**Marketing and Mobile Financial Services** Aijaz A. Shaikh, Heikki Karjalainen, 2018-12-21 Mobile financial services (MFS) are of major interest and importance to both researchers and practitioners. The role played by nonbanking actors including telecoms and FinTech firms as well as other participants, such as PayPal and Amazon, in developing and deploying innovative financial and payment services is undeniable. Peer2peer (P2P) payments from nonbank services are becoming increasingly commonplace and will shortly be codified by EC (EU?) regulations requiring banks to provide access to consumer data for third-party app developers and service providers. Three major mobile financial systems—mobile banking, mobile payments, and branchless banking—currently dominate the electronic retail banking sector. Although interconnected and interrelated, their business models, regulatory frameworks, and target markets are distinct. This book provides a unified perspective on MFS and discusses its evolution, growth, and future, as well as identifying the frameworks, stakeholders, and technologies used in financial information systems in general and MFS in particular. Academics and researchers in digital and financial marketing will find this book an invaluable resource, as will bank executives, regulators, policy makers, FinTech professionals, and anyone interested in how mobile technology, social media and financial services will

increasingly intersect.

*Mobile banking in the Ethiopian bank sector* Dereje Tesfa, 2019-08-30 Seminar paper from the year 2019 in the subject Business economics - Banking, Stock Exchanges, Insurance, Accounting, grade: A, Wolkite University (College of Business and Economics), language: English, abstract: This article looks at how and why banking customers have begun to take advantage of mobile services for their banking requirements and why some of them are still hesitant to adopt mobile banking in Ethiopian banking sector. Also, this article throws light on some of the eminent challenges faced by the mobile banking service providers, which can be seen as opportunities for the financial institutions and the bankers. The internet and the mobile phone, the two technological advancements that have profoundly affected human behavior in the last decade have started to converge. Using a variety of platforms, services are being created to enable mobile devices to perform many activities of the traditional internet in a reduced format for mobile devices. One such area of activity is mobile banking. A cluster of dedicated and demanding mobile phone users (consumers) have multiplied tremendously over the years, who expect real-time information and access and high levels of service.

**Why Can't Banks Be As Easy As Uber?** Jay Sidhu, 2016-06-09 What is disruptive innovation? Think Uber, transforming the taxi industry; Airbnb challenging the hospitality industry. And now, the banking industry is going to be hit with the same force. Bring in BankMobile, ready to stand up to the big banks and fight for the customer. BankMobile's new book, *Why Can't Banks Be as Easy as Uber? BankMobile And The Real Future Of Banking* offers a window into the future of banking along with safe, money saving alternatives on how we can bank today effortlessly, with banking capabilities at your fingertips. The Sidhus cofounded BankMobile, America's first truly fee-free bank, with the aim of serving Millennials, working-class individuals poorly served by traditional banks, and anyone who wants to break free of the high fees and poor service for which big banks are notorious. The book describes the genesis of BankMobile and shows how readers can become debt-free quickly and painlessly. The authors offer tips on how to save money, pay off debt and show the reader how banking can be a positive experience for the customer rather than a frustrating one which they are used to having with a traditional bank. The significance of the title lies in the surprising and disruptive manner in which Uber entered the marketplace. Taxicabs are expensive, as everyone knows. They are often dirty, and seldom available when you really need them. But Uber changed the way people looked at car transportation, making it simultaneously easier and cheaper. Just as Uber changed the way we look at the taxicab industry, BankMobile is the future of banking changing the way we look at banking. How is it able to do this? Partly by dispensing with the vast networks of branches maintained by the big banks. Those branches are expensive: the salaries of tellers, security guards, and cleaning staff need to be paid, among other expenses-and guess who they pass that cost on to? You! But that isn't the only way the big banks take advantage of their customers. ATM fees, overdraft fees ... they seem to have an endless list of ways to take advantage of you and separate you from your hard-earned cash, one nickel and one dime at a time. The inspiration for BankMobile came a few years ago, when Luvleen Sidhu walked into a bank branch to open a checking account. She was astounded to find that this process took her twenty-five minutes! She couldn't understand why this was so difficult-just the day before she had used Orbitz to book a ticket to Australia, and that had taken less than five minutes. Luvleen was shocked that this bank was so out of touch with the technology she and her friends took for granted. Worse, the staff was completely unhelpful, offering Luvleen no personal attention whatsoever. Jay and Luvleen decided that this was an unacceptable state of affairs. In an age in which we can see almost any movie the moment we want to see it rather than trekking down to the video rental store, an age in which we can book airline travel and hotel stays right from our phones, why should banking be as difficult and inconvenient as it is? To a generation used to doing everything on their smartphones quickly, easily, and without fees, BankMobile has already shown that its approach is the future of banking. BankMobile offers its customers ways to save money, manage money, pay off debt, and much more. *Why Can't Banks Be as Easy as Uber? BankMobile And The Real Future Of Banking* will open

your eyes to how costly your bank is, but more importantly the solution, fee-free, effortless, financially empowering banking at your fingertips. 100% of the book proceeds support the BankMobile Foundation - helping entrepreneurs and students promote financial literacy in their communities.

