Pat of Silver Bush L. M. Montgomery,2014-03-04 There's no place like home Do fairies really come for the dish of milk we leave them? Is Mrs. McClenahan really a witch? How is it possible to find a new baby in a bed of parsley? These are all questions Pat Gardiner wants to know. And it seems her Irish housekeeper, the incomparable Judy Plum, always has an answer... For Pat, there is no place more magical on earth than her home of Silver Bush, with its majestic birch trees and enchanting gardens. If it were up to her, nothing there would ever change. But of course if nothing changed, she'd never get a new baby sister, see her Aunt Hazel's wedding, or meet the only boy who truly understands her. Yes, there is change coming for Pat—some of it joyous and some of it heartbreaking. But no matter what, her favorite house in the world will always be waiting for her... What Readers are Saying: I love this book! It's laugh-out-loud funny and a very charming story. The Pat books are right up there with the Anne series at the top of Montgomery's list of works. Pat is a lovely character, and her affection for home and family was delightful. I thoroughly enjoyed it.

Emily's House Amy Belding Brown, 2021-08-03 She was Emily Dickinson's maid, her confidante, her betrayer... and the savior of her legacy. An evocative new novel about Emily Dickinson's longtime maid, Irish immigrant Margaret Maher, whose bond with the poet ensured Dickinson's work would live on, from the USA Today bestselling author of *Flight of the Sparrow*, Amy Belding Brown. Massachusetts, 1869. Margaret Maher has never been one to settle down. At twenty-seven, she's never met a man who has tempted her enough to relinquish her independence to a matrimonial fate, and she hasn't stayed in one place for long since her family fled the potato famine a decade ago. When Maggie accepts a temporary position at the illustrious Dickinson family home in Amherst, it's only to save money for her upcoming trip West to join her brothers in California. Maggie never imagines she will form a life-altering friendship with the eccentric, brilliant Miss Emily or that she'll stay at the Homestead for the next thirty years. In this richly drawn novel, Amy Belding Brown explores what it is to be an outsider looking in, and she sheds light on one of Dickinson's closest confidantes—perhaps the person who knew the mysterious poet

best—whose quiet act changed history and continues to influence literature to this very day.

The Bio-Integrated Farm Shawn Jadrnicek, Stephanie Jadrnicek, 2016 The Bio-Integrated Farm is a twenty-first-century manual for managing nature's resources. This groundbreaking book brings system farming and permaculture to a whole new level. Author Shawn Jadrnicek presents new insights into permaculture, moving beyond the philosophical foundation to practical advanced designs based on a functional analysis. Holding his designs to a higher standard, Jadrnicek's components serve at least seven functions (classical permaculture theory only seeks at least two functions). With every additional function a component performs, the design becomes more advanced and saves more energy. A bio-integrated greenhouse, for example, doesn't just extend the season for growing vegetables; it also serves as a rainwater collector, a pond site, an aquaponics system, and a heat generator. Jadrnicek's prevalent theme is using water to do the work. Although applicable in many climates, his designs are particularly important for areas coping with water scarcity. Jadrnicek focuses on his experience as farm manager at the Clemson University Student Organic Farm and at his residence in the foothills of the Blue Ridge Mountains. These locations lie at the cooler northern edge of a humid subtropical climate that extends west to the middle of Texas and north along the coast to New Jersey. He has created permaculture patterns ranging from raising transplants and field design to freshwater prawn production and composting. These patterns have simplified the operation of the 125-share CSA farm while reducing reliance on outside resources. In less time than it takes to mow his two-acre homestead, Jadrnicek is building a you-pick fruit farm using permaculture patterns. His landscape requires only the labor of harvesting, and the only outside input he buys is a small amount of chicken feed. By carefully engaging the free forces of nature--water, wind, sunlight, convection, gravity, and decomposition--Jadrnicek creates sustenance without maintenance and transforms waste into valuable farm resources. The Bio-Integrated Farm offers in-depth information about designing and building a wide range of bio-integrated projects including reflecting ponds, water-storage ponds, multipurpose basins, greenhouses, compost heat extraction, pastured chicken systems, aquaculture, hydroponics, hydronic heating, water filtration and aeration, cover cropping, and innovative rainwater-harvesting systems that supply water for drip irrigation and flushing toilets.
