**C. H. A. P. P. S** Larry Pinson, Sr.,2019-06-21 Presently, the pay system used for U.S. postal employees to record clockable hours is complex and difficult to comprehend, even by employees, as well as supervisors. C.H.A.P.P.S. is a simplified pay system designed for the postal payroll system, and with C.H.A.P.P.S. there is no need to cut jobs at the post office. Larry Pinson, Sr. is a retired postal employee, and created C.H.A.P.P.S. after undertaking an endeavor to understand the postal service pay system, and found it to be antiquated and in need of change to modernize and simplify the system. C.H.A.P.P.S. can also be used for city and county employees, teachers, police officers, and pay systems of other government agencies and large institutions; firemen, public transportation employees such as bus drivers; and private sector businesses, large and small, such as restaurants and barber shops. Additionally, C.H.A.P.P.S. can be used for jobs worldwide, and is excellent for military people coming home. Larry Pinson, Sr. served 18 years in the Illinois National Guard. He started working at the postal service in 1995, and retired in 2009. Pinson liked the idea of working for the postal service, and initially believed it was a well-organized organization, but was soon surprised to learn that it was far from well organized, particularly regarding the payroll application process.

**Caring on the Clock** Mignon Duffy,Amy Armenia,Clare L. Stacey,2015-01-22 A nurse inserts an I.V. A personal care attendant helps a quadriplegic bathe and get dressed. A nanny reads a bedtime story to soothe a child to sleep. Every day, workers like these provide critical support to some of the most vulnerable members of our society. Caring on the Clock provides a wealth of insight into these workers, who take care of our most fundamental needs, often at risk to their own economic and physical well-being. Caring on the Clock is the first book to bring together cutting-edge research on a wide range of paid care occupations, and to place the various fields within a comprehensive and comparative framework across occupational boundaries. The book includes twenty-two original essays by leading researchers across a range of disciplines—including sociology, psychology, social work, and public health. They examine the history of the paid care sector in America, reveal why paid-care work can be both personally fulfilling but also make workers vulnerable to burnout, emotional fatigue, physical injuries, and wage exploitation. Finally, the editors outline many innovative ideas for reform, including top-down and grassroots efforts to improve recognition, remuneration, and mobility for care workers. As America faces a series of challenges to providing care for its citizens, including the many aging baby boomers, this volume offers a wealth of information and insight for policymakers, scholars, advocates, and the general public.

On the Clock Emily Guendelsberger,2019-07-16 Nickel and Dimed for the Amazon age, (Salon) the bitinglly funny, eye-opening story of finding work in the automated and time-starved world of hourly low-wage labor After the local newspaper where she worked as a reporter closed, Emily Guendelsberger took a pre-Christmas job at an Amazon fulfillment center outside Louisville, Kentucky. There, the vending machines were stocked with painkillers, and the staff turnover was dizzying. In the new year, she travelled to North Carolina to work at a call center, a place where even bathroom breaks were timed to the second. And finally, Guendelsberger was hired at a San Francisco McDonald's, narrowly escaping revenge-seeking customers who pelted her with condiments. Across three jobs, and in three different parts of the country, Guendelsberger directly took part in the revolution changing the U.S. workplace. Offering an up-close portrait of America's actual essential workers, On the Clock examines the broken social safety net as well as an economy that has purposely had all the slack drained out and converted to profit. Until robots pack boxes, resolve billing issues, and make fast food, human beings supervised by AI will continue to get the job done. Guendelsberger shows us how workers went from being the most expensive element of production to the cheapest - and how low wage jobs have been remade to serve the ideals of efficiency, at the cost of humanity. On the Clock explores the lengths that half of Americans will go to in order to make a living, offering not only a better understanding of the modern workplace, but also surprising solutions to make work more humane for millions of Americans.

Around the Clock Statham, June,Mooney, Ann,2003-06-18 This timely report considers how childcare services are meeting the needs of parents working atypical hours. Using information from a survey of Early Years Development and Childcare Partnerships in England, a survey of childcare providers from two local authorities and a number of case studies, the report addresses in particular what helps and what hinders the development of such services. It will be invaluable to policymakers, employers, academics and organisations with an interest in developing childcare services.

The Clock James Leslie Payne,2011-08-24 From the mid 1700s in Edinburgh until today ... The Clock winds its way through time and tides. Through the centuries it stands, a sentinel in many a home, some grand, some not so grand. Always it stands and keeps time for the owner. It keeps watch in more ways than one. Some owners are proud of the clock and keep it front and center, while others are ambivalent towards it and hardly notice its presence. Still it ticks and tocks its way through the ocean of time that two centuries avail. It was built as a pass into the Hammermen Society of Edinburgh; the boy genius craftsman that gave it birth could never have imagined the journey it went on ... neither can you! Many stories boast truth. They describe themselves as “based on a real-life incident.” The story of the clock is indeed is based on a very true story. Author James Leslie Payne is a broadcast executive in radio and television. He lives on Canada’s West Coast with his wife, a golden retriever named Billy, and the Sentinel—yes, the Sentinel. It turns out that’s the latest stop on its incredible journey—one that Payne is eager to share with you. Turn your collar to the cold winds of time; let’s begin the journey of The Clock.

*Funk the Clock* Rahsaan Mahadeo,2024-05-15 Funk the Clock is about those said to be emblematic of the future yet denied a place in time. Hence, this book is both an invitation and provocation for Black youth to give the finger to the hands of time, while inviting readers to follow their lead. In revealing how time is racialized, how race is temporalized, and how racism takes time, Rahsaan Mahadeo makes clear why conventional sociological theories of time are both empirically and theoretically unsustainable and more importantly, why they need to be funkyed up/with. Through his study of a youth center in Minneapolis, Mahadeo provides examples of Black youth constructing alternative temporalities that center their lived experiences and ensure their worldviews, tastes, and culture are most relevant and up to date. In their stories exists the potential to stretch the sociological imagination to make the familiar (i.e., time) strange. Funk the Clock forges new directions in the study of race and time by upending what we think we know about time, while centering Black youth as key collaborators in rewriting knowledge as we know it.

*Mastered by the Clock* Mark M. Smith,2000-11-09 Mastered by the Clock is the first work to explore the evolution of clock-based time consciousness in the American South. Challenging traditional assumptions about the plantation economy's reliance on a premodern, nature-based conception of time, Mark M. Smith shows how and why southerners--particularly masters and their slaves--came to view the clock as a legitimate arbiter of time. Drawing on an extraordinary range of eighteenth- and nineteenth-century archival sources, Smith demonstrates that white southern slaveholders began to incorporate this new sense of

time in the 1830s. Influenced by colonial merchants' fascination with time thrift, by a long-held familiarity with urban, public time, by the transport and market revolution in the South, and by their own qualified embrace of modernity, slaveowners began to purchase timepieces in growing numbers, adopting a clock-based conception of time and attempting in turn to instill a similar consciousness in their slaves. But, forbidden to own watches themselves, slaves did not internalize this idea to the same degree as their masters, and slaveholders found themselves dependent as much on the whip as on the clock when enforcing slaves' obedience to time. Ironically, Smith shows, freedom largely consolidated the dependence of masters as well as freedpeople on the clock.
