**Grove Encyclopedia of Islamic Art & Architecture: Three-Volume Set** Jonathan Bloom, Sheila Blair, 2009-05-14 The Grove Encyclopedia of Islamic Art and Architecture is the most comprehensive reference work in this complex and diverse area of art history. Built on the acclaimed scholarship of the Grove Dictionary of Art, this work offers over 1,600 up-to-date entries on Islamic art and architecture ranging from the Middle East to Central and South Asia, Africa, and Europe and spans over a thousand years of history. Recent changes in Islamic art in areas such as Afghanistan, Iran, and Iraq are elucidated here by distinguished scholars. Entries provide in-depth art historical and cultural information about dynasties, art forms, artists, architecture, rulers, monuments, archaeological sites and stylistic developments. In addition, over 500 illustrations of sculpture, mosaic, painting, ceramics, architecture, metalwork and calligraphy illuminate the rich artistic tradition of the Islamic world. With the fundamental understanding that Islamic art is not limited to a particular region, or to a defined period of time, The Grove Encyclopedia of Islamic Art and Architecture offers pathways into Islamic culture through its art.

Isfahan Farshid Emami,2023-11-27

*Mamluk History through Architecture* Nasser

Rabbat,2010-09-30 The most enduring testament to the Mamluk Sultanate is its architecture. Not only do Mamluk buildings embody one of the most outstanding medieval architectural traditions, Mamluk architecture is actually a key to the social history of the period. Analysing Mamluk constructions as a form of communication and documentation as well as a cultural index, *Mamluk History Through Architecture* shows how the buildings mirror the complex - and historically unique - military, political, social and financial structures of Mamluk society. With this original and authoritative study, Nasser Rabbat offers an innovative approach to the history of the Mamluks - through readings of the spectacular architecture of the period. Drawing on examples from throughout both Egypt and Syria, from the Citadel and Al-Azhar Mosque of Cairo to the Mausoleum of al-Zahir Baybars in Damascus, Rabbat demonstrates how Mamluk architecture served to reinforce visually the spirit of the counter-Crusade, when the Muslim world rebounded from the setbacks of the First Crusade. Both holistically and in case studies, Rabbat demonstrates how history is inscribed into and reflected by a culture's artefacts. This

is a groundbreaking work in the study of architecture and social history in the Middle East and beyond.

**Pascal Coste, toutes les Egypte** Pascal Coste, 1998 Le développement et la modernisation de l'Egypte de la première moitié du XIX<sup>e</sup> siècle, sa recherche d'une autonomie sinon d'une indépendance constituent autant d'aspects de l'importante Question d'Orient . C'est dans cette perspective historique que s'inscrit le départ de coopérants français vers un pays qui fait alors appel à leurs compétences techniques afin d'accéder à la modernité : une démarche économique et politique, fondement de l'action du pacha d'Egypte, Muhammad'Ali. L'architecte marseillais Pascal Coste participe à cette entreprise : il réalise entre 1817 et 1827 d'importants travaux de génie civil en Basse Egypte. Etonnant dessinateur, il rapporte de ses années égyptiennes une oeuvre graphique de plus d'un millier de documents : dessins, croquis, aquarelles, plans et relevés. Cette importante contribution à la connaissance de l'Egypte, conservée dans les collections de la Bibliothèque municipale de Marseille, témoigne d'une vie largement consacrée aux voyages. Les dessins relatifs à l'Egypte impressionnent par leur diversité et leur foisonnement : témoignages sur la vie quotidienne orientale, l'archéologie,

l'architecture et l'histoire de l'art car Pascal Coste aura été l'un des premiers occidentaux à révéler l'art islamique. Cet ouvrage collectif propose une analyse thématique ainsi qu'un large choix de dessins inédits sur l'œuvre d'un homme qui se situe - à l'instar de ses compatriotes le Docteur Clotbey et Jean-Jacques Rifaud - dans la tradition des Lumières par son propos encyclopédique et dans l'activisme économique de son siècle par ses responsabilités professionnelles dans un Orient alors en mutation.

Rayy: from its Origins to the Mongol Invasion Rocco

Rante, 2015-01-08 This book offers a new history of the ancient city of Rayy. Based on the results of the latest excavations and surveys, and on the study of historical and geographical texts, the complete occupation sequence of the city comes to light, from its foundation in the Iron Age and the Parthian reconstructions (2nd to 1st centuries BC), up to the Mongol invasions and rapid depopulation in the 13th century CE,

Islamic Art in the 19th Century Doris Behrens-

Abouseif, Stephen Vernoit, 2006 This collection of essays provides a timely reassessment of nineteenth-century Islamic art and architecture. The essays demonstrate that the arts of that era were vibrant and diverse, making ingenious use of native traditions and

materials or adopting imported conventions and new technologies. However, traditionalists, revivalists and modernists all referred in one way or another to an Islamic heritage, whether to reinvent, revive or reject it. Beginning with an historical introduction and an assessment of changing attitudes towards the visual arts the following essays provide case studies of architecture and art in Ottoman Turkey, Egypt, Morocco, sub-Saharan Africa, Iran, Central Asia, India and the Caribbean. They examine such issues as patronage, sources of artistic inspiration and responses to European art. The essays have a relevance and importance for our understanding of the societies and attitudes of that time, and have a direct bearing on the more general debate concerning cultural identity and the integration of modern ideas in the Muslim world. The book is richly illustrated with very many illustrations in black-and-white and in full colour.

