**Mental and Physical Handicaps in connection with Overripeness Ovopathy** P.H. Jongbloet,2012-12-06 Parents of children born with mental or physical handicaps, tend to face the physician with questions about the origin of the abnormality concerned and the chance of having another child with the same condition. The physician then finds himself in a difficult situation since the causes of the majority of congenital abnormalities remain as yet unknown. In most cases he has to restrict himself to a mere enumeration of the signs and symptoms encountered or, at best, to a classification of the syndrome at hand. Efforts are frequently made to connect both the somatic aberrations and the mental deficiency with complications during the later stages of pregnancy, at the time of delivery or in the immediate postnatal period. However, a careful search for such items as abnormal dermatoglyphs, or 'degenerative stigmata', and, in particular, a post-mortem examination of the brain, often indicates that the handicap concerned should be ascribed to factors operating long before the time of birth. Theoretically, the causes of abnormalities present at birth can be listed as of a genetic, germinal or peristatic nature. During the past decades special attention has been paid to both genetic and peristatic factors. The purpose of this thesis is to stress the importance of germinal factors, in particular those which, at least in theory, might lead to disturbances in the ripening process of the human egg. We were put on this track by some data concerning the circumstances under which one of our patients presumably had been conceived.

**Veterans and Agent Orange** Institute of Medicine, Division of Health Promotion and Disease Prevention, Committee to Review the Health Effects in Vietnam Veterans of Exposure to Herbicides (Third Biennial Update), 2001-11-13 Veterans and Agent Orange: Update 2000 examines the state of the scientific evidence regarding associations between diseases and exposure to dioxin and other chemical compounds in herbicides used in Vietnam. It is the fourth in a series of comprehensive reviews of epidemiologic and toxicologic studies of the agents used as defoliants during the Vietnam War. Over forty health outcomes in veterans and their children are addressed. Among the report's conclusions is that there is sufficient evidence of a link between exposure and the development of soft-tissue sarcoma, non-Hodgkin's lymphoma, Hodgkin's disease, and chloracne in veterans. Additionally, it found that scientific studies offer limited or suggestive evidence of an association with other diseases in veterans—including Type 2 diabetes, respiratory cancers, prostate cancer, multiple myeloma and some forms of transient peripheral neuropathy—as well as the congenital birth defect spina bifida in veterans' children.

Diagnosis and Management of Polycystic Ovary Syndrome NADIR R. FARID, Evanthia Diamanti-Kandarakis, 2009-02-27 Diagnosis and Management of Polycystic Ovary Syndrome is a comprehensive clinical reference work for primary care physicians, internists, general endocrinologists, obstetricians, gynecologists and students. PCOS is a common but frequently misdiagnosed disease. Many symptoms can be alleviated by early intervention and effective management. Prominent endocrinologists are gathered to detail current research and treatment in this metabolic disorder, affecting a growing population. The chapters are comprehensive, providing cutting edge knowledge on pathogenesis, manifestations, diagnosis and treatment of PCOS. Each chapter will be concise concluding with cogent practice points. The variety of medical issues presenting in PCOS patients result in late referrals or in- appropriate advice. This title will be a tool in a further understanding of the metabolic and genetic basis of PCOS, while providing management strategies.

**Core Curriculum for Maternal-newborn Nursing** Association of Women's Health, Obstetric, and Neonatal Nurses, 2000 This second edition provides the core knowledge required to skillfully carry out all daily clinical responsibilities. Fertility Preservation in Male Cancer Patients John P. Mulhall, Linda D. Applegarth, Robert D. Oates, Peter N. Schlegel, 2013-02-21 Written by international authorities, this book is aimed at clinicians dealing with male patients rendered infertile by cancer therapy.

**Principles and Practice of Fertility Preservation** Jacques Donnez, S. Samuel Kim, 2011-02-03 The specialty of fertility preservation offers patients with cancer, who are rendered infertile by chemo- and radiotherapy, the opportunity to realize their reproductive potential. This gold-standard publication defines the specialty. The full range of techniques and scientific concepts is covered in detail, and the author team includes many of the world's leading experts in the field. The book opens with introductions to fertility preservation in both cancer and non-cancer patients, followed by cancer biology, epidemiology and treatment, and reproductive biology and cryobiology. Subsequent sections cover fertility preservation strategies in males and females, including medical/surgical procedures, ART, cryopreservation and transplantation of both ovarian tissue and the whole ovary, and in-vitro follicle growth and maturation. Concluding chapters address future technologies, as well as ethical, legal and religious issues. Richly illustrated throughout, this is a key resource for all clinicians specializing in reproductive medicine, gynecology, oncology, hematology, endocrinology and infertility.

