*Space-Time Integration in Geography and GIScience* Mei-Po Kwan, Douglas Richardson, Donggen Wang, Chenghu Zhou, 2014-09-18 Space-time analysis is a rapidly growing research frontier in geography, GIS, and GIScience. Advances in integrated GPS/GIS technologies, the availability of large datasets (over time and space), and increased capacity to manage, integrate, model and visualize complex data in (near) real time, offer the GIS and geography communities extraordinary opportunities to begin to integrate sophisticated space-time analysis and models in the study of complex environmental and social systems, from climate change to infectious disease transmission. This volume specifically focuses on research frontiers, comparative research, and research and application interactions in this field in the US and China, arguably the two most dynamic loci for this work today. The contributions to this book, by top researchers in China and the US, productively highlight the differences and similarities in approaches and directions for space-time analysis in the two countries. In light of the recent rapid progress in GIScience research on space-time integration in both countries, the book's focus on research frontiers in these two countries will attract great interest in both countries and in other parts of the world as well as among related disciplines. In addition, the book also explores the impact of collaborative research and publications underway in this area between the US and China and will provide an overview of these collaborative efforts and programs. This book will not only be of interest to university-based GIS researchers and students, but also to those interested in this new area of research and applications like researchers and developers in business, internet mapping and GIS and location based services (LBS).

*Fractional Dynamic Calculus and Fractional Dynamic Equations on Time Scales* Svetlin G. Georgiev, 2018-04-12 Pedagogically organized, this monograph introduces fractional calculus and fractional dynamic equations on time scales in relation to mathematical physics applications and problems. Beginning with the definitions of forward and backward jump operators, the book builds from Stefan Hilger's basic theories on time scales and examines recent developments within the field of fractional calculus and fractional equations. Useful tools are provided for solving differential and integral equations as well as various problems involving special functions of mathematical physics and their extensions and generalizations in one and more variables. Much discussion is devoted to Riemann-Liouville fractional dynamic equations and Caputo fractional dynamic equations. Intended for use in the field and designed for students without an extensive mathematical background, this book is suitable for graduate courses and researchers looking for an introduction to fractional dynamic calculus and equations on time scales.

**Hong Kong's History** Tak-Wing Ngo, 2002-09-11 Rewriting Hong Kong's history from the bottom up, the chapters investigate vital, but hitherto obscured, aspects of the colony's rise. They cover the Chinese collaboration with the colonial regime, legal discrimination and intimidation, rural politics, social movements, government-business relations, industrial policy, flexible manufacturing and colonial historiography. Drawing together contributions from historians, sociologists and political scientists, the book highlights the role played by a variety of social actors in Hong Kong's

history and differs both from recent celebrations of British colonialism and anti-colonial Chinese nationalism.

**China Pluperfect II** Frank Vigneron, 2022-07-01 This book contains analysis of different domains of contemporary art in China seen through the lens of the epistemological changes described in China Pluperfect I: Epistemology of Past and Outside in Chinese Art. It first looks at the concept of “ink art,” describing how it meant different things to different people in the former colony and how these different meanings came to determine certain institutional choices made at the beginning of the 21st century. The following chapters are dedicated to issues related to the urban and rural contexts for art creation in Mainland China and Hong Kong. One chapter observes the ups and downs of the representations of cities in the history of the People’s Republic of China and how they have defined a certain idea of culture. Another looks at how Chinese cities have been exceptional centers of art creations over the last thirty to forty years through the example of Shenzhen where a vibrant art scene, albeit closely connected to Hong Kong which has become a major art hub in the last two decades, has developed. The following is dedicated to the changing fortunes of art making in the countryside, observing how institutions in the Mainland and in Hong Kong have supported these practices very differently. Frank Vigneron finally considers how the different speeds of globalization, slow in the past and fast today, have determined some of the issues of past and outside in the present, particularly in the context of socially engaged art in both the Mainland and Hong Kong.

Chinese Education Models in a Global Age Chung Prudence Chou,Jonathan Spangler,2016-04-06 China's rise, an increasing emphasis on international education benchmarking, and a global recognition of East Asian countries' success in this regard have brought the issue of Chinese education to the forefront of public consciousness. In particular, the concept of a "Chinese education model" is one that has sparked debate and quickly become a major focus of education research around the world, especially in light of regional achievements vis-à-vis university rankings, bibliometric indices, the Programme for International Student Assessment (PISA), Trends in International Mathematics and Science Study (TIMSS), and other such benchmarks. *Chinese Education Models in a Global Age* tackles this controversial issue head on by synthesizing a diversity of analyses from a world-class team of twenty-seven authors. It reveals that Chinese education models, which are present in many different geographic and institutional contexts, have an important influence on social and institutional norms as well as individual belief systems and behaviors in China and beyond. The first of its kind, this edited volume establishes a foundation for future research while providing a nuanced and tightly integrated compilation of differing perspectives on the role and impact of Chinese education models worldwide. It is essential reading for all scholars, policymakers, students, parents, and educators interested in the rising demographic and economic influence of people of Chinese descent on education around the world.

*Foreign Devil Girl in Hong Kong* Ruth Epp,2012-10-01 Early in 1959, Ruth left her home on the South Dakota prairies and traveled by cargo ship to Hong Kong, on the south coast of China. She was answering a call from God. The ships officers smiled in amusement and asked, What do you think a twenty-two-year-old girl like you can do in Hong Kong? She thought she knew until she found herself a foreign devil girl surrounded by poor working class people, whose language, culture, and life experiences were totally foreign to her. God was her only confidante and friend as she struggled to learn how to fulfill her mission. Cantonese is one of the most difficult Chinese dialects to learn, and her teacher didnt know a word of

English. Her attempts to speak sometimes provoked outbursts of hilarious laughter. Such experiences showed her some surprising things about herself and increased her determination to learn to speak Cantonese perfectly. Unexpectedly challenging questions were raised about the God she introduced, and she was hard pressed to find convincing answers. But God blessed her efforts to bring people to him, and helped her as she took time to re-evaluate her own faith. The author tells her story honestly, just as she did long ago in her journal when she recorded the lessons she learned through the successes and failures, joys and sorrows of her first four and a half years in Hong Kong. Her writing gives us an inspiring view of a real God at work in the life of a real person.
