Video and Filmmaking as Psychotherapy Joshua L. Cohen, J. Lauren Johnson, Penny Orr, 2015-02-11 While film and video has long been used within psychological practice, researchers and practitioners have only just begun to explore the benefits of film and video production as therapy. This volume describes a burgeoning area of psychotherapy which employs the art of filmmaking and digital storytelling as a means of healing victims of trauma and abuse. It explores the ethical considerations behind this process, as well as its cultural and developmental implications within clinical psychology. Grounded in clinical theory and methodology, this multidisciplinary volume draws on perspectives from anthropology, psychiatry, psychology, and art therapy which support the use and integration of film/video-based therapy in practice.

Vamping the Stage Andrew N. Weintraub, Bart Barendregt, 2017-07-31 The emergence of modernity has typically focused on Western male actors and privileged

politics and economy over culture. The contributors to this volume successfully unsettle such perspectives by emphasizing the social history, artistic practices, and symbolic meanings of female performers in popular music of Asia. Women surfaced as popular icons in different guises in different Asian countries through different routes of circulation. Often, these women established prominent careers within colonial conditions, which saw Asian societies in rapid transition and the vernacular and familiar articulated with the novel and the foreign. These female performers were not merely symbols of times that were rapidly changing. Nor were they simply the personification of global historical changes. Female entertainers, positioned at the margins of intersecting fields of activities, created something hitherto unknown: they were artistic pioneers of new music, new cinema, new forms of dance and theater, and new behavior, lifestyles, and morals. They were active agents in the creation of local performance cultures, of a newly emerging mass culture, and the rise of a region-wide and globally oriented entertainment industry. *Vamping the Stage* is the first book-length study of women, modernity, and popular music in Asia, showcasing cutting-edge research conducted by scholars whose methods and perspectives draw from such diverse fields as anthropology, Asian studies, cultural studies, ethnomusicology, and film studies. Led by an impressive introduction written by Weintraub and Barendregt, fourteen contributors analyze the many ways that women performers supported, challenged, and transgressed representations of existing gendered norms in the entertainment industries of China, Japan, India, Indonesia, Iran, Korea, Malaysia, and the Philippines. Placing women's voices in social and historical contexts, the essays explore salient discourses, representations, meanings, and politics of "voice" in Asian popular

music. Historicizing the artistic sounds, lyrical texts, and visual images of female performers, the essays reveal how women used popular music to shape the ideas, practices, and meanings of modernity in various Asian contexts and time frames. The ascendancy of women as performers paralleled, and in some cases generated, developments in wider society such as suffrage, social and sexual liberation, women as business entrepreneurs and independent income earners, and particularly as models for new life styles. Women's voices, mediated through new technologies of film and the phonograph, changed the soundscape of global popular music and resonate today in all spheres of modern life.

Supercell's Supercell featuring Hatsune Miku Keisuke Yamada, 2017-08-10 The lead singer on Supercell's eponymous first album is Hatsune Miku—a Vocaloid character created by Crypton Future Media with voice synthesizers. A virtual superstar, over 100,000 songs, uploaded mostly by fans, are attributed to her. Supercell is a Japanese creator music group with the composer Ryo leading ten artists, who design album illustrations and make music videos. These videos are uploaded onto Nico Nico and other video-sharing sites. By the time Supercell was released in March 2009, the group's Vocaloid works were already well-known to Nico Nico users and fans. This book explores the Vocaloid and DTM (desktop music) phenomena through the lenses of media and fan studies, looking closely at online social media platforms, the new technology for composing, avid fans of the Vocaloid character, and these fans' performative practices. It provides a sense of how interactive new media and an empowered fan base combine to engage in the creation processes and enhance the circulation of DTM works. 33 1/3 Global, a series related to but independent from 33 1/3, takes the format of the original series of short, music-based books and brings the focus to music throughout the world. With initial volumes focusing on Japanese and Brazilian music, the series will also include volumes on the popular music of Australia/Oceania, Europe, Africa, the Middle East, and more.

Shared Governance for Sustainable Working Landscapes Timothy M.

Gieseke,2016-08-05 Sustaining our agricultural landscapes is no longer just a technical, scientific or even political problem, but it has evolved into a socially complex, so-called wicked problem of conflicting social governance and economics. This creates an extreme economic obstacle where the value of ecosystem services remains low and diffuse and the transactions costs remain high and multiple.Using Uber-like business platform technology and a shared governance model, a symbiotic demand for environmental benefits is created. Enabling multi-sector transactions for environmental benefits, this platform innovation would remedy the tragedy of the commons; the economic nemesis to achieving landscape sustainability. In a nutshell, to sustain our agricultural landscapes a transdisciplinary approach supported by a shared governance model housed within a multi-sided platform is needed. This book introduces an assessment framework identifying governance actors, styles and ratios for socio-ecological systems. The assessment uses a new governance compass to identify the types of actors completing which tasks and identifies the styles of governance used to complete the tasks. It is aimed to anyone involved in sustainability science, agricultural policy planning, or integrated landscape design.

Multimodal Legitimation Rowan R. Mackay, 2021-09-30 This volume meditates on the various meanings of legitimation and expands on the notion that language can be used to gain or preserve it by demonstrating the added impact of other modes in specific examples of political and institutional discourse. The book draws on a multilayered framework that builds on and integrates work from both critical discourse analysis and social semiotic traditions, as well as the work of philosophers such as Habermas, Weber, and Rousseau, to show how it might be applied in practice to analyse and understand myriad forms of discourse. The volume focuses on examples from political campaign spots, which highlight various modes, including images, film, oratory, and color, but are also of global relevance and scale, highlighting their unique and complex position at the nexus between legitimation and multimodality. Offering a new analytical framework for understanding legitimation across a range of discursive contexts, this book will be of particular interest to students and

scholars in discourse analysis, multimodality, political science, psychology, design, and education.
