Maritime Cross-Border Insolvency under the UNCITRAL Model Law Regime Jingchen Xu,2020-12-10 This book covers the pressing issues of cross-border cases involving admiralty and bankruptcy law. For example, what should happen when a shipowner files an insolvency proceeding in one country, while at the same time facing an in rem action against its vessel in another country? Should the in rem action arising in one country be stayed or dismissed because of the existence of insolvency proceedings in another country? The book discusses the relevant issues regarding the treatment of maritime creditors throughout insolvency proceedings, the determination of the 'centre of main interest' of an offshore shipping company, and the scope of a debtor's assets. The author uses a comparative law analysis, selecting four leading

shipping countries – Australia, the UK, the US, and Singapore – and examines their approaches to the above three problems when applying the UNCITRAL Model Law regime. The book also proposes a solution to help eliminate the ambiguity arising from maritime cross-border insolvency cases under the UNCITRAL Model Law regime, with a view to enhancing the development of the shipping industry.

Major Companies of Europe, 1999 Graham & Whiteside, 1998

This annual directory has been revised and updated for 1999 to provide a comprehensive source of information on the major public and private companies of Western Europe. It includes detailed information on each of the 24,000 companies featured over the four volume set.

Lloyd's Maritime Directory ,2008

Maritime Law Yvonne Baatz, 2017-09-19 Now in its fourth edition, this authoritative guide covers all of the core aspects of maritime law in one distinct volume. Maritime Law is written by a team of leading academics and practitioners, each expert in their own field. Together, they provide clear, concise and fully up-to-date coverage of topics ranging from bills of lading to arrest of ships, all written in an accessible and engaging style. As English law is

heavily relied on throughout the maritime world, this book is grounded in English law whilst continuing to analyse the key international conventions currently in force. Brand new coverage includes: The entry into force of the Hague Convention on Choice of Court Agreements, 2005 and greater detail on Regulation (EU) No 1215/2012 of the European Parliament and of the Council of 12 December 2012 on jurisdiction and the recognition and enforcement of judgments in civil and commercial matters (recast). The entry into force of the Nairobi International Convention on the Removal of Wrecks, 2007. Discussion on the Arctic Sunrise and Duzgit Integrity arbitrations and the Enrica Lexie Incident (Italy v India), Provisional Measures in the International Tribunal for the Law of the Sea. Analysis of the Insurance Act 2015. Comment on recent cases including London Steam Ship Owners Mutual Insurance Association Ltd v Spain (The Prestige) and PST Energy 7 Shipping LLC v OW Bunker Malta Ltd (The Res Cogitans). This book is a comprehensive reference source for students, academics and legal practitioners worldwide, especially those new to maritime law or a particular field therein.

Freight Forwarding and Multi Modal Transport Contracts David Glass, 2013-07-18 Freight Forwarding and Multimodal Transport

Contracts, 2nd Edition, is a comprehensive guide to the law in relation to contract forms and terms created by operators, trade associations or international bodies such as the UN and used as a basis for trading conditions by freight forwarders, logistics suppliers, combined or multimodal transport operators and container operators. This second edition examines the latest editions of contract forms and terms, both where their object is the supply or procurement of multimodal carriage, as well as where they are directed to the use of combined transport equipment (ie containers, swap bodies). Of particular prominence will be a detailed examination of the latest versions of conditions used by the principal UK forwarding, logistics, intermodal and container operators such as the British International Freight Association (BIFA) conditions 2005A and the current Freightliner Conditions as well as updates on many of the conditions in use and legal developments relevant to them, eg Road Haulage Association Conditions 2009, Maersk Conditions of Carriage, TT Club Conditions.

Jurisdiction and Arbitration Agreements in Contracts for the Carriage of Goods by Sea Jonatan Echebarria

Fernández, 2021-03-09 Jurisdiction and Arbitration Agreements in

Contracts for the Carriage of Goods by Sea focuses on party autonomy and its limitations in relation to jurisdiction and arbitration clauses included in contracts for the carriage of goods by sea in case of any cargo dispute. The author takes the perspective of the shipping companies and the shipowners, as these are the driving forces of the shipping industry due to their strategic importance. The book provides an analysis of the existing law on the recognition and validity of jurisdiction and arbitration clauses in the contracts for the carriage of goods by sea. The author also seeks to provide conclusions and to learn lessons for the future of the non-recognition and the non-enforcement of the clauses in the existing fragmented legal framework at an international, European Union, and national level (England & Wales and Spain). The interface between the different legal regimes reveals the lack of international harmonisation and the existence of ‘forum shopping’ when a cargo interest sues the shipowner or the party to whom the shipowner charters the vessel. This concise book provides a useful overview of existing research, for students, scholars and shipping lawyers

The Carriage Of Goods By Sea Under The Rotterdam Rules

Rhidian Thomas, 2017-09-19 This book is based on papers presented at the Sixth International Colloquium organised by the Institute of International Shipping and Trade Law, Swansea University, in September 2009. The sixteen contributions have been written by a team of international experts who collectively submit the newly proposed Rotterdam Rules to a sustained, penetrating and comprehensive analysis. The scale of the Rotterdam Rules is staggeringly wide, as also are their detail and complexity, and coming to a full understanding of the provisions and implications of the Rules represents a challenge even to those experienced in the law and practice of commercial shipping. This book examines virtually all aspects of the Rules and will provide an effective, reliable and readable guide to everyone seeking a complete grasp of the Rules.

Kompass, 2002

Landlubbers and Sea Dogs Henrik Sornn-Friese, Carsten Ørts Hansen, 2012 This book provides an authoritative analysis of how increasing globalization in the maritime sector challenges the entwined shipping communities of traditional maritime nations. Through an empirical analysis of developments in labor mobility within the maritime sector in Denmark it shows that the shipping

companies have been significant providers of competence to the national maritime skills base, but also that their current global factor sourcing choices threaten to dissolve this skills base. These findings have important implications regarding productivity, growth and competitiveness for policy makers and companies in the maritime domain.--Publisher's website
