Educating Young Adolescent Girls Patricia O'Reilly, Elizabeth M. Penn, Kathleen B. deMarrais, 2001-06 This text for preservice and in-service teacher education courses shows how schools can educate girls and promote their positive self-esteem at the same time. Its purpose is to help teachers facilitate the development of gender-equitable schools and classrooms. Taking a feminist developmental approach, the text draws on an interdisciplinary knowledge base, synthesizing research from psychology, anthropology, sociology, and education. While it is rooted in scholarly research, the focus is on clarifying the connection between theory and practice, with an emphasis on practical applications. The text is organized in two sections--Growth and Development and Teaching and Learning--and includes a variety of engaging pedagogical features. Underscoring the need for teachers, school administrators, and parents to become aware of the intersection of development and education, *Educating Young Adolescent Girls*: *combines gender, growth, and development; *demonstrates how schooling can facilitate the total development of young adolescent girls; and *addresses a multiplicity of issues, including adolescent girls of color and young adolescents girls' sexuality.

Cyberkids Sarah Holloway, Gill Valentine, 2014-02-04 As Tony Blair has said, Technology has revolutionised the way we work and is now set to transform education. Children cannot be effective in tomorrow's world if they are trained in yesterday's skills. *Cyberkids* draws together research in the sociology of childhood and social studies of technology to explore children's experiences in the Information Age. The book addresses key policy debates about social inclusion and exclusion, children's identities and friendships in on-line and off-line worlds and their relationships with families and teachers. It counters contemporary moral panics about children's risk from dangerous strangers on-line, about corruption and lost innocence from adult-centred material on the web and about the addiction to life on the screen. Instead, by showing how children use ICT in balanced and sophisticated ways, the book draws out the importance of everyday uses of technology and the ways in which children's local experiences are embedded within, and in part, constitute the global.

Cyberkids Sarah L. Holloway, Gill Valentine, 2003 Draws together research in the sociology of childhood and social studies of technology to explore children's experiences in the information age. Addresses key policy debates about social exclusion, identity, friends and family.

The Essential Persona Lifecycle: Your Guide to Building and Using Personas Tamara Adlin, John Pruitt, 2010-03-20 The *Essential Persona Lifecycle: Your Guide to Building and Using Personas* offers a practical guide to the creation and use of personas, which can help product designers, their team, and their organization become more user focused. Computer and Internet Use by Children and Adolescents in 2001 Matthew DeBell,2003

Karla Marx [and the Man-haters] Marshall Rockford Goodman,2015-08-22 With eye-opening revelations, Karla Marx and the Man-haters explores the past and present politics of the women's movement in seven chapters: Politics, Family, Media, Government, Education, Finance and Religion. More than 400 endnotes and citations are provided. Karl Marx compiled Manifesto of the Communist Party in 1848. Now we have Karla Marx, who personifies today's radical feminist activist with her egregious messages of liberation and equality that covertly limit our rights and subtly usurp our freedom through authoritarian control. Karla Marx was first published in 2008. Now this latest edition incorporates updates, revisions and original material in two new chapters and more than 75 new pages. (An electronic version is also available most through most online retailers.)

Why I Am Not Going to Buy a Computer Wendell Berry,2021-02-09 A brief meditation on the role of technology in his own life and how it has changed the landscape of the United States from America's greatest philosopher on sustainable life and living (Chicago Tribune). A number of people, by now, have told me that I could greatly improve things by buying a computer. My answer is that I am not going to do it. I have several reasons, and they are good ones. Wendell Berry first challenged the idea that our advanced technological age is a good thing when he penned Why I Am Not Going to Buy a Computer in the late 1980s for Harper's Magazine, galvanizing a critical reaction eclipsing any the magazine had seen before. He followed by responding with Feminism, the Body, and the Machine. Both essays are collected in one short volume for the first time.

Kids and Media in America Donald F. Roberts,Ulla G. Foehr,2004 This 2003 book reports the only national, random sample survey of US children and adolescents' use of all of the various media available to them conducted in at least the past 30 years. In addition to providing the first comprehensive look at how media-saturated our young people's lives have become, it is the first study to examine young people's overall media budgets, and the first to attempt to describe distinctly different types of young media users. Extensive background information and chapters devoted to each of the various media, to the overall media budget, and to particular types of media users, enables the authors to describe perhaps the most detailed map of US young people's media behavior ever assembled.

