Este libro enseña las técnicas de éxito en la obtención de un puesto de trabajo y las estrategias adaptadas especialmente a una situación de crisis económica. El autor, director de empresas multinacionales y ex catedrático, ha dedicado más de treinta años a investigar y conocer las causas del fracaso o del éxito en la conquista de un empleo las cuales explica detalladamente en esta obra. En ella se aborda, por un lado, cómo descubrir y potenciar los imprescindibles valores de corte psicológico y emocional, así como todo lo que una persona debe conocer sobre los aspectos prácticos que van desde cómo redactar y qué debe incluir un currículum, hasta cómo presentarse en una entrevista de trabajo sabiendo de lo que se debe y no se debe hablar, hasta cómo buscar provechosamente las mejores ofertas de empleo que se ajustan favorablemente a cada perfil. Quizá sea este uno de los libros más útiles de que puede disponer alguien que busca empleo, y útil tanto para un ejecutivo, un abogado, un obrero o un técnico o profesional en cualquier oficio o área laboral. Netflix Nations Ramon Lobato, 2019-01-08 How streaming services and internet distribution have transformed global television culture. Television, once a broadcast medium, now also travels through our telephone lines, fiber optic cables, and wireless networks. It is delivered to viewers via apps, screens large and small, and media players of

all kinds. In this unfamiliar environment, new global giants of television distribution are emerging—including Netflix, the world’s largest subscription video-on-demand service. Combining media industry analysis with cultural theory, Ramon Lobato explores the political and policy tensions at the heart of the digital distribution revolution, tracing their longer history through our evolving understanding of media globalization. Netflix Nations considers the ways that subscription video-on-demand services, but most of all Netflix, have irrevocably changed the circulation of media content. It tells the story of how a global video portal interacts with national audiences, markets, and institutions, and what this means for how we understand global media in the internet age. Netflix Nations addresses a fundamental tension in the digital media landscape – the clash between the internet’s capacity for global distribution and the territorial nature of media trade, taste, and regulation. The book also explores the failures and frictions of video-on-demand as experienced by audiences. The actual experience of using video platforms is full of subtle reminders of market boundaries and exclusions: platforms are geo-blocked for out-of-region users (“this video is not available in your region”); catalogs shrink and expand from country to country; prices appear in different currencies; and subtitles and captions are not available in local languages. These conditions offer rich insight for understanding the actual geographies of digital media distribution. Contrary to popular belief, the story of Netflix is not just an American one. From Argentina to Australia, Netflix’s ascension from a Silicon Valley start-up to an international television service has transformed media consumption on a global scale. Netflix Nations will help readers make sense of a complex, ever-shifting streaming media environment.

Skills and Jobs in Brazil Rita K. Almeida, Truman G. Packard, 2018-07-19

Skills and Jobs in Brazil: An Agenda for Youth is a new report focusing on the challenge of economic engagement among the Brazilian youth. In the context of a fast aging population, Brazil's greatest economic opportunity is to increase its labor productivity, especially that of youth. This report documents important new facts about the extent of the youth economic disengagement, while at school and at work. Today, close to half of the Brazilian youth aged 15-29 years old is not fully economically engaged, because they are neither working nor studying, are studying in schools of poor quality, or are working in informal and precarious jobs. The report shows how the youth prospects in the labor market are dimmed by policies favoring existing workers over new entrants; in addition, it shows how youth are often ill equipped to meet an increasingly challenging labor market. The report suggests new education, skills, and jobs policy changes that Brazil could prioritize moving forward, so that it can take advantage of the last wave of its demographic transition. The report discusses in particular depth policies aiming to increase learning and reduce school dropouts in upper secondary education, and labor market policies that aim to support more effective and faster youth transitions from school to work.

Lean Inception: How to Align People and Build the Right Product Paulo

Caroli, 2019-10-11 Build, Measure and Learn as Steve Blank says: is much more elaborate than putting software into production to see if it works. The Lean Startup movement is very promising, but for many teams it ends up translating into an important question: Yeah, but what to build? In ThoughtWorks, our response has been a process called an inception. We gather together a good sample of the people who will be affected by the product and have an intensive session to set an initial direction, using a series of exercises

focusing on collaboration and the capture of broad goals. We don't attempt a detailed specification, as that is exactly the kind of thing that becomes out of date as soon as code hits production. But we do want to understand what kind of outcomes we are hoping for, the features that we think will drive these outcomes, and how to assess the effectiveness of our product. With *The Lean Inception*, Paulo has captured his experience in running these inceptions over the last decade. In particular it's focused on his work to boil the inception down to its essence, concentrating the activity on a single, if very intensive, week of work. Paulo shares how he makes this work, through writing a product vision, capturing personas, understanding the user journeys, and developing high-level features. The result isn't a detailed plan of work, which we find quickly rots into irrelevance. It is a guiding set of goals to set us off in the right direction. It doesn't plan out a final product, with all the features that our users will need, instead it focuses on an initial product that we can release and learn from - the Minimum Viable Product. - Martin Fowler, Chief Scientist at ThoughtWorks

Our Underachieving Colleges Derek Bok, 2009-02-28 Drawing on a large body of empirical evidence, former Harvard President Derek Bok examines how much progress college students actually make toward widely accepted goals of undergraduate education. His conclusions are sobering. Although most students make gains in many important respects, they improve much less than they should in such important areas as writing, critical thinking, quantitative skills, and moral reasoning. Large majorities of college seniors do not feel that they have made substantial progress in speaking a foreign language, acquiring cultural and aesthetic interests, or learning what they need to know to become active and informed citizens. Overall, despite their vastly increased resources, more powerful technology, and hundreds of new courses, colleges cannot be confident that students are learning more than they did fifty years ago. Looking further, Bok finds that many important college courses are left to the least experienced teachers and that most professors continue to teach in ways that have proven to be less effective than other available methods. In reviewing their educational programs, however, faculties typically ignore this evidence. Instead, they spend most of their time discussing what courses to require, although the lasting impact of college will almost certainly depend much more on how the courses are taught. In his final chapter, Bok describes the changes that faculties and academic leaders can make to help students accomplish more. Without ignoring the contributions that America's colleges have made, Bok delivers a powerful critique--one that educators will ignore at their peril.

Mismatch Unemployment Aysegul Sahin, 2012 We develop a framework where mismatch between vacancies and job seekers across sectors translates into higher unemployment by lowering the aggregate job-finding rate. We use this framework to measure the contribution of mismatch to the recent rise in U.S. unemployment by exploiting two sources of cross-sectional data on vacancies, JOLTS and HWOL, a new database covering the universe of online U.S. job advertisements. Mismatch across industries and occupations explains at most 1/3 of the total observed increase in the unemployment rate, whereas geographical mismatch plays no apparent role. The share of the rise in unemployment explained by occupational mismatch is increasing in the education level.