Bank 2.0 Brett King, 2010-06-05 BANK 2.0 reveals why customer behaviour is so rapidly changing, how branches will evolve, why cheques are disappearing, and why your mobile phone will replace your wallet—all within the next 10 years.

Bringing E-money to the Poor Thyra A. Riley, Anoma Kulathunga, 2017-09-11 Moving toward universal access to financial services is within reach, thanks to new technologies, transformative business models, and ambitious reforms. Instruments such as e-money accounts and mobile accounts, along with debit cards and low-cost traditional bank accounts, can significantly increase financial access for those who are excluded. *Bringing e-Money to the Poor: Successes and Failures* examines the lessons of success from four country case studies of “gazelles†•Kenya, South Africa, Sri Lanka, and Thailand†•that leapt from limitation to innovation by successfully enabling the deployment of e-money technology. These countries have thereby transformed the landscape of financial access to their poor. In addition, two country case studies (Maldives and the Philippines) yield lessons learned from constraints that stalled e-money deployments. Because technology is not a silver bullet, the case studies also explore other strategic elements that need to be in place for a country to expand access to financial services through digital technology.

*Mobile Apps and Banking* Paulina Nolan, 2014 Through a variety of new mobile applications (apps), technology is rapidly changing the way consumers shop. Today's mobile apps offer new beneficial services designed to enhance the consumer shopping experience. These apps allow smartphone users to compare competing products and retailers in real-time, seek out the best deals, and pay for their purchases by waving their phones at the checkout counter. Many of these apps have been installed on millions of devices, and all use mobile technology to alter consumers' shopping. Mobile payments can be a convenient way for consumers to pay for goods and services but they also raise consumer protection concerns. This book examines the mobile payments industry and its effects on consumers, while exploring areas where more attention is warranted such as

dispute resolution, data security, and privacy.

Bank 3.0 Brett King,2012-11-01 The first edition of BANK 2.0 took the financial services world by storm and became synonymous with disruptive customer behaviour, technology shift and new banking models. In BANK 3.0, Brett King looks at the latest trends that are redefining financial services and payments. From the global scramble for dominance of the mobile wallet, the expectations created by tablet computing, the operationalizing of the cloud and the explosion of social media he explores: • How Social Media has exposed pricing, over-regulation, outdated processes and poor policy, • How mobile technology is completely changing the context of banking, • How customer advocacy is killing traditional brand marketing, • The growth of the 'de-banked' consumer who doesn't need a bank at all; and • Why Banking is no longer a place you go, but something you do BANK 3.0 shows that the gap between customer and financial services players is rapidly growing, leaving massive opportunities for new, non-bank competitors to totally disrupt the industry.

**Proceedings of the International Conference on Sustainable Collaboration in Business, Technology, Information, and Innovation (SCBTII 2023)** Suhal Kusairi,Forget Mingiri Kapingura,Ratih Hendayani,Nizam Ahmat,2023-12-19 This is an open access book.Sustainable Collaboration in Business, Technology, Information and InnovationSCBTII 2023: “Preserving the Sustainability of Business in Accelerated Digital Transformation and Transition Collide”The COVID-19 pandemic had dealt a devastating blow to the SDGs, which were already off track before the pandemic forced the closure of schools, government services and workplaces worldwide. The pandemic erased more than four years of progress in eradicating poverty and pushing millions into extreme poverty. On the other hand, digital transformation rapidly creates a world of ever-faster technological developments. In response, every business must think of itself as a tech business. Companies need to re-design their processes and ensure their people have the skills needed for a world where we increasingly collaborate and work alongside capable and intelligent machines. Unfortunately, the war in Ukraine has accelerated the schism and confrontation between the major global powers. Another point of tension is the US-China relations joining the trade, technological, economic, and geostrategic competition. This year will be more significant. But the world business before us is not divided into two concrete blocks. Instead, a full-scale reconfiguration of alliances is underway, which forces all other actors to reposition themselves about the new strategic competition dynamics and to seek out their own spaces in a global transformation. On the other hand, the green and the digital transitions, which seemed to work hand in hand towards building a more sustainable world, have collided. Against this backdrop, universities, as academic institutions, play an essential role in educating and providing professional human resources and conducting high-quality research that benefits humanity. However, universities must take a more significant part and be innovative and creative in engaging and supporting the development opportunities and consolidation of the Global community. To embark on this role effectively, universities must always foster communication and discussion among academicians, scholars, practitioners, and policymakers under the Sustainability Development Goals (SDGs). Academia, Government, Business, and Communities must increasingly cooperate to achieve academic and research excellence and constructive solutions to current business and economic issues. Sustainable Collaboration in Business, Information, and Innovation (SCBTII) 2023 is

an international conference that brings together academics, professionals, entrepreneurs, researchers, learners, and other associated groups from all over the world that is interested in theories, as well as practices in the field of the digital economy for global competitiveness. This conference provides opportunities for presenters and participants to exchange new ideas and experiences, create research relationships, and find international partners for future collaboration to respond to economy, business, social and technological development challenges successfully and effectively for better life well-being.
