Selected Works of Richard P. Stanley Victor Reiner,2017-05-17 Richard Stanley's work in combinatorics revolutionized and reshaped the subject. Many of his hallmark ideas and techniques imported from other areas of mathematics have become mainstays in the framework of modern combinatorics. In addition to collecting several of Stanley's most influential papers, this volume also includes his own short reminiscences on his early years, and on his celebrated proof of The Upper Bound Theorem.

Stanley Cavell and Film Catherine Wheatley,2019-07-25 “Film is made for philosophy,” asserted Stanley Cavell. In addition to his work on scepticism, morality, and the intentions and meanings of ordinary language, the American philosopher wrote fascinatingly about cinema, arguing that film can reveal new ground for thinking through old philosophical problems. In this book, Catherine Wheatley draws upon Cavell's explicitly film-inspired works, key philosophical concepts and autobiographical writings, examining his analyses of films from Hollywood's Golden Age, the French New Wave, contemporary action cinema, silent film heroes Chaplin and Keaton, directors Cocteau and Hitchcock, and performers Greta Garbo and Ginger Rogers. Revealing the ways in which Cavell's thinking was shaped by the movies, Wheatly poses the question: what was it about film that taught the philosopher how best to live in the world?

Transatlantic Literature and Author Love in the Nineteenth Century Paul Westover,Ann Wierda Rowland,2016-09-22 This book is about Anglo-American literary heritage. It argues that readers on both sides of the Atlantic shaped the contours of international ‘English’ in the 1800s, expressing love for books and authors in a wide range of media and social practices. It highlights how, in the wake of American independence, the affection bestowed on authors who became international objects of celebration and commemoration was a major force in the invention of transnational ‘English’ literature, the popular canon defined by shared language and tradition. While love as such is difficult to quantify and recover, the records of such affection survive not just in print, but also in other media: in monuments, in architecture, and in the ephemera of material culture. Thus, this collection brings into view a wide range of nineteenth-century expressions of love for literature and its creators.
