**Strategies to Improve Cardiac Arrest Survival** Institute of Medicine,Board on Health Sciences Policy,Committee on the Treatment of Cardiac Arrest: Current Status and Future Directions,2015-09-29 Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. Strategies to

Improve Cardiac Arrest Survival examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of Strategies to Improve Cardiac Arrest Survival provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.

*Chad, a Celebration of Life ~ Beyond a Mother's Memories* Arista, 2020-08-13 "...Literally took my breath away... Beautifully written and descriptive, I was right there on Chad's journey. An American Memoir of life that reminds you what's important, the human heart being one of them. A 5-star read I highly recommend." -Matt D., New York, New York "From NY to Malibu, heart

screenings to homeless soccer tourneys in Austria, the purpose emerges loud and clear - to save the Lives of those who still have a chance at a future. It is crucial to raise awareness for mandatory heart screenings for young athletes! Many testimonials of families affected by sudden cardiac deaths (SCD) won't leave you indifferent. This book is truly a work of Love, filled with tears and laughter, pain and loss, and most of all hope!" -Olena, Los Angeles, California

Chad Alan Butrum loved sports. One day he went out to play football in LA and it would be his last game; he died of Sudden Cardiac Death in Young Athletes. He was just 26 years old. His artist mother Arista takes us on a journey of Love, Life and Laughter, as the young family forges new dreams in Detroit, Chicago, St. Louis, Malibu, and New York City. After Chad's sudden loss to SCD, she discovers through his colleagues at Carolco Pictures the young man Chad was becoming - the promise of a talented creative writer who touched the lives of many people in his short Life. He loved all people- any age, heritage, or orientation. In Part II, the author transcends loss into a quest to save lives by founding the non-profit organization, The Chad Foundation for Athletes and Artists, to safeguard young hearts so they can live long, healthy Lives and reach their most cherished dreams. It also inspires youth to live as Chad did- anti-substance abuse and alcohol-free, Healthy Body/Mind/ Spirit. The Chad Foundation Cardiovascular Screening Program has provided 8,000 Echocardiograms/ECGS in 5 states and, globally, in Austria and Sweden. Many parents who have also lost children to SCD, share

their heartfelt stories within underscoring the critical importance of raising awareness of Sudden Cardiac Death in the Young, implementing preventive heart screenings, knowledge of CPR, and placement of AEDs. It is a journey of the Heart and the discovery that The Heart is the Home of our two greatest gifts—Love and Life—and must be safeguarded as our most valued possession.

*Emerging Pathologies in Cardiology* M.M. Gulizia, 2006-09-19 Clinical practice is evolving at a rapid pace, nowhere more so than in the field of cardiology. Acute Coronary Syndromes, Sudden Cardiac Death, Heart Failure, Atrial Fibrillation, Syncope, and Prevention of Global Cardiovascular Risk are the main Emerging Pathologies to which many investigators are addressing their researches. Less than 10 years ago, some of them were considered of relevance only to internists, and some others as a common benign arrhythmia or an ineluctable illness. Today, their prevalence amongst the population represents one of the major public health problems at the beginning of the third millen- um. The need to have a state of the art overview of the epidemiology, physiopathological and electrogenetic mechanisms, diagnosis, pharmacological or electrical treatment, prognosis, patient management in and

out of hospital,organisational and economical implications of these emerging pathologies and the success of the previous edition inspired us to organise the second edition of this biannual International Meeting. This book contains the Proceedings of the Mediterranean Cardiology Meeting held in Taormina, Italy, 7–9 April 2005. Like the previous volume, it boasts the participation of many nationally and internationally renowned speakers in the field of clinical and interventional cardiology who will interact actively with the delegates.
