The Handbook of Behavior Change Martin S. Hagger,Linda D. Cameron,Kyra Hamilton,Nelli Hankonen,Taru Lintunen,2020-07-23 Social problems in many domains, including health, education, social relationships, and the workplace, have their origins in human behavior. The documented links between behavior and social problems have compelled governments and organizations to prioritize and mobilize efforts to develop effective, evidence-based means to promote adaptive behavior change. In recognition of this impetus, The Handbook of Behavior Change provides comprehensive coverage of contemporary theory, research, and practice on behavior change. It summarizes current evidence-based approaches to behavior change in chapters authored by leading theorists, researchers, and practitioners from multiple disciplines, including psychology, sociology, behavioral science, economics, philosophy, and implementation science. It is the go-to resource for researchers, students, practitioners, and policy makers looking for current knowledge on behavior change and guidance on how to develop effective interventions to change behavior.

Motivation and Self-regulation in Sport and Exercise Chris Englert,Ian Taylor,2021-06-07 The ability to effectively use one's thoughts, emotions and motivation to enhance performance and well-being is one of the most important skills in sport and exercise contexts. Motivation and Self-Regulation in Sport and Exercise explores the theories, research and processes that underpin these self-regulatory and motivational processes. A deeper understanding of motivation and self-regulation has far-reaching implications, from helping individuals to begin an active lifestyle, to seasoned athletes looking for a competitive edge. For the first time, the globally leading researchers in this research field come together to provide their unique, cutting-edge insight into how to exercise or perform more effectively. In doing so, the book provides new insight into established theories of motivation and self-regulation, but also breaks new ground by

inspecting lesser-known or emerging paradigms. This book is intended for all scholars interested in self-regulation and motivation, from undergraduate students to experienced researchers, as well as practicing sport and exercise psychologists, coaches and athletes.

Health Psychology Mark Tarrant, Martin S. Hagger, 2023-11-29 Health Psychology: Revisiting the Classic Studies reflects and expands upon 13 of the most innovative contributions to the field from researchers such as Friedman and Rosenman, Marmot, Kiecolt-Glaser, and Ajzen. This book will familiarise you with the classic studies, spanning a period from the 1950s to 2010s, and show you how they continue to apply to the world today. Revisiting the Classic Studies is a series of texts that introduces readers to the studies in psychology that changed the way we think about core topics in the discipline today. It provokes students to ask more interesting and challenging questions about the field by encouraging a deeper level of engagement both with the details of the studies themselves and with the nature of their contribution. Edited by leading scholars in their field and written by researchers at the cutting edge of these developments, the chapters in each text provide details of the original works and their theoretical and empirical impact, and then discuss the ways in which thinking and research have advanced in the years since the studies were conducted. Mark Tarrant is Professor at the University of Plymouth Martin S. Hagger is Professor at the University of California, Merced and Finland Distinguished Professor (FiDiPro) at University of Jyväskylä.