Learning with Personal Computers Helga A. H. Rowe,Irene Brown,Isabel Lesman,1993 A book for teachers and others concerned with integrating computing into the broader school curriculum. Divided into four parts: Part 1 provides a theoretical framework for learning and teaching with computers; Part 2 tackles the problems associated with acquisition of computer literacy; Part 3 describes an empirical study of the Sunrise project at Coombabah in Queensland; and Part 4 is concerned with teachers' professional development. Contains an extensive bibliography and index.

Computers in human behavior Buros Institute of Mental Measurements (Lincoln, NE),1997

Handbook of Child Psychology and Developmental Science, Ecological Settings and Processes ,2015-03-31 The essential reference for human development theory, updatedand reconceptualized The Handbook of Child Psychology and DevelopmentalScience, a four-volume reference, is the field-defining work towhich all others are compared. First published in 1946, and now inits Seventh Edition, the Handbook has long been consideredthe definitive guide to the field of developmental science. Volume 4: Ecological Settings and Processes in DevelopmentalSystems is centrally concerned with the people, conditions, andevents outside individuals that affect children and theirdevelopment. To understand children's development it is bothnecessary and desirable to embrace all of these social and physicalcontexts. Guided by the relational developmental systemsmetatheory, the chapters in the volume are ordered them in a mannerthat begins with the near proximal contexts in which children findthemselves and moving through to distal contexts that influencechildren in equally compelling, if less immediately manifest, ways.The volume emphasizes that the child's environment is complex,multi-dimensional, and structurally organized into interlinkedcontexts; children actively contribute to their development; thechild and the environment are inextricably linked, andcontributions of both child and environment are essential toexplain or understand development. Understand the role of parents, other family members, peers,and other adults (teachers, coaches, mentors) in a child'sdevelopment Discover the key neighborhood/community and institutionalsettings of human development Examine the role of activities, work, and media in child andadolescent development Learn about the role of medicine, law, government, war anddisaster, culture, and history in contributing to the processes ofhuman development The scholarship within this volume and, as well, across the fourvolumes of this edition, illustrate that developmental science isin the midst of a very exciting period. There is a paradigm shiftthat involves increasingly greater understanding of how todescribe, explain, and optimize the course of human life fordiverse individuals living within diverse contexts. ThisHandbook is the definitive reference for educators,policy-makers, researchers, students, and practitioners in humandevelopment, psychology, sociology, anthropology, andneuroscience.

Mathematics Education and Technology-Rethinking the Terrain Celia Hoyles,Jean-Baptiste Lagrange,2009-10-09

Mathematics Education and Technology-Rethinking the Terrain revisits the important 1985 ICMI Study on the influence of computers and informatics on mathematics and its teaching. The focus of this book, resulting from the seventeenth Study led by ICMI, is the use of digital technologies in mathematics teaching and learning in

countries across the world. Specifically, it focuses on cultural diversity and how this diversity impinges on the use of digital technologies in mathematics teaching and learning. Within this focus, themes such as mathematics and mathematical practices; learning and assessing mathematics with and through digital technologies; teachers and teaching; design of learning environments and curricula; implementation of curricula and classroom practice; access, equity and socio-cultural issues; and connectivity and virtual networks for learning, serve to organize the study and bring it coherence. Providing a state-of-the-art view of the domain with regards to research, innovating practices and technological development, Mathematics Education and Technology-Rethinking the Terrain is of interest to researchers and all those interested in the role that digital technology plays in mathematics education.

Children and Their Changing Media Environment Sonia Livingstone, Moira Bovill, 2013-06-07 Focusing on the meanings, uses, and impacts of new media in childhood, family life, peer culture, and the relation between home and school, this volume sets out to address many of the questions, fears, and hopes regarding the changing place of media in the lives of today's children and young people. The scholars contributing to this work argue that such questions--intellectual, empirical, and policy-related--can be productively addressed through cross-national research. Hence, this volume brings together researchers from 12 countries--Belgium, Denmark, Finland, France, Germany, the United Kingdom, Israel, Italy, the Netherlands, Spain, Sweden, and Switzerland--to present original and comprehensive findings regarding the diffusion and significance of new media and information technologies among children. Inspired by parallels and difference between the arrival of television in the family home during the 1950s and the present day arrival of new media, the research is based on in-depth interviews and a detailed comparative survey of 6- to 16-year-olds across Europe and in Israel. The result is a comprehensive, detailed, and fascinating account of how these technologies are rapidly becoming central to the daily lives of young people. As a resource for researchers and students in media and communication studies, leisure and cultural studies, social psychology, and related areas, this volume provides crucial insights into the role of media in the lives of children. The findings included herein will also be of interest to policymakers in broadcasting, technology, and education throughout the world.
