The Responsible Company Yvon Chouinard,Vincent Stanley,2013-10-06 The Responsible Company, by Yvon Chouinard, founder and owner of Patagonia, and Vincent Stanley, co-editor of its Footprint Chronicles, draw on the their 40 years' experience at Patagonia – and knowledge of current efforts by other companies – to articulate the elements of responsible business for our time. Patagonia, named by Fortune in 2007 as the coolest company on the planet, has earned a reputation as much for its ground-breaking environmental and social practices as for the quality of its clothes. In this exceptionally frank account, Chouinard and Stanley recount how the company and its culture gained the confidence, by step and misstep, to make its work progressively more responsible, and to ultimately share its discoveries with companies as large as Wal-Mart or as small as the corner bakery. In plain, compelling prose, the authors describe the current impact of manufacturing and commerce on the planet's natural systems and human communities, and how that impact now forces business to change its ways. The Responsible Company shows companies how to reduce the harm they cause, improve the quality of their business, and provide the kind of meaningful work everyone seeks. It concludes with specific, practical steps every business can undertake, as well as advice on what to do, in what order. This is the first book to show companies how to thread their way through economic sea change and slow the drift toward ecological bankruptcy. Its advice is simple but powerful: reduce your environmental footprint (and its skyrocketing cost), make legitimate products that last, reclaim deep knowledge of your business and its supply chain to make the most of opportunities in the years to come, and earn the trust you'll need by treating your workers, customers and communities with respect.

Medical Parasitology Gerhard Piekarski,2012-12-06 Medical Parasitology is primarily intended to be an illustrated textbook which provides a review of the most important species of parasite which occur in man; their areas of distribution, morphology and development, the typical disease symptoms resulting from infection, epidemiology and also methods of detection and indications for therapy. The main emphasis is on the protozoan and helminthic diseases; medical entomology has only been covered in connection with the epidemiology of the diseases described here. Parasites sometimes occur exclusively in man (anthropoparasites) and sometimes also in animals (anthropozoonotic parasites). The monoxenous species complete their development in man or in one animal alone (Scheme I). Heteroxenous species, which include most of the medically important parasites, develop partly in man and partly in animals in the course of their life cycle. They may even be forced to infect different species so that they can continue their development. This may sometimes be associated with a digenesis, the larval development taking place in one intermediate (Scheme II ®) or in two different intermediate hosts (Scheme III ®, ©), and the sexually mature stage developing in another host, the so-called definitive host (Scheme III ®). The importance of the intermediate hosts can vary considerably (see below).

Biological Materials of Marine Origin Hermann Ehrlich,2014-12-01 This is the second monograph by the author on biological materials of marine origin. The initial book is dedicated to the biological materials of marine invertebrates. This work is a source of modern knowledge on biomineralization, biomimetics and materials science with respect to marine vertebrates. For the first time in scientific literature the author gives the most coherent analysis of the nature, origin and evolution of biocomposites and biopolymers isolated from and observed in the broad variety of marine vertebrate organisms (fish, reptilian, birds and mammals) and within their unique hierarchically organized structural formations. There is a wealth of new and newly synthesized information, including dozens of previously unpublished images of unique marine creatures including extinct, extant and living taxa and their biocomposite-based structures from nano- to micro – and macroscale. This monograph reviews the most relevant advances in the marine biological materials research field, pointing out several approaches being introduced and explored by distinct modern laboratories.

The Authentic Swing Steven Pressfield,2013-09-24 The Story Behind THE LEGEND OF BAGGER VANCE If you've read his books THE WAR OF ART and TURNING PRO, you know that for thirty years Steven Pressfield (GATES OF FIRE, THE AFGHAN CAMPAIGN etc.) wrote spec novel after spec novel before any publisher took him seriously. How did he finally break through? Ignoring just about every rule of commercial book publishing, Pressfield's first novel not only became a major bestseller (over 250,000 copies sold), it was adapted into a feature film directed by Robert Redford and starring Matt Damon, Will Smith, and Charlize Theron. Where did he get the idea? What magical something did THE LEGEND OF BAGGER VANCE have that his previous manuscripts lacked? Why did Pressfield decide to write a novel when he already had a well established screenwriting career? How does writing a publishable novel really work? Taking a page from John Steinbeck's classic JOURNAL OF A NOVEL, Steven Pressfield offers answers for these and scores of other practical writing questions in THE AUTHENTIC SWING.
