Postwar Tony Judt, 2006-09-05 Finalist for the Pulitzer Prize • Winner of the Council on Foreign Relations Arthur Ross Book Award • One of the New York Times' Ten Best Books of the Year "Impressive . . . Mr. Judt writes with enormous authority." –The Wall Street Journal "Magisterial . . . It is, without a doubt, the most comprehensive, authoritative, and yes, readable postwar history." –The Boston Globe Almost a decade in the making, this much-anticipated grand history of postwar Europe from one of the world's most esteemed historians and intellectuals is a singular achievement. Postwar is the first modern history that covers all of Europe, both east and west, drawing on research in six languages to sweep readers through thirty-four nations and sixty years of political and cultural change—all in one integrated, enthralling narrative. Both intellectually ambitious and compelling to read, thrilling in its scope and delightful in its small details, Postwar is a rare joy. Judt's book, *Ill Fares the Land*, republished in 2021 featuring a new preface by bestselling author of *Between the World and Me* and *The Water Dancer*, Ta-Nehisi Coates.

Sapiens Yuval Noah Harari, 2015-02-10 New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of

what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

Fortress of the Muslim ,2000

The Making of Oliver Cromwell Ronald Hutton,2021
The first volume in a pioneering account of Oliver Cromwell--providing a major new interpretation of one of the greatest figures in history Oliver

Cromwell (1599-1658)--the only English commoner to become the overall head of state--is one of the great figures of history, but his character was very complex. He was at once courageous and devout, devious and self-serving; as a parliamentarian, he was devoted to his cause; as a soldier, he was ruthless. Cromwell's speeches and writings surpass in quantity those of any other ruler of England before Victoria and, for those seeking to understand him, he has usually been taken at his word. In this remarkable new work, Ronald Hutton untangles the facts from the fiction. Cromwell, pursuing his devotion to God and cementing his Puritan support base, quickly transformed from obscure provincial to military victor. At the end of the first English Civil War, he was poised to take power. Hutton reveals a man who was both genuine in his faith and deliberate in his dishonesty--and uncovers the inner workings of the man who has puzzled biographers for centuries.

STORIES FROM THE HADITH MAULANA MUHAMMAD ZAKARIA IQBAL, 2010-01-01

The German Language in a Changing Europe Michael G. Clyne, 1995-11-16 Recent sociopolitical events have profoundly changed the status and functions of German and influenced its usage. In this study (published by Cambridge in 1984) Michael Clyne revises and expands his original analysis of the German language in Language and Society in the German-speaking Countries in the light of such changes as the end of the Cold War, German unification, the redrawing of the map of Europe, increasing European integration, and the changing

self-images of Austria, Switzerland and Luxembourg. His discussion includes the differences in the form, function and status of the various national varieties of German; the relation between standard and non-standard varieties; gender, generational and political variation; Anglo-American influence on German; and the convergence of east and west. The result is a wide-ranging exploration of language and society in the German-speaking countries, all of which have problems or dilemmas concerning nationhood or ethnicity which are language-related and/or language-marked.

Annals of the History and Philosophy of Biology
10/2005 ,2006 The name DGGTB (Deutsche Gesellschaft für Geschichte und Theorie der Biologie; German Society for the History and Theory of Biology) reflects recent history as well as German tradition. The Society is a relatively late addition to a series of German societies of science and medicine that began with the »Deutsche Gesellschaft für Geschichte der Medizin und der Naturwissenschaften«, founded in 1910 by Leipzig University's Karl Sudhoff (1853-1938), who wrote: »We want to establish a ,German' society in order to gather German-speaking historians together in our special disciplines so that they form the core of an international society...«. Yet Sudhoff, at this time of burgeoning academic internationalism, was »quite willing« to accommodate the wishes of a number of founding members and »drop the word German in the title of the Society and have it merge with an international society«. The founding and naming of the Society at that time derived from a specific set of historical circumstances, and the same was true some 80 years later when in 1991, in the wake of German reunification, the »Deutsche Gesellschaft für Geschichte und Theorie

der Biologie« was founded. From the start, the Society has been committed to bringing studies in the history and philosophy of biology to a wide audience, using for this purpose its *Jahrbuch für Geschichte und Theorie der Biologie*. Parallel to the *Jahrbuch*, the *Verhandlungen zur Geschichte und Theorie der Biologie* has become the by now traditional medium for the publication of papers delivered at the Society's annual meetings. In 2005 the *Jahrbuch* was renamed *Annals of the History and Philosophy of Biology*, reflecting the Society's internationalist aspirations in addressing comparative biology as a subject of historical and philosophical studies.

Haskell 98 Language and Libraries Simon Peyton Jones, 2003-04-10 Haskell is the world's leading lazy functional programming language, widely used for teaching, research, and applications. The language continues to develop rapidly, but in 1998 the community decided to capture a stable snapshot of the language: Haskell 98. All Haskell compilers support Haskell 98, so practitioners and educators alike have a stable base for their work. This book constitutes the agreed definition of Haskell 98, both the language itself and its supporting libraries, and should be a standard reference work for anyone involved in research, teaching, or application of Haskell.

Militant Islam Godfrey H. Jansen, 1979 G.H. Jansen's analysis examines the militancy of Islam from 1800 to the present, emphasizing the resurgence of that militancy in the last decade. He shows us the traditionalists such as the Ayatollah Khomeini of Iran and General Zia of Pakistan who want to take Islam back to strict adherence to the precepts of the Koran, the men of religion anxious to maintain the status quo, and the reformers trying to adapt the faith to the demands of the modern world--Back cover.