Saddling the Dogs Deborah Manley, 2009-07-15 In the absence of horses, saddle the dogs. This Arab proverb, suggesting the uncompromising determination of nomads to keep moving, whatever the obstacles, epitomizes also the travelling ethos of many early visitors to the 'exotic East'. The journeys examined here are linked by the light they shed on the experience of travel in

Egypt, Greece and the Ottoman Balkans, and the Near East from the 17th to the early 20th century not so much what was seen as how one got there and how one got around once arrived; the vicissitudes and travails, both expected and strange that characterised the passage. The purpose of the trips examined range from religious pilgrimages to diplomatic, commercial and military journeys, to middle-class package tours. Each of them is of interest for what it reveals about the realities of travel in Egypt, the eastern Mediterranean and the Near East at different times: the means by which travel was carried out, the dangers and discomforts encountered and the preparations made. The Association for the Study of Travel in Egypt and the Near East (ASTENE) is a registered educational charity promoting the study of the history of travel and travellers in the eastern Mediterranean, from Greece and the Ottoman Balkans eastward to Turkey and the Levant, Egypt, the Arabian Peninsula and the Mesopotamian region.

**Bibliography of Art and Architecture in the Islamic World (2 vols.)** Susan Sinclair, 2012-04-03 Following the tradition and style of the acclaimed Index Islamicus, the editors have created this new Bibliography of Art and Architecture in the Islamic World. The

editors have surveyed and annotated a wide range of books and articles from collected volumes and journals published in all European languages (except Turkish) between 1906 and 2011. This comprehensive bibliography is an indispensable tool for everyone involved in the study of material culture in Muslim societies.

**The Orientalists** Lynne Thornton, 1994 At the end of the nineteenth century, numerous painters succumbed to the charms of the Orient. Travel to distant lands was easier, and artists brought back voluptuous images filled with sun and colour. This title studies almost 150 painters, from Delacroix to Ziem. It features many lesser known masters and is suitable for collectors.

Cairo André Raymond, 2000 The extraordinary tapestry of Cairo's past and present comes vividly to life in this magisterial study by one of the top social historians of the Arab world. This deeply observed account shows Cairo from the glimmer of its beginnings in the Arab conquest of Egypt in 640 through its transformation into the modern center of Middle Eastern life today. 63 halftones. Maps & tables.

**Landscape and Authority in the Early Modern World** Stephen H. Whiteman, 2023-05-30 Courts and societies across the early

modern Eurasian world were fundamentally transformed by the physical, technological, and conceptual developments of their era. Evolving forms of communication, greatly expanded mobility, the spread of scientific knowledge, and the emergence of an increasingly integrated global economy all affected how states articulated and projected visions of authority into societies that, in turn, perceived and responded to these visions in often contrasting terms. Landscape both reflected and served as a vehicle for these transformations, as the relationship between the land and its imagination and consumption became a fruitful site for the negotiation of imperial identities within and beyond the precincts of the court. In *Landscape and Authority in the Early Modern World*, contributors explore the role of landscape in the articulation and expression of imperial identity and the mediation of relationships between the court and its many audiences in the early modern world. Nine studies focused on the geographical areas of East and South Asia, the Islamic world, and Europe illuminate how early modern courts and societies shaped, and were shaped by, the landscape, including both physical sites, such as gardens, palaces, cities, and hunting parks, and conceptual ones, such as those of frontiers, idealized polities, and the cosmos. The collected essays

expand the meaning and potential of landscape as a communicative medium in this period by putting an array of forms and subjects in dialogue with one another, including not only unique expressions, such as gardens, paintings, and manuscripts, but also the products of rapidly developing commercial technologies of reproduction, especially print. The volume invites a deeper and more nuanced understanding of the complexity with which early modern states constructed and deployed different modes of landscape for different audiences and environments. Contributors: Robert Batchelor, Seyed Mohammad Ali Emrani, John Finlay, Caroline Fowler, Katrina Grant, Finola O'Kane, Anton Schweizer, Larry Silver, Stephen H. Whiteman.

Text & Context in Islamic Societies Irene A. Bierman, 2004 A collection of papers from the sixteenth Giorgio Levi Della Vida conference which honored Andre Raymond and Josef van Ess.

