Computing Paul E. Ceruzzi, 2012-06-15 Discover the history of computing through 4 major threads of development in this compact, accessible history covering punch cards, Silicon Valley, smartphones, and much more. In an accessible style, computer historian Paul Ceruzzi offers a broad though detailed history of computing, from the first use of the word "digital" in 1942 to the development of punch cards and the first general purpose computer, to the internet, Silicon Valley, and smartphones and social networking. Ceruzzi identifies 4 major threads that run throughout all of computing's technological development: • Digitization: the coding of information, computation, and control in binary form • The convergence of multiple streams of techniques, devices, and machines • The steady advance of electronic technology, as characterized famously by "Moore's Law" • Human-machine interface The history of computing could be told as the story of hardware and software, or the story of the Internet, or the story of "smart" hand-held devices. In this concise and accessible

account of the invention and development of digital technology, Ceruzzi offers a general and more useful perspective for students of computer science and history.

Arabesque Ben Wittner, Sascha Thoma, N. Bourquin, 2009 Despite their rich tradition of calligraphy, the Arab World and Persia are not known for their contemporary graphic design, illustration and typography. Especially now, it's worth taking a look at the region's creativity. Young designers are just beginning to chart their own compelling course between local visual convention and a modern, international style. Arabesque investigates the creative potential of the Arab World and Iran. This book features examples of recent innovative and groundbreaking design work that is inspired by the richness of the region's visual culture. Given the important role of calligraphy in the Middle East, Arabesque focuses on typography. The book presents a wide range of Arabic fonts and typefaces inspired by traditional calligraphy; these are accompanied by a rich selection of applications. Further examples of design and graffiti serve as powerful demonstrations of how text can be used illustratively. This work is particularly relevant to those now creating street art and poster design. Arabesque also features graphic design, logos and illustration by young designers and activists from Egypt, Iran, Saudi Arabia and the United Arab Emirates, which is complemented by selected projects by Western designers, who are strongly influenced by Arab culture. Regardless of the location and ancestry of their creators, all of the examples included in Arabesque combine modern design with the traditional, letter-based canon of Arab forms in striking ways. Supplemental texts describe the environments in which the featured designers and artists work. Arabesque also includes a CD-ROM that features a typeface created by the book's editors, Ben Wittner and Sascha Thoma.

Migration and the Search for Home Paolo Boccagni, 2016-10-31 This book explores the impact of transnational migration on the views, feelings, and practices of home among migrants. Home is usually perceived as what placidly lies in the background of everyday life, yet migrants' experience tells a different story: what happens to the notion of home, once migrants move far away from their "natural" bases and search for new ones, often under marginalized living conditions? The author analyzes in how far migrants' sense of home relies on a dwelling place, intimate relationships, memories of the past, and aspirations for the future—and what difference these factors make in practice. Analyzing their claims, conflicts, and dilemmas, this book showcases how in the migrants' case, the sense of home turns from an apparently intimate and domestic concern into a major public question.

Kularnava Tantra M. P. Pandit, 2007 The Kularnava is perhaps the foremost Tantra of the Kaula

School and is constantly cited as an authority in Tantric literature. It is worthy of close study by those who would understand the tenets and practice of the tradition of which it is a Sastra. The Introduction by Arthur Avalon gives a concise outline of the work. Sri M.P. Pandit who is a keen student of the Tantras and Vedas has rendered the work in English in eleven chapters. The readings are free translations, with annotations where necessary, omitting technical details but preserving the spirit and essential import of the original in his characteristically lucid style. The Kularnava prescribes the modes of preparation for the high quest; it draws upon ethics, religion, philosophy, yoga to elevate human life gradually to the level of godly life. It comprehends the multiple personality of man and provides for the healthy growth of his mental faculties, purification of his physical faculties through ritual, japa, mantra and upasana. Who is fit for the path of Tantra? Who is competent to guide the novice on the double - edged razor path? What is the responsibility of a Guru to a disciple? These and other relevant questions are raised and answered in a satisfying manner.

adolescents and adults.

Intersectionality, Class and Migration Mastoureh Fathi,2017-10-11 This book offers critical analysis of everyday narratives of Iranian middle class migrants who use their social class and careers to fit in with British society. Based on a series of interviews and participant observations with two cohorts of privileged Iranian migrant women working as doctors, dentists and academics in Britain—groups that are usually absent from studies around migration, marginality and intersectionality—the book applies narrative analysis and intersectionality to critically analyse social class in relation to gender, ethnicity, places and sense of belonging in Britain. As concepts such as Nation, Migrant, Native, Other, Security, and Border have populated public and policy discourse, it is vital to explore migrants' experiences and perceptions of the society in which they live, to answer deceptively simple questions such as What does class mean? and How is class translated in the lives of migrants?

The Politics of Home J. Duyvendak,2011-07-04 This book examines ideas of 'home' of Americans and Western Europeans under the influence of the two major revolutions of our times: the gender revolution and increased mobility due to globalization. It analyzes how 'home' has been politicized, as well as alternative home-making strategies that aim to transcend the 'logic of identities'.

The Hidden Hindu 2 Akshat Gupta,2022-09-05 The first battle is lost. The book of Mritsanjeevani is in the wrong hands but Nagendra's plans are not limited only to immortality. What seemed to be the end of all wars was just the beginning of an incredible journey in search of a hidden verse. Om is still incomplete without the knowledge of his past, but he is not alone anymore. Two of the mightiest

warriors of all time stand by his side. Two mysterious warriors stand unconditionally with Nagendra too or is there a hidden agendas behind all the allies? Who are LSD and Parimal in real and who is Om? Tighten your seat belts for an adventure in search of words that hold a bigger purpose than even immortality for Divinities and Demons.

Gaṇeśapurāṇa Greg Bailey, 2008 This book offers a translation of the seven thousand verses of the second book of the medieval Hindu text, the Ganesa Purana, one of two Puranas dedicated to the important elephant-headed god. In this book the reader is given many narratives about Ganesas ascent to earth in order to kill demonic figures who threaten to overthrow the correct world order. In addition, these narratives contain myths about Ganesa's birth and family as well as some extended and quite humorous myths about ideal devotees of the god. The translation is preceded by a long introduction offering a geographical and historical context for the Ganesa Purana. Following the translation are very extensive notes which bring our points of philological interest, but focus mainly on the literary structure of the text and the methods used to present the many myths and narratives in a coherent and fully integrated manner.

Translocal Geographies Ayona Datta, 2016-02-17 Bringing together a wide range of original empirical research from locations and interconnected geographical contexts from Europe, Australasia, Asia, Africa, Central and Latin America, this book sets out a different agenda for mobility - one which emphasizes the enduring connectedness between, and embeddedness within, places during and after the experience of mobility. These issues are examined through the themes of home and family, neighbourhoods and city spaces and allow the reader to engage with migrants' diverse practices which are specifically local, yet spatially global. This book breaks new ground by arguing for a spatial understanding of translocality that situates the migrant experience

within/across particular 'locales' without confining it to the territorial boundedness of the nation state. It will be of interest to academics and students of social and cultural geography, anthropology and transnational studies.
