Big Data Analytics for Time-Critical Mobility Forecasting George A. Vouros, Gennady Andrienko, Christos Doulkeridis, Nikolaos Pelekis, Alexander Artikis, Anne-Laure Jousselme, Cyril Ray, Jose Manuel Cordero, David Scarlatti, 2020-06-23 This book provides detailed descriptions of big data solutions for activity detection and forecasting of very large numbers of moving entities spread across large geographical areas. It presents state-of-the-art methods for processing, managing, detecting and predicting trajectories and important events related to moving entities, together with advanced visual analytics methods, over multiple heterogeneous, voluminous, fluctuating and noisy data streams from moving entities, correlating them with data from archived data sources expressing e.g. entities' characteristics, geographical information, mobility patterns, mobility regulations and intentional data. The book is divided into six parts: Part I discusses the motivation and background of mobility forecasting supported by trajectory-oriented analytics, and includes specific problems and challenges in the

aviation (air-traffic management) and the maritime domains. Part II focuses on big data quality assessment and processing, and presents novel technologies suitable for mobility analytics components. Next, Part III describes solutions toward processing and managing big spatio-temporal data, particularly enriching data streams and integrating streamed and archival data to provide coherent views of mobility, and storing of integrated mobility data in large distributed knowledge graphs for efficient query-answering. Part IV focuses on mobility analytics methods exploiting (online) processed, synopsized and enriched data streams as well as (offline) integrated, archived mobility data, and highlights future location and trajectory prediction methods, distinguishing between short-term and more challenging long-term predictions. Part V examines how methods addressing data management, data processing and mobility analytics are integrated in big data architectures with distinctive characteristics compared to other known big data paradigmatic architectures. Lastly, Part VI covers important ethical issues that research on mobility analytics should address. Providing novel approaches and methodologies related to mobility detection and forecasting needs based on big data exploration, processing, storage, and analysis, this book will appeal to computer scientists and stakeholders in various application domains.

Jours of Our Lives ,2019-05-06 BETH ARNOLD'S *Jours of Our Lives* is the narrative of one couple's wild-card bet on themselves. In 2002, after living 13 years in their showplace of a Craftsman bungalow in Little Rock, Arkansas, Arnold-a journalist, essayist, and novelist-and her husband, author James Morgan, decided it was time for a change.And what a change they made! When Morgan, a book writer and amateur painter, was stumped for a new book idea, Arnold saw the chance to pull out a dream of hers: to live in France. Arnold's late brother, New York decorator Brent Arnold-whom David Halberstam had called the talent of his generation-had given the couple vivid decorating advice when they'd married and moved into their Craftsman house: Matisse colors and Vuillard patterns. Brent Arnold's advice had turned James Morgan into a devotee of Henri Matisse. So on a day in 2001, when Beth was working with James to help him discover a new book idea, she suggested a facet of artistic life--in this case, Matisse's life--that gripped Morgan: Most people look, but they don't see in the deepest sense of the word. Her idea for him was a book called *Learning to See*, in which he would follow in the footsteps of Henri Matisse. The book became *Chasing Matisse*, and soon the two of them had sold their beloved house in Little Rock and embarked on a life-changing journey through France, Corsica, Morocco, and beyond.*Jours of Our Lives*, which began life as Beth Arnold's daily blog recounting the soap-opera arc of their crazy and heart-wrenching road trip in pursuit of a creative dream, stands today as a vivid depiction of one couple's brave and unwavering commitment to a life that called them. Beth Arnold, writes William Whitworth, editor emeritus of *The Atlantic*, is a reporter, a novelist, a memoirist, a cook, and a mom, but perhaps most of all she is a wanderer and a gifted travel writer. With wit and offhand ease, Arnold shows us her world: how to get there, where to stay, what it looks like, how it sounds, and what it tastes like.

The Culture Map (INTL ED) Erin Meyer,2016-01-05 An international business expert helps you understand and navigate cultural differences in this insightful and practical guide, perfect for both your work and personal life. Americans precede anything negative with three nice comments; French, Dutch, Israelis, and Germans get straight to the point; Latin Americans and Asians are steeped in hierarchy; Scandinavians think the best boss is just one of the crowd. It's no surprise that when they try and talk to each other, chaos breaks out. In *The Culture Map*, INSEAD professor Erin Meyer is your guide through this subtle, sometimes treacherous terrain in which people from starkly different backgrounds are expected to work harmoniously together. She provides a field-tested model for decoding how cultural differences impact international business, and combines a smart analytical framework with practical, actionable advice.

Handbook of Uncertainty Quantification Roger Ghanem,David Higdon,Howman Owhadi,2016-05-08 The topic of Uncertainty Quantification (UQ) has witnessed massive developments in response to the promise of achieving risk mitigation through scientific prediction. It has led to the integration of ideas from mathematics, statistics and engineering being used to lend credence to predictive assessments of risk but also to design actions (by engineers, scientists and investors) that are consistent with risk aversion. The objective of this Handbook is to facilitate the dissemination of the forefront of UQ ideas to their audiences. We recognize that these audiences are varied, with interests ranging from theory to application, and from research to development and even execution.
