Inferno Robert A. Ferguson,2014-03-03 An Open Letters Monthly Best Nonfiction Book of the Year
America's criminal justice system is broken. The United States punishes at a higher per capita rate than any other country in the world. In the last twenty years, incarceration rates have risen 500 percent. Sentences are harsh, prisons are overcrowded, life inside is dangerous, and rehabilitation programs are ineffective. Looking not only to court records but to works of philosophy, history, and literature for illumination, Robert Ferguson, a distinguished law professor, diagnoses all parts of a now massive, out-of-control punishment regime. "If I had won the \$400 million Powerball lottery last week I swear I would have ordered a copy for every member of Congress, every judge in America, every prosecutor, and every state prison official and lawmaker who controls the life of even one of the millions of inmates who exist today, many in inhumane and deplorable conditions, in our nation's prisons." —Andrew Cohen, *The Atlantic* "Inferno is a passionate, wide-ranging effort to understand and challenge...our heavy reliance on imprisonment. It is an important book, especially for those (like me) who are inclined towards avoidance and tragic complacency...[Ferguson's] book is too balanced and thoughtful to be disregarded." —Robert F. Nagel, *Weekly Standard*

Computational Logic and Set Theory Jacob T. Schwartz,Domenico Cantone,Eugenio G. Omodeo,2011-07-16 This must-read text presents the pioneering work of the late Professor Jacob

(Jack) T. Schwartz on computational logic and set theory and its application to proof verification techniques, culminating in the ÆtnaNova system, a prototype computer program designed to verify the correctness of mathematical proofs presented in the language of set theory. Topics and features: describes in depth how a specific first-order theory can be exploited to model and carry out reasoning in branches of computer science and mathematics; presents an unique system for automated proof verification in large-scale software systems; integrates important proof-engineering issues, reflecting the goals of large-scale verifiers; includes an appendix showing formalized proofs of ordinals, of various properties of the transitive closure operation, of finite and transfinite induction principles, and of Zorn's lemma.

Excavation of the Iron Age, Roman and Medieval settlement at Gorhambury, St Albans

David S Neal,Angela Wardle,Jonathan Hunn,2012-01-15 Gorhambury, just north of Verulamium, was the site of a substantial Roman villa complex which was excavated between 1972 and 1982 as part of a programme designed to test the interrelationships between villa sites in the Verulamium area and to examine trends in their growth, decline and prosperity. The villa was found to have grown out of a settlement belonging to the late Iron Age. A series of ditches of this phase enclosed an aisled barn, a nine-post granary and a circular house; these were the beginnings of a sequence of structures on the same spot which show increasing signs of Roman influence, all of which lay within the limits of the

farmstead established at this early period. Timber buildings of the first half of the first century were followed around AD100, by a small but luxurious villa, rebuilt in the late second century, and thereafter in a gradual decline until its apparent abandonment around AD 350. Work on virtually the whole of the farmstead area has enabled a full sequence of plans of the main houses and all the ancillary structures - including barns, subsidiary housing and bath-houses - to be presented in the report. The catalogue of finds is an attempt to show the full range of material recovered from this working farmstead.

Artificial Intelligence in Music, Sound, Art and Design Colin Johnson, Nereida Rodríguez-Fernández, Sérgio M. Rebelo, 2023-03-31 This book constitutes the refereed proceedings of the 12th European Conference on Artificial Intelligence in Music, Sound, Art and Design, EvoMUSART 2023, held as part of Evo* 2023, in April 2023, co-located with the Evo* 2023 events, EvoCOP, EvoApplications, and EuroGP. The 20 full papers and 7 short papers presented in this book were carefully reviewed and selected from 55 submissions. They cover a wide range of topics and application areas of artificial intelligence, including generative approaches to music and visual art, deep learning, and architecture.

Heterogenous Computational Intelligence in Internet of Things Pawan Singh, Prateek Singhal, Pramod Kumar Mishra, Avimanyou K. Vatsa, 2023-10-23 We have seen a sharp increase in the development of data transfer techniques in the networking industry over the past few years. We can see that the photos are assisting clinicians in detecting infection in patients even in the current COVID-19 pandemic condition. With the aid of ML/AI, medical imaging, such as lung X-rays for COVID-19 infection, is crucial in the early detection of many diseases. We also learned that in the COVID-19 scenario, both wired and wireless networking are improved for data transfer but have

network congestion. An intriguing concept that has the ability to reduce spectrum congestion and continuously offer new network services is providing wireless network virtualization. The degree of virtualization and resource sharing varies between the paradigms. Each paradigm has both technical and non-technical issues that need to be handled before wireless virtualization becomes a common technology. For wireless network virtualization to be successful, these issues need careful design and evaluation. Future wireless network architecture must adhere to a number of Quality of Service (QoS) requirements. Virtualization has been extended to wireless networks as well as conventional ones. By enabling multi-tenancy and tailored services with a wider range of carrier frequencies, it improves efficiency and utilization. In the IoT environment, wireless users are heterogeneous, and the network state is dynamic, making network control problems extremely difficult to solve as dimensionality and computational complexity keep rising quickly. Deep Reinforcement Learning (DRL) has been developed by the use of Deep Neural Networks (DNNs) as a potential approach to solve high-dimensional and continuous control issues effectively. Deep Reinforcement Learning techniques provide great potential in IoT, edge and SDN scenarios and are used in heterogeneous networks for IoT-based management on the QoS required by each Software Defined Network (SDN) service. While DRL has shown great potential to solve emerging problems in complex wireless network virtualization, there are still domain-specific challenges that require further study, including the design of adequate DNN architectures with 5G network optimization issues, resource discovery and allocation, developing intelligent mechanisms that allow the automated and dynamic management of the virtual communications established in the SDNs which is considered as research perspective.

Mobile Technology for Children Allison Druin,2009-03-16 Children are one of the largest new user groups of mobile technology -- from phones to micro-laptops to electronic toys. These products are both lauded and criticized, especially when it comes to their role in education and learning. The need has never been greater to understand how these technologies are being designed and to evaluate their impact worldwide. Mobile Technology for Children brings together contributions from leaders in industry, non-profit organizations, and academia to offer practical solutions for the design and the future of mobile technology for children. *First book to present a multitude of voices on the design, technology, and impact of mobile devices for children and learning *Features contributions from leading academics, designers, and policy makers from nine countries, whose affiliations include Sesame Workshop, LeapFrog Enterprises, Intel, the United Nations, and UNICEF *Each contribution and case study is followed by a best practice overview to help readers consider their own research and design and for a quick reference
