Classroom Literacy Assessment Jeanne R. Paratore, Rachel L.

McCormack, 2007-04-05 Showcasing assessment practices that can help teachers plan effective instruction, this book addresses the real-world complexities of teaching literacy in grades K-8. Leading contributors present trustworthy approaches that examine learning processes as well as learning products, that yield information on how the learning environment can be improved, and that are conducted in the context of authentic reading and writing activities. The volume provides workable, nuts-and-bolts ideas for incorporating assessment into instruction in all major literacy domains and with diverse learners, including students in high-poverty schools and those with special learning needs. It is illustrated throughout with helpful concrete examples.

Language and Television Series Monika Bednarek, 2018-10-04 Explores contemporary US television dialogue - the on-screen language that viewers worldwide encounter as they watch popular television series.

Perspectives on Language Learning Materials Development Freda Mishan, Angela Chambers, 2010 Language learning materials development remains a surprisingly under-supported aspect of language teaching. This book constitutes a much-needed resource in the area, aiming to support and advance the craft of materials design. The volume offers a snapshot of the contemporary influences on language learning materials development from diverse perspectives around the globe. These influences include the demands of teaching ESOL in Britain and Ireland, the impact of Corpus Linguistics, the needs of young learners and of diverse worldwide audiences, the development of intercultural competence, as well as the integration of L2 acquisition research. Contributors to the volume are drawn from a broad range of teaching, research

and materials development backgrounds. The book includes some chapters based on papers given at the MATSDA (Materials Development Association) 2008 conference.

Crime and Corpus Ulrike Tabbert, 2015-04-15 Reports on crime in newspapers do not provide a neutral representation of criminals and their offences but instead construct them in accordance with societal discourse surrounding this issue. This book takes an interdisciplinary approach at the intersection of Linguistics, Criminology, and Media Studies and demonstrates how Linguistics can contribute to the study of crime in the media. By combining the tools offered by Corpus Linguistics and Critical Stylistics (a text-based framework for Critical Discourse Analysis), evidence is provided for predominant perceptions of crime and their underlying ideologies in both British and German society. This study names and illustrates the most significant linguistic devices used to construct offenders, victims, and crimes in two newspaper corpora compiled from the German and British press. These devices are then linked to criminological frameworks.

Cross-cultural Genre Analysis Danni Yu, 2021-12-15 This unique monograph provides a theoretical and methodological account on how to do cross-cultural genre analysis with the aids of corpus tools. Cross-cultural genre analysis investigates how discourse communities from different cultural backgrounds

use language to realize a particular genre. It can shed light on genre nature as well as cultural specificities. The book suggests five specific approaches in doing cross-cultural genre analysis: Investigating genre context; Approaching genre complexity; Exploring genre nature; Exploring culture specificity; and Focusing on specific communicative functions. Each of these approaches is illustrated and demonstrated in a specific chapter with practical analyses of the genre of CSR reports. Covering linguistic analysis of CSR reports in three languages: Chinese, English and Italian, Yu provides insights into implications for both genre theories and CSR communication practice. By applying the cross-cultural perspective in corporate discourse analysis, her book demonstrates how the approach of cross-cultural genre analysis is fruitful and valuable in providing practical insights into the textual practice of CSR reporting in a globalized context. Moreover, in the final parts of the book, Yu illustrates how cross-cultural genre analysis can be applied in the didactic field of writing, translation and cross-cultural studies. This volume is a valuable reference to scholars of genre analysis, corpus-based studies, cross-cultural studies and corporate communication. Moreover, it is also useful for professionals involved in compiling CSR reports. Armed with the knowledge imparted in this book, the reader should be able to analyze other genres from a cross-cultural perspective. In particular, instructions on how to use specific corpus tools are provided in the appendices, which can give scholars basic technical knowledge to approach

the field of cross-cultural genre analysis.

The Labour of Words in Higher Education Sarah Hayes, 2019-01-28 The Labour of Words in Higher Education: is it Time to Reoccupy McPolicy? critically examines a widespread tendency in university policy to attribute the academic labour of staff and students to strategies, technologies and socially constructed buzz phrases.

Discourse and Politics Gloria Álvarez-Benito, Gabriela Fernández-Díaz, Isabel M^a Íñigo-Mora, 2009-01-14 Drawing on political discourse from a wide range of settings and perspectives, this book is set to provide a descriptive and analytical tool for examining political discourse and will be welcomed by anyone interested in discourse analysis in general, and in political discourse in particular. Topics covered in this book include the study of political discourse styles, the use of rhetorical strategies (vocabulary, metaphors, quotations, parentheticals, etc.), the relation between political discourse and society (legitimization, the private-public interface, identities), role of gestures in relation to speech, methods for analysing political discourse, and how to build and exploit a political language corpus.

The Business of Words Crispin Thurlow, 2019-07-30 The Business of Words examines the practices of 'high-end' language workers or wordsmiths where we find words being professionally designed, institutionally managed, and, inevitably, objectified for status and profit. Aligned with existing work on

language and political economy in critical sociolinguistics and discourse studies, the volume offers a novel, complementary insight into the relatively elite practices of language workers such as advertisers, dialect coaches, publishers, judges, translators, public relations officers, fine artists, journalists, and linguists themselves. In fact, the book considers what academics might learn about language from other wordsmiths, opening a space for 'dialogue' between those researching language and those who also stake a claim to linguistic expertise and a way with words. Bringing together an array of leading international scholars from the cognate fields of discourse studies, sociolinguistics, and linguistic anthropology, this book is an essential resource for researchers, advanced undergraduate, and postgraduate students of English language, linguistics and applied linguistics, communication and media studies, and anthropology.

