political science textbooks that obscure the differences in how groups experience and interact with political institutions, we do students a disservice. This book exposes students to these differences while also bringing marginalized voices to the fore, allowing more students to see their lived experiences reflected in the pages of their textbook. Bringing together a diverse group of contributors, political science is for everybody teaches all the basics of political science while showing that representation matters – both in politics and in the classroom.

New Perspectives on Industrial Policy for a Modern Britain David Bailey, Keith Cowling, Philip Tomlinson, 2015-04-02 In the aftermath of the global financial crisis of 2008 and the ensuing Great Recession of 2008 to 2013, the economic debate has begun to shift towards 'rebalancing' the UK economy, away from an over-reliance upon consumerism and the financial sector to generate growth, towards more sustainable productive activities. The fallout from the financial crisis exposed the systemic failings of the dominant neo-liberal model to deliver balanced growth and there is now increasing recognition this 'rebalancing' might best be achieved through the

state pursuing an active 'industrial policy'. Thus, after a long hiatus, industrial policy is back in vogue at regional, national, and EU levels driven by concerns over competitiveness, globalisation, de-industrialisation, unemployment, and the comparatively slow growth of the British and EU economies especially in this post-recession phase. At the same time, industrial policy has been seen as a catalyst for designing economic recovery strategies at regional, national, and EU levels as well as being a concerted strategy to develop new 'clean-tech' industries to tackle environmental challenges. This book brings together leading European based experts, each with a long standing interest in industrial policy. The chapters offer a broad set of perspectives on the many facets of industrial policy, including reflections upon past experiences of industrial policy (from across the globe) and critical analysis and advice upon contemporary UK industrial policy issues. They aim to critically inform and challenge policy-makers, policy think-tanks, industrialists, trade unions, academics, and other stakeholders in framing the future course for industrial policy in the UK, and indeed more widely.

The Oxford Handbook of Assessment Policy and Practice in Music Education Timothy Brophy,2019-01-02 In the music classroom, instructors who hope to receive aid are required to provide data on their classroom programs. Due to the lack of reliable, valid large-scale assessments of student achievement in music, however, music educators in schools that accept funds face a considerable challenge in finding a way to measure student learning in their classrooms. From Australia to Taiwan to the Netherlands, music teachers experience similar struggles in the quest for a definitive assessment resource that can be used by both music educators and researchers. In this two-volume Handbook, contributors from across the globe come together to provide an authority on the assessment, measurement, and evaluation of student learning in music. The Handbook's first volume emphasizes international and theoretical perspectives on music education assessment in the major world regions. This volume also looks at technical aspects of measurement in music, and outlines situations where theoretical foundations can be applied to the development of tests in music. The Handbook's second volume offers a series of practical and US-focused approaches to music education assessment. Chapters address assessment in different types of US classrooms; how to assess specific skills or requirements; and how assessment can be used in tertiary and music teacher education classrooms. Together, both volumes of The Oxford Handbook of Assessment in Music Education pave the way forward for music educators and researchers in the field.