**Nordic Nutrition Recommendations 2012** Nordic Council of Ministers,2014-03-06 The Nordic countries have collaborated in setting guidelines for dietary composition and recommended intakes of nutrients for several decades through the joint publication of the Nordic Nutrition Recommendations (NNR). This 5th edition, the NNR 2012, gives Dietary Reference Values (DRVs) for nutrients, and compared with earlier editions more emphasis has been put on evaluating the scientific evidence for the role of food and food patterns contributing to the prevention of the major diet-related chronic diseases. Recommendations on physical activity are included and interaction with physical activity has been taken into account for the individual nutrient recommendations wherever appropriate. A chapter on sustainable food consumption has been added. A Nordic perspective has been accounted for in setting the reference values. The NNR 2012 has used an evidence-based and transparent approach in assessing associations between nutrients and foods and certain health outcomes. Systematic reviews form the basis for the recommendations of several nutrients and topics, while a less stringent update has been done for others. The systematic reviews and individual chapters have been peer reviewed and the systematic reviews are published in the Food & Nutrition Research journal. The draft chapters were subject to an open public consultation. Recommendations have been changed only when sufficient scientific evidence has evolved since the 4th edition. The primary aim of the NNR 2012 is to present the scientific background of the recommendations and their application. A secondary aim is for the NNR 2012 to function as a basis for the national recommendations that are adopted by the individual

*Veterans and Agent Orange* Committee to Review the Health Effects in Vietnam Veterans of Exposure to Herbicides, Institute of Medicine,1994-01-15 Have U.S. military personnel experienced health problems from being exposed to Agent Orange, its dioxin contaminants, and other herbicides used in Vietnam? This definitive volume summarizes the strength of the evidence associating exposure during Vietnam service with cancer and other health effects and presents conclusions from an expert panel. *Veterans and Agent Orange* provides a historical review of the issue, examines studies of populations, in addition to Vietnam veterans, environmentally and occupationally exposed to herbicides and dioxin, and discusses problems in study methodology. The core of the book presents What is known about the toxicology of the herbicides used in greatest quantities in Vietnam. What is known about assessing exposure to herbicides and dioxin. What can be determined from the wide range of epidemiological studies conducted by different authorities. What is known about the relationship between exposure to herbicides and dioxin, and cancer, reproductive effects, neurobehavioral disorders, and other health effects. The book describes research areas of continuing concern and offers recommendations for further research on the health effects of Agent Orange exposure among Vietnam veterans. This volume will be critically important to both policymakers and physicians in the federal government, Vietnam veterans and their families, veterans organizations, researchers, and health professionals.

*Veterans and Agent Orange* Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee to Review the Health Effects in Vietnam Veterans of Exposure to Herbicides (Fourth Biennial Update),2003-01-23 This book updates and evaluates the available scientific evidence regarding statistical associations between diseases and exposure to dioxin and other chemical compounds in herbicides used in Vietnam, focusing on new scientific studies and literature.

**Genetics of Male Infertility** Mohamed Arafa, Haitham Elbardisi, Ahmad Majzoub, Ashok Agarwal,2020-03-14 This unique, case-

based guide provides a thoughtful and comprehensive overview of the genetic basis of male infertility for the practicing clinician. In addition to discussing the molecular foundations of sperm production and the consequences of genetic abnormalities on various stages of sperm development, it examines the clinical aspects of acknowledged genetic disorders and their implications on male fertility. In so doing, it offers the necessary tools required by the clinician for the diagnosis and treatment of infertile men with genetic abnormalities. Moreover, it provides essential algorithms that may aid in counseling patients in the clinic. The text is arranged in four thematic sections for easy reference. The genetic foundation of male reproduction is presented in part 1, including regulation of sperm production, the structure of sperm chromatin, and spermatogenesis. The impact of genetic abnormalities on male infertility is the subject of part 2, covering sperm defects, mitochondrial function and DNA fragmentation. The clinical case material in part 3 illustrates real-world examples of genetic etiologies and the current diagnostic and therapeutic strategies for conditions such as vas asplasia, cryptorchidism, immotile cilia syndrome, sperm aneuploidy and other challenging scenarios. Casting forward, the fourth and final section presents an overview of future possibilities for management of genetic causes of male infertility, including gene editing. Fully exploring the clinical context of these genetic conditions in a practical manner that appeals to the practicing clinician, *Genetics of Male Infertility* is an exciting and essential text for reproductive medicine specialists, andrologists, urologists, researchers and all other clinicians treating infertile patients.

