The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Parent-Child Relations: A Guide to Raising Children (Revised Edition) Hisham Altalib , AbdulHamid Ahmad AbuSulayman , Omar Hisham Altalib , 2024-03-11 Modern families face challenges unprecedented in human history. The time, attention and vigilance required of parents is exhausting and consuming family life. Parents are required to balance complex schedules, be technology aware, social media informed, constantly monitor children's screen time and media communication, cope with academic problems, shield them from the dangers of immorality, find inventive ways to overcome their boredom, organize extracurricular activities, and handle everything within financially constrained circumstances that increasingly require both to be working. Little wonder that anxiety is on the rise and parents are increasingly fearing for their children's future. The authors in this book attempt to address parents' concerns and equip them with the confidence and tools necessary to work towards understanding and addressing the real needs of both themselves and their children, to nurture the child's character, self-confidence, life skills, moral boundaries, spiritual development and much more. There is no quick-fix. Myths are debunked, and practical tips offered throughout which can be implemented immediately, with fun activities outlined

at the end of each chapter with the aim of improving parent-child relationships through bonding, love, patience, openness, respect and communication.

Inclusive Education in China Wangqian Fu,2022-06-23 By adopting a comparative approach, this book investigates the philosophy, policy, practices, and challenges of inclusive education in the Chinese contexts, recognizing influences of Chinese culture, such as Confucianism, collectivism, and familism. In the 1980s, the Chinese government promoted a policy named “Learning in Regular Classroom” to ensure educational rights for children with disabilities, which subsequently turned into an inclusive education program in the western sense. Starting from this point, the policy and practice of inclusive education have developed tremendously. To facilitate reflection and future development, this is the latest and most comprehensive attempt at understanding the status quo of inclusive education in China from a variety of perspectives: from early childhood to higher education, from family to schools and communities, from peers to teachers and parents. It also analyzed the unique Chinese philosophy of inclusive education, adding to current debates with a Chinese lens. This book will appeal to academics, students, and practitioners in disciplines such as education, early childhood studies, sociology, social work, social policy, disability studies, and youth studies.