**The Persian Revival** Talinn Grigor, 2021-07-15 One of the most heated scholarly controversies of the early twentieth century, the Orient-or-Rome debate turned on whether art historians should trace the origin of all Western—and especially Gothic—architecture to Roman ingenuity or to the Indo-Germanic Geist. Focusing on the discourses around this debate, Talinn Grigor considers the Persian

Revival movement in light of imperial strategies of power and identity in British India and in Qajar-Pahlavi Iran. The Persian Revival examines Europe's discovery of ancient Iran, first in literature and then in art history. Tracing Western visual discourse about ancient Iran from 1699 on, Grigor parses the invention and use of a revivalist architectural style from the Afsharid and Zand successors to the Safavid throne and the rise of the Parsi industrialists as cosmopolitan subjects of British India. Drawing on a wide range of Persian revival narratives bound to architectural history, Grigor foregrounds the complexities and magnitude of artistic appropriations of Western art history in order to grapple with colonial ambivalence and imperial aspirations. She argues that while Western imperialism was instrumental in shaping high art as mercantile-bourgeois ethos, it was also a project that destabilized the hegemony of a Eurocentric historiography of taste. An important reconsideration of the Persian Revival, this book will be of vital interest to art and architectural historians and intellectual historians, particularly those working in the areas of international modernism, Iranian studies, and historiography.

*Gardens of Renaissance Europe and the Islamic Empires*

Mohammad Gharipour, 2017-11-16 The cross-cultural exchange of

ideas that flourished in the Mediterranean during the sixteenth and seventeenth centuries profoundly affected European and Islamic society. Gardens of Renaissance Europe and the Islamic Empires considers the role and place of gardens and landscapes in the broader context of the information sharing that took place among Europeans and Islamic empires in Turkey, Persia, and India. In illustrating commonalities in the design, development, and people's perceptions of gardens and nature in both regions, this volume substantiates important parallels in the revolutionary advancements in landscape architecture that took place during the era. The contributors explain how the exchange of gardeners as well as horticultural and irrigation techniques influenced design traditions in the two cultures; examine concurrent shifts in garden and urban landscape design, such as the move toward more public functionality; and explore the mutually influential effects of politics, economics, and culture on composed outdoor space. In doing so, they shed light on the complexity of cultures and politics during the Renaissance. A thoughtfully composed look at the effects of cross-cultural exchange on garden design during a pivotal time in world history, this thought-provoking book points to new areas in inquiry about the influences, confluences, and connections between

European and Islamic garden traditions. In addition to the editor, the contributors include Cristina Castel-Branco, Paula Henderson, Simone M. Kaiser, Ebba Koch, Christopher Pastore, Laurent Paya, D. Fairchild Ruggles, Jill Sinclair, and Anatole Tchikine.

*Empire Building* Mark Crinson, 2013-10-11 The colonial architecture of the nineteenth century has much to tell us of the history of colonialism and cultural exchange. Yet, these buildings can be read in many ways. Do they stand as witnesses to the rapacity and self-delusion of empire? Are they monuments to a world of lost glory and forgotten convictions? Do they reveal battles won by indigenous cultures and styles? Or do they simply represent an architectural style made absurdly incongruous in relocation? *Empire Building* is a study of how and why Western architecture was exported to the Middle East and how Islamic and Byzantine architectural ideas and styles impacted on the West. The book explores how far racial theory and political and religious agendas guided British architects (and how such ideas were resisted when applied), and how Eastern ideas came to influence the West, through writers such as Ruskin and buildings such as the Crystal Palace. Beautifully written and lavishly illustrated, *Empire Building* takes the reader on an extraordinary postcolonial journey,

backwards and forwards, into the heart and to the edge of empire.

Iran and The West Cyrus Ghani, 2013-09-05 First Published in 1987, this volume offers a bibliography of biographies, autobiographies and books on contemporary politics by prominent 20th century figures on the topic of Iran.

**Amulets and Talismans of the Middle East and North Africa in Context** Marcela A. Garcia Probert, Petra M. Sijpesteijn, 2022-04-25 In this volume amulets and talismans are studied within a broader system of meaning that shapes how they were manufactured, activated and used in different networks. Text, material features and the environments in which these artifacts circulated, are studied alongside each other, resulting in an innovative approach to understand the many different functions these objects could fulfil in pre-modern times. Produced and used by Muslims and non-Muslims alike, the case studies presented here include objects that differ in size, material, language and shape. What the articles share is an all-round, in-depth approach that helps the reader understand the complexity of the objects discussed and will improve one's understanding of the role they played within pre-modern societies. Contributors Hazem Hussein Abbas Ali, Gideon Bohak, Ursula Hammed, Juan Campo, Jean-Charles Coulon,

Venetia Porter, Marcela Garcia Probert, Anne Regourd, Yasmine al-Saleh, Karl Schaefer and Petra M. Sijpesteijn.

Antoin Sevruguin Tasha Vorderstrasse, 2020-12-31 Explore the changing world of late nineteenth-century Iran through the gaze of one of its most renowned photographers, Antoin Sevruguin. This volume, which will be accompanied by a forthcoming exhibition, publishes for the first time the Oriental Institute Museums complete collection of nineteenth-century Iranian photographs, most of which were created by Sevruguin. Sevruguin's artfully staged photographs still resonate with us today. Accompanying the print catalog is a series of essays that investigate Sevruguin's life and photographic career, including the lasting impact of his unique vision, as demonstrated by the work of contemporary artist Yassaman Ameri.

Preservation of National Monuments India. Curator of Ancient Monuments, 1882
