Teaching L2 Composition Dana R. Ferris,John S. Hedgcock,2013-10-01 This popular, comprehensive theory-to-practice text is designed to help teachers understand the task of writing, L2 writers, the different pedagogical models used in current composition teaching, and reading-writing connections. Moving from general themes to specific pedagogical concerns, it includes practice-oriented chapters on the role of genre, task construction, course and lesson design, writing assessment, feedback, error treatment, and classroom language (grammar, vocabulary, style) instruction. Being There Together Ralph Schroeder,2010-11-04 Virtual environments provide places for 'being there together', for avatars to interact with each other in computer-generated spaces. They range from immersive systems in which people have life-size tracked avatar bodies to large-scale spaces such as Second Life where populations of users socialize in persistent virtual worlds. This book draws together research on how people interact in virtual environments: What difference does avatar appearance make? How do avatars collaborate and play together? How do the type of

system and the space affect how people engage with each other? How does interaction between avatars differ from face-to-face interaction? What can social scientists learn from experiments and other studies of how people interact in virtual environments? What are the ethical and social issues in doing this research, and in the uses of this technology? And how do virtual environments differ from other communication technologies such as videoconferencing systems and other new media? This book is a state-of-the art survey of research on these topics, and offers a framework for understanding this technology and its future implications.

Understanding New Media Robert K. Logan, 2010 Marshall McLuhan made many predictions in his seminal 1964 publication, *Understanding Media: Extensions of Man*. Among them were his predictions that the Internet would become a «Global Village», making us more interconnected than television; the closing of the gap between consumers and producers; the elimination of space and time as barriers to communication; and the melting of national borders. He is also famously remembered for coining the expression «the medium is the message». These predictions form the genesis of this new volume by Robert Logan, a friend and colleague who worked with McLuhan. In *Understanding New Media* Logan expertly updates *Understanding Media* to analyze the «new media» McLuhan foreshadowed and yet was never able to analyze or experience. The book is designed to reach a new generation of readers as well as appealing to scholars and students who are familiar with *Understanding Media*.
