Surveillance Society Lyon, David,2001-02-01 This book gives an overview of current research on and developments in surveillance, including closed circuit TV and biometrics, illustrated by empirical examples. Making Taste Public Carole Counihan, Susanne Højlund, 2018-12-13 *Making Taste Public* takes an ethnographic approach to show how social relations shape - and are shaped by - the taste of food. Recognizing that different cultures have different taste preferences and flavour principles embedded in cuisine, editors Carole Counihan and Susanne Højlund ask how these differences are generated. The editors have compiled 14 chapters to show how specific influences become a part of our sensorial apparatus and identity through shared experiences of making, eating, and talking about food. Using case studies from Asia, Europe and America, the book presents a theory of how taste is made public through everyday practices. The authors are exploring how place, production methods and cooking techniques create tastes. They discuss the criteria determining good and bad tastes, and how tastes and memories evolve over time. Subjects such as how values can be embedded in taste, and the role of taste education in food movements, homes, and schools are explored. The different chapters examine definitions and mobilizations of taste in different institutions, public places, and regions around the world to reveal ethnographic understandings of how people learn, experience, and share taste. With contributions spanning the Solomon Islands, Denmark, Japan, Canada, France, the USA, and Italy, *Making Taste Public* is a fascinating account of how our sense of taste is continuously shaped and re-shaped in relation to social and cultural context, societal and environmental premises. The book will interest anyone studying anthropology, sociology, food studies, sensory studies and human geography.

Linked Open Data -- Creating Knowledge Out of Interlinked Data Sören

Auer, Volha Bryl, Sebastian Tramp, 2014-07-31 Linked Open Data (LOD) is a pragmatic approach for realizing the Semantic Web vision of making the Web a global, distributed, semantics-based information system. This book presents an overview on the results of the research project "LOD2 -- Creating Knowledge out of Interlinked Data". LOD2 is a large-scale integrating project co-funded by the European Commission within the FP7 Information and Communication Technologies Work Program. Commencing in September 2010, this 4-year project comprised leading Linked Open Data research groups, companies, and service providers from across 11 European countries and South Korea. The aim of this project was to advance the state-of-the-art in research and development in four key areas relevant for Linked Data, namely 1. RDF data management; 2. the extraction, creation, and enrichment of structured RDF data; 3. the interlinking and fusion of Linked Data from different sources and 4. the authoring, exploration and visualization of Linked Data.

Making Sense in (and Of) the First Christian Century Francis Gerald

Downing, 2000-08-01 The first Christian century must be approached with careful attention to its cultural and linguistic heterogeneity. It should not simply be assumed that this past 'is a different place, they do things differently there'. Downing treats the ways in which early Christians tried to 'make things make sense' within their cultures, noting both the similarities and differences between their ways and contemporary ones and stressing the variety of contexts and influences on first-century communication. Downing brings his renowned expertise to bear in illuminating the cultural features of early Christian society with a range of fascinating and telling examples.

This article will explore the advantages of Op Poster Maker books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Op Poster Maker books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Op Poster Maker versions, you eliminate the need to spend money on physical copies.

Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible

PDF files are designed to retain their formatting regardless of the device used to open them. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Op Poster Maker books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing

cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable

examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents.