**Aristotle's Animals in the Middle Ages and Renaissance** Carlos G. Steel, Guy Guldentops, Pieter Beullens, 1999 Aristotle's zoological writings with their wealth of detailed investigations on diverse species of animals have fascinated medieval and Renaissance culture. This volume explores how these texts have been read in various traditions (Arabic, Hebrew, Latin), and how they have been incorporated in different genres (in philosophical and scientific treatises, in florilegia and encyclopedias, in theological symbolism, in moral allegories, and in manuscript illustrations). This multidisciplinary and multilinguistic approach highlights substantial aspects of Aristotle's animals.

**Broiler Breeder Production** S. Leeson, J.D. Summers, 2010-04-01 A comprehensive review of all aspects of commercial production systems, this book provides an up-to-date look at all aspects of broiler breeder production and management, starting with specialized genetic programs as developed by the primary breeders and ending with two chapters on very practical, hands-on aspects of breeder management, including extensive coverage of health management, feeding systems, environmental control, lighting programs and all aspects of male and female reproduction. Recognizing the diversity of management systems worldwide, the authors have included breeders in both temperate and warm climates and also for controlled environment vs. curtain-sided housing systems. This unique publication is an essential reference for all professionals involved in broiler breeder production.

**Veterans and Agent Orange** Institute of Medicine, Committee to Review the Health Effects in Vietnam Veterans of Exposure to Herbicides (Second Biennial Update), 2000-01-22 Third in a series of six congressionally mandated studies occurring biennially, this book is an updated review and evaluation of the available scientific evidence regarding the statistical association between exposure to herbicides used in Vietnam and various adverse health outcomes suspected to be linked with such exposures. As part of the review, the committee convened a workshop at which issues surrounding the reanalysis and the combination of existing data on the health effects of herbicide and dioxin exposure were addressed. This book builds upon the information developed by the IOM committees responsible for the 1994 original report, *Veterans and Agent Orange*, and *Veterans and Agent Orange: Update 1996*, but will focus on scientific

studies and other information developed since the release of these reports. The two previous volumes have noted that sufficient evidence exists to link soft tissue sarcoma, non-Hodgkin's lymphoma, Hodgkin's disease, and chloracne with exposure. The books also noted that there is limited or suggestive evidence to show an association with exposure and a neurological disorder in veterans and with the congenital birth defect spina bifida in veterans' children. This volume will be critically important to both policymakers and physicians in the federal government, Vietnam veterans and their families, veterans organizations, researchers, and health professionals.

*Managing Motherhood, Managing Risk* Denise Allen, 2009-10-22 In *Managing Motherhood, Managing Risk*, Denise Roth Allen persuasively argues that development interventions in the Third World often have unintended and unacknowledged consequences. Based on twenty-two months of fieldwork in the Shinyanga Region of west central Tanzania, this rich and engaging ethnography of women's fertility-related experiences highlights the processes by which a set of seemingly well-intentioned international maternal health policy recommendations go awry when implemented at the local level. An exploration of how threats to maternal health have been defined and addressed at the global, national, and local levels, *Managing Motherhood, Managing Risk* presents two contrasting, and oftentimes competing, definitions of risk: those that form the basis of international recommendations and national maternal health policies and those that do not. The effect that these contrasting definitions of risk have on women's fertility-related experiences at the local level are explored throughout the book. This study employs an innovative approach to the analysis of maternal health risk, one that situates rural Tanzanian women's fertility-related experiences within a broader historical and sociocultural context. Beginning with an examination of how maternal health risk was defined and addressed during the early years of British colonial rule in Tanganyika and moving to a discussion of an internationally conceived maternal health initiative that was launched on the world stage in the late 1980s, the author explores the similarities in the language used and solutions proposed by health development experts over time. This set of official maternal health risks is then compared to an alternative set of risks that emerge when attention is focused on women's experiences of pregnancy and childbirth at the local level. Although some of these latter risks are often spoken about as deriving from spiritual or supernatural causes, the case studies presented throughout the second half of the book reveal that the concept of risk in the context of pregnancy and childbirth is much more complex, involving the interplay of spiritual, physical, and economic aspects of everyday life.
