Robot Operating System (ROS) Anis Koubaa, 2017-05-25 This second volume is a continuation of the successful first volume of this Springer book, and as well as addressing broader topics it puts a particular focus on unmanned aerial vehicles (UAVs) with Robot Operating System (ROS). Consisting of three types of chapters: tutorials, cases studies, and research papers, it provides comprehensive additional material on ROS and the aspects of developing robotics systems, algorithms, frameworks, and applications with ROS. ROS is being increasingly integrated in almost all kinds of robots and is becoming the de-facto standard for developing applications and systems for robotics. Although the research community is actively developing applications with ROS and extending its features, amount of literature references is not representative of the huge amount of work being done. The book includes 19 chapters organized into six parts: Part 1 presents the control of UAVs with ROS, while in Part 2, three chapters deal with control of mobile robots. Part 3 provides recent work toward integrating ROS with Internet, cloud and distributed systems. Part 4 offers five case studies of service robots and field experiments. Part 5 presents signal-processing tools for perception and sensing, and lastly, Part 6 introduces advanced simulation frameworks. The diversity of topics in the book makes it a unique and valuable reference resource for ROS users, researchers, learners and developers.

The Joy of Rehearsal Анатолий Эфрос, 2006 Anatoly Efros (1925-1987), one of the most admired and original directors of post-war Russia, directed at the Central Children's Theatre, Malaya Bronnaya Theatre, Lenkom Theatre, Moscow Art Theatre, and Taganka Theatre, and elsewhere including the Guthrie Theatre in Minneapolis and the Toen Theatre in Tokyo. He taught directing at the State Institute for Theatre Training and wrote several influential books. His productions received numerous awards for creative excellence. In *The Joy of Rehearsal*, his best-known work, Efros illuminates the dynamics of the director's creative work. He discusses the process of considering future plays, rehearsing them, and evaluating the results. Devoted to the principles of Konstantin Stanislavsky and Michael Chekhov, and inspired by the ideas of Bertolt Brecht, Efros also considers the practice of rehearsals and other features central to professional creative work. His productions of Shakespeare, Moliere, Chekhov and other classics were major events for those who looked to the theatre for social significance as well as aesthetic experience. Theatre students and professionals will benefit from the insights gained as Efros writes about his unique vision for the modern theatre.

Introducing Electronic Voting Peter Wolf,Rushdi Nackerdien,Domenico Tuccinardi,2011-12-01

Electronic voting is often seen as a tool for making the electoral process more efficient and for increasing trust in its management. Properly implemented, e-voting solutions can increase the security of the ballot, speed up the processing of results and make voting easier. However, the challenges are considerable. If not carefully planned and designed, e-voting can undermine the confidence in the whole electoral process. Technology upgrades in elections are always challenging projects that require careful deliberation and planning. Introducing e-voting is probably the most difficult upgrade as this technology touches the core of the entire electoral process—the casting and counting of the votes. E-voting greatly reduces direct human control and influence in this process. This provides an opportunity for solving some old electoral problems, but also introduces a whole range of new concerns. Consequently, e-voting usually triggers more criticism and opposition and is more disputed than any other information technology application in elections. This Policy Paper outlines contextual factors that can influence the success of e-voting solutions and highlights the importance of considering these factors before choosing to introduce new voting technologies.
