Transnational Organised Crime in International Law Tom Obokata,2010-08-17 There is extensive and detailed academic literature on the legal development of international crimes such as war crimes and crime against humanity. However, not much attention has been paid to other serious crimes, including narcotics-related offences, human trafficking and money laundering, which do not necessarily amount to international crimes in the traditional sense. The purpose of this monograph is to fill this gap and offer a critical analysis of developments in the field of transnational organised crime under international law. The book is divided into two parts. Part I is entitled Norms, Principles, and Concepts. It traces the history of organised crime and explores key concepts and norms relating to the practice from a multi-disciplinary perspective. It then looks at legal obligations imposed upon States as well as non-State actors in relation to transnational organised crime. Part II illustrates how these norms, principles and obligations are translated and enforced in practice. This will be done through case studies at the level of national law (Thailand, Serbia and the UK), regional law (European Union) and international law (United Nations). A book of many parts, its thematic coherence comes from its devotion to identifying the social threat posed by organised crime and the legal steps taken at the international and national levels against that threat. Rich with example and illustration and written in a light, direct, style, it will provide a lucid guide for practitioners, policy-makers and students to the largely untraversed territory of the international legal system set up to suppress transnational organised crime. Professor Neil Bolster, University of Canterbury, New Zealand. ...the international law governing organized crime is a close relative of the body of law applicable to the International Criminal Court and similar institutions. It provides a forum to address issues of more general concern, such as the scope of universal jurisdiction, immunities, statutory limitation and extradition. Tom Obokata's study, with its original and in some ways unique perspective, enriches our knowledge of the field. Professor William Schabas, Irish Centre for Human Rights. The book is well written, its documentation is quite exhaustive, and its thesis is timely and compelling. Professor M. Cherif Bassiouni, DePaul University College of Law.

**On DWI Laws in Other Countries** Kathryn Stewart,2000 This study compares impaired driving laws from other countries, including the European Union, United Kingdom, Norway, Switzerland, Canada, Mexico, Australia, New Zealand and Japan. **The Law of the Sea** Tullio Treves,Laura Pineschi,1997-01-01 The United

Nations Convention on the Law of the Sea of 10 December 1982 entered into force on 16 November 1994. Since this date a single binding instrument has regulated the rights and duties of States at sea and regarding the sea. New concepts, such as the exclusive economic zone, archipelagic waters, transit passage through straits, and the International Seabed Area, are now fully recognized. The fifteen member States of the European Union are a significant sample for analyzing the practice of States, or at least that of the Western industrialized States, as regards the law of the sea. They include major and small maritime powers, coastal and land-locked States, States with coasts on the Atlantic Ocean and States with coasts on semi-enclosed seas such as the Baltic and the Mediterranean, States with and without involvement in deep seabed mining and States with different interests as regards fisheries. The fact that they all belong to the European Union is a very important common feature, which amply justifies the choice made to study them together. The book's aim is to give, through essays prepared by well-known specialists, a detailed survey of the attitudes and practice concerning the law of the sea of the member States of the European Union and of the European Community as such. The common positions of the member States and the results of their coordinated action also emerge from these essays. The fact that the member States and the European Community are now actively engaged in the process of becoming parties to the Law of the Sea Convention is certainly a major contribution to the consolidation of the Convention as a universal instrument, or at least as an instrument widely ratified by States of all continents and economic and political interests.

*The Handbook of the Law of Visiting Forces* Dieter Fleck, 2018-04-12 The legal position of visiting forces transcends domestic and international law and is of growing importance in our increasingly globalized and insecure world. 'In area' and 'out of area' operations, both for the purpose of establishing and maintaining peace and in connection with the conduct of other military operations and training, are likely to become more frequent for a variety of reasons. Finding where the applicable law places the balance between the interests, sensitivities and needs of the host state and the requirements, often practical in nature, of the visiting force is a key objective in ensuring that the relationship between hosts and 'guests' is and remains harmonious. All of this must be achieved in an increasingly complex legal environment. This fully updated second edition of *The Handbook of the Law of Visiting Forces* addresses the issues surrounding visiting forces and

provides a full overview of the legal framework in which they operate. Through an analysis of jurisprudence and historical developments, it offers a comparative commentary to the UN, NATO, and other SOFA rules. The Handbook then continues its analysis through cases studies of visiting forces in key countries, including a fully updated chapter on Afghanistan that considers the various stages of the conflict , before offering conclusions on the current state of the law and its likely future development.
