensure their continuous dynamic evolution as the needs of society change. The book explores the strengths and weaknesses of these ideas through case studies of 18 oil and gas-producing countries: Algeria, Angola, Azerbaijan, Canada, Colombia, Egypt, Iraq, Kazakhstan, Libya, the Netherlands, Nigeria, Norway, Qatar, Russia, Saudi Arabia, the UAE, the UK and Venezuela. The concluding chapter presents 10 tenets on how states can maximize their public brainpower, as well as a ranking of how well 33 resource-rich countries have succeeded in doing so. Four of the chapters – ‘Introduction’, ‘Norway’, ‘Kazakhstan’ and ‘Russia’ – are available under a CC BY 4.0 Open Access license at [link.springer.com](http://link.springer.com).

*Music Radio* Morten Michelsen, Mads Krogh, Steen Kaargaard Nielsen, Iben Have, 2018-12-27 Why is music so important to radio? This anthology explores the ways in which musical life and radio interact, overlap and have influenced each other for nearly a century. One of music radio's major functions is to help build smaller or larger communities by continuously offering broadcast music as a means to create identity and senses of belonging. Music radio also helps identify and develop musical genres in collaboration with listeners and the music industry by mediating and by gatekeeping. Focusing on music from around the world, *Music Radio* discusses what music radio is and why or for what purposes it is produced. Each essay illuminates the intricate cultural processes associated with music and radio and suggests ways of working with such complexities.

*Radio Audiences and Participation in the Age of Network Society* Tiziano Bonini, Belén Monclús, 2014-12-05 This book maps, describes and further explores all contemporary forms of interaction between radio and its public, with a specific focus on those forms of content co-creation that link producers and listeners. Each essay will analyze one or more case studies, piecing together a map of emerging co-creation

practices in contemporary radio. Contributors describe the rise of a new class of radio listeners: the networked ones. Networked audiences are made up of listeners that are not only able to produce written and audio content for radio and co-create along with the radio producers (even definitively bypassing the central hub of the radio station, by making podcasts), but that also produce social data, calling for an alternative rating system, which is less focused on attention and more on other sources, such as engagement, sentiment, affection, reputation, and influence. What are the economic and political consequences of this paradigm shift? How are radio audiences perceived by radio producers in this new radioscope? What's the true value of radio audiences in this new frame? How do radio audiences take part in the radio flow in this age? Are audiences' interactions and co-creations overrated or underrated by radio producers? To what extent listeners' generated content can be considered a form of participation or free labour exploitation? What's the role of community radio in this new context? These are some of the many issues that this book aims to explore. **Freeing the Presses** Timothy E. Cook, 2006-08-01 Most Americans consider a free press essential to democratic society -- either as an independent watchdog against governmental abuse of power or as a wide-open marketplace of ideas. But few understand that far-reaching public policies have shaped the news citizens receive. In an age when mass communication ranges from independent cable channels to the Internet, it is essential to assess these policies and their effects if we want the media to continue fulfilling their role. *Freeing the Presses*

offers a pathbreaking inquiry into the theory and practice of freedom of the press at a critical time in the growing overlap between modern media and political discussion. Six political communication scholars draw upon history, sociology, political science, legal philosophy, and journalism to investigate whether the freedoms and privileges given to the news media and to reporters actually produce the results we expect. Their discussion covers past, present, and future media performance and engages a wide range of provocative questions.

**Radio Live! Television Live!** Robert L. Mott, 2003-12-11 During the golden age of live radio and television, writers, performers, and producers created their programs in an environment far different from the studios of today. With live programming, anything could happen, and often did. Robert L. Mott, a veteran writer and Emmy-nominated sound effects creator of the live era, recreates the days when television and radio programs were performed live. He includes personal reminiscences as well as a forthright look behind the microphones: horses' hooves were played by coconuts, African-American women were played by white males, and television actors might ad lib an entire program that didn't go as planned. Celebrities like Red Skelton and Jackie Gleason, as well as the unsung heroes in the sound booth and backstage, step up to the mike here. Behind-the-scenes photographs are also included in this account of the exciting--

but not always glamorous--world that was live on the air.

*Radio 2.0* Matthew Lasar, 2016-03-14 Welcome to the uncertain world of Radio 2.0—where podcasts, mobile streaming, and huge music databases are the new reality, as are tweeting deejays and Apple's Siri serving as music announcer—and understand the exciting status this medium has, and will continue to have, in our digitally inclined society. How did popular radio in past decades—from President Franklin D. Roosevelt's Fireside Chats in the 1930s through Top 40 music and Rush Limbaugh's talk radio empire—shape American society? How did devices and systems like the iPhone, Pandora, and YouTube turn the radio industry upside-down? Does radio still have a future, and if so, what will we want it to look like? *Radio 2.0: Uploading the First Broadcast Medium* covers the history and evolution of Internet radio, explaining what came before, where Internet radio came from, and where it is likely headed. It also gives readers a frame of reference by describing radio from its introduction to American audiences in the 1920s—a medium that brought people together through a common experience of the same broadcast—and shows how technologies like digital music and streaming music services put into question the very definition of radio. By examining new radio and media technologies, the book explores an important societal trend: the shift of media toward individualized or personalized forms of consumption.

**The Routledge Companion to Radio and Podcast Studies** Mia Lindgren, Jason Loviglio, 2022-06-15 This comprehensive companion is a much-needed reference source for the expanding field of radio, audio, and podcast study, taking readers through a diverse range of essays examining the core questions and key debates surrounding radio practices, technologies, industries, policies, resources, histories,

and relationships with audiences. Drawing together original essays from well-established and emerging scholars to conceptualize this multidisciplinary field, this book's global perspective acknowledges radio's enduring affinity with the local, historical relationship to the national, and its unpredictably transnational reach. In its capacious understanding of what constitutes radio, this collection also recognizes the latent time-and-space shifting possibilities of radio broadcasting, and of the myriad ways for audio to come to us 'live.' Chapters on terrestrial radio mingle with studies of podcasts and streaming audio, emphasizing continuities and innovations in form and content, delivery and reception, production cultures and aesthetics, reminding us that neither 'radio' nor 'podcasting' should be approached as static objects of analysis but rather as mutually constituting cultural forms. This cutting-edge and vibrant companion provides a rich resource for scholars and students of history, art theory, industry studies, journalism, media and communication, cultural studies, feminist analysis, and postcolonial studies.