Government Translation in South Korea Jinsil Choi, 2022-04-26 Government Translation in South Korea: A Corpus-based Study is the first book to investigate and discuss translation processes and translation products in South Korean government institutions, employing a parallel corpus-based approach. Choi identifies different agents and procedures involved in institutional translation practices, discusses linguistic and genre features of translations, and investigates changes made in translations compared to the original documents, during the two Korean presidencies of Lee Myung-bak (2008–2013) and Park Geun-hye (2013–2017). Choi's book explores important

facets of Korean government translation in the belief that practices associated with the normative meaning and concept of government translation have to be displaced into the wider understanding of the concept of translation as a social construct. Drawing on the theoretical frameworks of institutional translation and critical discourse analysis-informed corpus-based translation studies, the chapters discuss the practice, process and products of Korean government translation. The Korean-English parallel corpus methodology used introduces a systemic way to analyse changes in Korean government translations, based on a personally built sentence-level tagged corpus, both qualitatively and quantitatively. This volume will be of great interest to scholars and students of translation studies as well as Korean studies.

The Integration of MILLION Into the English System of Number Words Donald Sims MacQueen, 2010 This corpus study traces the history of MILLION in English. It focuses on the shift in word class/function from noun/noun-phrase head (three millions of dollars) to determinative/determiner (three million dollars). A chapter on morphosyntax/semantics probes the natural word class and function of number words and their historical categorization. A composite international diachronic corpus is used to map a broad taxonomy of MILLION phrases, and very-large-scale digital American and British newspaper archives are used to show when and where the syntactic shift took place. The tens of

billions of datable words in these sources yield such robust results that key phases in the shift can be traced in unprecedented detail, uncovering surprising patterns in American/British differences and an avoidance strategy in the use of numeral and number-word expressions. Retarding and accelerating factors are treated in separate chapters.

The Routledge Handbook of Corpus Linguistics Anne O'Keeffe, Michael McCarthy, 2010-04-05 Provides an overview of a dynamic and rapidly growing area with a widely applied methodology. This handbook covers the historical development of the field and its growing influence and application in other areas. It is suitable for advanced undergraduates and postgraduates.

The Impacts of Neoliberal Discourse and Language in Education Mitja Sardoč, 2021-03-21 This edited collection combines quantitative content and critical discourse analysis to reveal a shift in the rhetoric used as part of the neoliberal agenda in education. It does so by analysing, uncovering, and commenting on language as a central tool of education. Focussing on vocabulary, metaphors, and slogans used in strategy documents, advertising, policy, and public discourse, the text illustrates how concepts such as justice, opportunity, well-being, talent, and disadvantage have been hijacked by educational institutes, governments, and universities. Showing how neoliberalism has changed discourses about education and educational policy, these chapters trace issues such as anti-intellectualism, commercialization, meritocracy, and an erasure of racial difference back to a contradictory

growth in egalitarian rhetoric. Given its global scope, this volume offers a timely intervention in the studies of neoliberalism and education by developing a holistic vision of how the language of neoliberalism has changed how we think about education. It will prove to be an essential resource for scholars and researchers working at the intersections of education, policymaking, and neoliberalism.

Discourse in Context: Contemporary Applied Linguistics Volume 3 John Flowerdew, 2014-02-25 Featuring internationally renowned academics, this volume provides a snapshot of the field of applied linguistics, and illustrates how linguistics is engaging with the idea of 'context'. The book treats discourse as language in the contexts of its use in and above the level of the sentence and as systems of knowledge and beliefs. In using the term context(s), the book understands this as different situations in which discourse is produced and, on the other, how analysts construe context in their work. The volume is thus concerned with language in its context of use (little d discourse), but at the same time, more specifically, in individual chapters, with particular discourses as they are manifested in particular contexts (big D discourses). Well known discourse analysts contribute chapters focussing on different contexts with which they are familiar, viz. business, education, ethnicity and race, gender and sexuality, history, intercultural contexts, lingua franca contexts, media, place, politics, race, and the virtual world. It brings together researchers from different

approaches, but all with a commitment to the study of language in context. The contributors themselves represent different approaches to discourse analysis: conversation analysis, corpus linguistics, critical discourse analysis, ethnographic discourse analysis, mediated discourse analysis, multimodal discourse analysis, systemic functional linguistics. Readers are invited to compare and contrast these different contexts and approaches.

Contemporary Corpus Linguistics Paul Baker, 2009-03-06 Corpus linguistics uses large electronic databases of language to examine hypotheses about language use. These can be tested scientifically with computerised analytical tools, without the researcher's preconceptions influencing their conclusions. For this reason, corpus linguistics is a popular and expanding area of study. Contemporary Corpus Linguistics presents a comprehensive survey of the ways in which corpus linguistics is being used by researchers. Written by internationally renowned linguists, this volume of seventeen introductory chapters aims to provide a snapshot of the field of corpus linguistics. The contributors present accessible, yet detailed, analyses of recent methods and theory in Corpus Linguistics, ways of analysing corpora, and recent applications in translation, stylistics, discourse analysis and language teaching. The book represents the best of current practice in Corpus Linguistics, and as a one volume reference will be invaluable to students and researchers looking for an overview of the field.
