J. Gogarty

Real Art! Douglas Brenner, Nancy Stahl, 2004 Yes you can! Give the gift of art. Give the gift of creativity. Give the gift of fun. Because now we can all paint with the best of them. Drawn from the annals of America's fondly remembered pastimes, Real Art! is an all-new, cleverly designed paint by number kit and the coolest gift of the season. Open the box and discover everything an artist needs to create a gallery of paintings suitable for framing--ten white canvas boards, 18 oversized pots of acrylic paint, and two brushes, one narrow and one medium. The images, newly created by artist Nancy Stahl, are iconic: a still life of luscious pears. A clipper ship in full sail. Tropical parrots in a study of exuberant hue. The geisha. The bustling street scene. And two bona fide masterpieces: van Gogh's Sunflowers and, yes, the Mona Lisa. Plus, pulling the full experience together is a 64-page full-color book of history, appreciation, and instruction. Illustrated throughout, it traces the canon of PBN subjects and artists, including the original brouhaha over its place in the culture; and provides a how-to-paint primer--including how to improvise, from choosing a varied color palette to leaving parts of the canvas blank, à la Warhol; plus tips on displaying your work and, ultimately, becoming a PBN collector.

Games Magazine Presents Paint by Numbers Games Magazine, 1994-07-15 Paint by Numbers is the most exciting new kind of puzzle to come along in many years. These picture logic puzzles already have a following of millions of devoted fans in Japan, where they were invented five years ago. And now Games, the magazine that introduced Paint by Numbers to the United States last year, proudly brings you an English-language version of the Japanese book that started the craze. The concept is brilliantly simple. You start with an empty grid; numbers above and to the side tell you how many squares in each row and column should be filled in. The trick is that the numbers don't tell you which squares to fill in -- that's for you to determine through logical reasoning and by working back and forth between the rows and columns. When you complete the puzzle correctly, you'll find you've made a picture! Complete instructions and some time-saving tips are included at the front of this book, along with 123 puzzles ranging from easy to very challenging. This book will give every puzzle fan many satisfying hours of entertainment.

Painting by Numbers Diana Seave Greenwald, 2021-02-16 A pathbreaking history of art that uses digital research and economic tools to reveal enduring inequities in the formation of the art historical canon Painting by Numbers presents a groundbreaking blend of art historical and social scientific methods to chart, for the first time, the sheer scale of nineteenth-century artistic production. With new quantitative evidence for more than five hundred thousand works of art, Diana Seave Greenwald provides fresh insights into the nineteenth century, and the extent to which art historians have focused on a limited—and potentially biased—sample of artwork from that time. She addresses long-standing questions about the effects of industrialization, gender, and empire on the art world, and she models more expansive approaches for studying art history in the age of the digital humanities. Examining art in France, the United States, and the United Kingdom, Greenwald features datasets created from indices and exhibition catalogs that—to date—have been used primarily as finding aids. From this body of information, she reveals the importance of access to the countryside for painters showing images of nature at the Paris Salon, the ways in which time-consuming domestic responsibilities pushed women artists in the United States to work in lower-prestige genres, and how images of empire were largely absent from the walls of London's Royal Academy at the height of British imperial power. Ultimately, Greenwald considers how many works may have been excluded from art historical inquiry and shows how data can help reintegrate them into the history of art, even after such pieces have disappeared or faded into obscurity. Upending traditional perspectives on the art historical canon, Painting by Numbers offers an innovative look at the nineteenth-century art world and its legacy.

Painting by Numbers David J. Mabberley, 2017 Ferdinand Bauer is seen by many as the greatest natural history painter of all time. Hand-picked by Joseph Banks, in 1801-1805 Bauer accompanied Matthew Flinders

during his circumnavigation of Australia, and lived in New South Wales and Norfolk Island. Already celebrated in Europe for the precision and beauty of his paintings, Bauer perfected the technique of sketching and color-coding in the field, and then coloring later -- painting by numbers. This fascinating new study of Bauer's work includes reproductions of never-before-published works from collections in Europe and Australia. Written by one of the world's foremost botanical scholars, Painting by Numbers reveals Bauer's innovative color-coding technique for the first time.

Van Gogh Starry Night Vincent van Gogh, Federico Castelli Gattinara, 2004 This title is one in a series presenting four masterpieces by four immortal nineteenth-century French painters. Each miniature book faithfully reproduces its title painting on the front cover, and is packaged in a handsome slipcase that doubles as a picture frame. The frame can stand up on a desk or tabletop or be hung on the wall to display the book cover's striking painting. Each book's interior discusses its title painting, describing the artist's approach to his work, analyzing the picture's fine points, and showing close-up details from the painting. A final two-page spread presents a timeline capsule biography that lists significant events in the painter's life. Van Gogh--Starry Night shows and discusses Vincent Van Gogh's masterpiece, which is a mystically glowing nighttime landscape, and ranks today as one of the artist's most popular and beloved paintings.

Full-Contact Leadership Edward Flood, Anthony Avillo, 2017-07-17 Full-Contact Leadership is written for men and women who hold leadership positions or aspire to leadership roles in the fire service. There are many leadership positions in the fire service, but not all of them are held by leaders. Leadership has very little to do with the color of your helmet, the bling on your collar, the stripes on your sleeve, the title on your door, the order of march, or the crease in your pants. Full-contact leadership is a commitment to drawing out the very best within others and allowing the very best in others to be expressed as excellence. Full-contact leadership is a career-long, ever-challenging, never-ending, self-initiated, self-sustained personal research, development, and improvement program. Full-contact leadership is never about you; it's always about them. In Full-Contact Leadership, Chiefs Flood and Avillo examine what makes a leader and, more importantly, what makes a leader effective in today's fire service. This text discusses the various types of leaders, how they communicate, discipline, delegate, motivate, and set expectations for the people they lead. Flood and Avillo also take a hard look at what hinders or blocks effective leadership and what steps to take to foster and instill leadership in your department.
