Profitable Partnering for Lean Construction Clive Thomas Cain, 2008-04-15 The lean procurement techniques given in this practical guide could save clients up to 40% of total design and construction costs; case history evidence is included to prove that the techniques really work. The guide goes on to explain in equal depth the lean construction techniques that supply-side design and construction firms (including trades contractors) need to adopt to deliver the savings while boosting their profit margins. Written in an accessible style, it explains why lean construction techniques will only deliver this high level of savings if they are underpinned by long-term, strategic, supply-side partnering relationships between consultants, construction contractors, trades contractors and manufacturers. This is a 'how to' book written in terms everyone can understand, without the need for an expert interpreter or costly training.

Copper Sun Sharon M. Draper, 2012-06-19 A Time Best YA Book of All Time (2021) In this "searing work of historical fiction" (Booklist), Coretta Scott King Award-winning author Sharon M. Draper tells the epic story of a young girl torn from her African village, sold into slavery, and stripped of everything she has ever known—except hope. Amari's life was once perfect. Engaged to the handsomest man in her tribe, adored by her family, and fortunate enough to live in a beautiful

village, it never occurred to her that it could all be taken away in an instant. But that was what happened when her village was invaded by slave traders. Her family was brutally murdered as she was dragged away to a slave ship and sent to be sold in the Carolinas. There she was bought by a plantation owner and given to his son as a birthday present. Now, survival is all Amari can dream about. As she struggles to hold on to her memories, she also begins to learn English and make friends with a white indentured servant named Molly. When an opportunity to escape presents itself, Amari and Molly seize it, fleeing South to the Spanish colony in Florida at Fort Mose. Along the way, their strength is tested like never before as they struggle against hunger, cold, wild animals, hurricanes, and people eager to turn them in for reward money. The hope of a new life is all that keeps them going, but Florida feels so far away and sometimes Amari wonders how far hopes and dreams can really take her.

Japan's Modern Divide Hiroshi Hamaya, Kansuke Yamamoto, 2013 This title offers an illustrated overview of the evolution of two very different strains of modern Japanese photography. In the 1930s, Japanese photography evolved in two very directions: one toward a documentary style, the other favouring an experimental, or avant-garde, approach strongly influenced by Western Surrealism. This book explores these two divergent paths through the work of two remarkable figures: Hiroshi Hamaya and Kansuke Yamamoto. Hiroshi Hamaya (1915-1999) was born and raised in Tokyo and, after an initial period of creative experimentation, turned his attention to recording traditional life and culture. He went on to record cultural changes in China, political protests in Japan, and landscapes around the world. Kansuke Yamamoto (1914-1987) became fascinated by the innovative approaches in art and literature exemplified by Western artists such as Man Ray and Magritte. 0Exhibition: Getty Museum, Los Angeles, USA (26.3.-25.8.2013). --

Get Fuzzy 2013 Wall Calendar Darby Conley, 2012-07-15 Each month's art is a full-color Get Fuzzy panel specially redrawn from a great Get Fuzzy strip. The entire original cartoon is also included. Bucky B. Katt takes the expression fighting like cats and dogs to the extreme. He doesn't limit himself: Bucky fights with dogs, with ferrets, with birds, with humans, and he seems to have a particular dislike of monkeys. It's up to owner Rob Wilco and canine Satchel Pooch to deal with

Bucky and to try to keep his aggression and out-of-control ego in check. Fans of Get Fuzzy know that's about as likely as Bucky perfecting the monkey battery, but the result is always super-charged laughs. Big laughs come with the big images in the Get Fuzzy 2013 Wall Calendar. Each month's art is a full-color Get Fuzzy panel specially redrawn from a great Get Fuzzy strip. Standard Guideline for the Collection and Depiction of Existing Subsurface Utility Data ,2003
CI/ASCE Standard 38-02 presents a credible system for classifying the quality of utility location information that is placed in design plans. The Standard addresses issues such as: how utility information can be obtained, what technologies are available to obtain that information; how that information can be conveyed to the information users; who should be responsible for typical collection and depiction tasks; what factors determine which utility quality level attribute to assign to data; and what the relative costs and benefits of the various quality levels are. Used as a reference or as part of a specification, the Standard will assist engineers, project and utility owners, and constructors in developing strategies to reduce risk by improving the reliability of information on existing subsurface utilities in a defined manner.

Mathematical Explorations for the Christian Thinker Jason Vanbilliard, 2014-08-15 What does it mean to learn math from a Christian perspective? This book is ideally suited for a Christian audience who wishes to significantly extend his or her knowledge of mathematics while developing biblical perspectives on the mathematical-philosophical questions posed in each section. Among other compelling issues, readers will wrestle with questions as to the relationships between God, nature, mathematics, and humans. The integration of Christian thought is weaved throughout the text.[**Note: there are two versions of this book. Read below for more details.]Through the mathematics content presented in this book, you will broaden your understanding of geometry by investigating dimensions, fractals, topological equivalence, and other geometries. You will develop your reasoning skills through identifying deception in statistics, discriminating between cause and correlation, evaluating various voting methods, and exploring chaos theory. Finally, you will refine your understanding of numbers and systems through studying prime, figurate, vampire, narcissistic, powerful, abundant, and transcendental numbers. After studying each mathematical topic, you will consider how the topic informs your answers to questions like: Who are we? What is the nature of reality? How do we know if something is true? What is good? What is beautiful? These questions and their related sub-questions have been part of the human experience from the dawn of human history.

Considering how mathematics helps to inform these questions provides for a deeper, more meaningful understanding of mathematics and our world. This book is ideal for:- An undergraduate “Mathematics for Liberal Arts” course at a Christian college- A half-year senior mathematics elective as part of a focus on worldview at a Christian high school - A Christian homeschool family that wishes to extend their children's learning beyond the standard curriculum in a Christian centered context- Anyone interested in extending his or her own understanding of the scope and depth of mathematics Each section features:- Introductory exercises that prompt the reader to recall relevant information or skills- Concept development sections that explain the mathematics for even the math-phobic student- Content sections that connect the mathematics to literature, art, music, science, and other subjects- A “Something to Consider” section that asks the reader to think about related enduring questions from a Christian perspective- “Covering the Reading” questions that help to process the text- “Problems” that require the reader to research and consider the topic more thoroughly[** There is another version of this book titled *The Mathematical Expanse: Excursions into the Enduring Questions*. That version asks many similar questions but is appropriate for a public school setting.]
